COMMENT

admark.vcf (350 B)

If you discontinue the COT reports that's one less inconvenient thing to do! Maybe you could work it out so all you have to do is lunch. Actually, if the government stops publishing figures entirely (such as the recent demise of M3) then everything should go "smoothly". Oddly enough, that's how the cannibalistic Japanese soldiers described the harvesting of human flesh for the consumption of their troops in China.
