JUL 21 2006 7:13
OFFICE OF THE SECRETARY

At a time when data is easy and cheap to gather, we should have more, not less, data. It seems the SEC, the CFTC, the Fed, and various other government agencies are acting to restrict the flow of information. COT reports come out on Friday and are reflective of positions as of Tuesday. In this electronic age, they probably should come out once a day, or at least with a one-day time lag. The CFTC should have more timely reporting of COT data, not the elimination of it.

Celia Ching
