OFC. OF THE SECRETARIAT

Dear Sirs,

I wish to respectfully request that the CFTC abandon the plan to eliminate the COT reports.

This would remove valuable information which assists orderly markets which benefit all participants & end consumers alike. The more that public information is available the more honest & above board the futures market will be.

I believe that it is the job of government in general, & the CFTC in particular in this case, to provide as much public information as possible in order to provide orderly markets.

Thank You,

Craig Clark
