COMMENT

Dear Sirs:

This is in regard to discontinuing cot reports. I think that would be a great disservice to the public. Further I think the commercial spread products should be broken out like the non-commercial spreads are. That way we could see the true short position the 4 & 8 large traders are holding. I am one who thinks the large traders are not allowing the silver market to trade freely because of their large short positions. I do not trade futures but I do have an interest in seeing the silver market trade freely as many thousand perhaps millions of small holders. Most are probably not aware of these positions but would be very disappointed if they were made aware. Thank you for your consideration of this matter.

Sincerely yours,
Ronald Stoner
