Subject: COT Reports

2006 JUL 21 PM 6:41

OFFICE OF THE SECRETARIAT

Dear Sirs and/or Madams,

Please accept this e-mail as confirmation I consider the COT reports valuable information.

The integrity of the U.S. and Canadian markets is derived to a large extent from the quality of the data disseminated.

More data rather than less; higher quality rather than lower quality; more transparency rather than less transparency will all ensure vibrant markets in North America, without having our financial position usurped by other competing global markets.

In a global market environment it is essential that North American markets provide value to global traders and data is one crucial aspect to ensuring liquid markets, and a healthy financial industry.

Please improve the COT report data and any other information rather than limit it; the consequences of not doing so are obviously contrary to any North American's benefit, since our financial industry underpins much of our success and our lives.

Regards,

Jamie Miles
