**RE: New CME Rule 588, CME Rule 618 and CME's Error Trade Policy
Submission No. 04-107**

Dear Ms. Webb,

Chicago Mercantile Exchange Inc. ("CME" or "Exchange") hereby notifies the Commission that the Exchange has approved the deletion of CME's previous Error Trade Policy and approved the replacement of that policy with new CME Rule 588 (GLOBEX® Trade Cancellations). The elimination of the prior Error Trade Policy was necessary in order 1) better accommodate the addition of CME's implied spreading functionality that has recently been implemented for the trading of certain CME Eurodollar spreads, 2) reduce the probability of naked leg risk for spread traders, and 3) hold error trade makers responsible for inappropriately elected stop orders. The new rule will become effective on Friday, October 29, 2004.

A new arbitration procedure, found at CME Rule 618 (Claims Regarding Trade Cancellations or Price Adjustments), was required as a result of Rule 588. Additions to the rules are underlined and deletions are lined out.

The Exchange certifies that this revision neither violates nor is inconsistent with any provision of the Commodity Exchange Act or of the rules and regulations thereunder.

If you have any questions regarding this matter, please call me at (312) 648-5422.

Sincerely,

/S/ Stephen M. Szarmack
Director and Associate General Counsel

588. GLOBEX TRADE CANCELLATIONS

588.A. GLOBEX Control Center Trade Cancellation Authority

The following policy shall be applied to balance the adverse effects on market integrity of executing trades and publishing trade information inconsistent with prevailing market conditions while preserving legitimate expectations that executed transactions will not be cancelled. CME's trade cancellation policy authorizes the GLOBEX Control Center ("GCC") to mitigate market disrupting events caused by the improper or erroneous use of the GLOBEX system or by system defects by adjusting trade prices or canceling ("busting") trades. Notwithstanding any other provisions of this rule, the GCC may also adjust trade prices or cancel any trade if the GCC determines that failure to adjust the price or cancel the trade may have a material, adverse effect on the integrity of the market. The decision of the GCC shall be final.

588.B. Review of Trades

The GCC may review a trade based on its analysis of market conditions or a request for review by a GLOBEX user. A request for review must be made within eight minutes of the trade occurring. The GCC shall promptly determine whether the trade will be subject to review. In the case of illiquid contracts, the GCC may initiate a review up to one hour after the trade occurred. Promptly after deciding to review a trade, the GCC will issue an alert indicating that the trade is under review.

588.C. Trade Price Adjustment and Cancellation Process

The GCC will first determine whether the trade price is within the No Bust Range for the contract pursuant to Section K. During fast market conditions, upon the release of significant news events, or in other circumstances in which the GCC determines it is appropriate, the GCC may temporarily double the published No Bust Range without prior notice. In applying the No Bust Range, the GCC shall determine the actual or implied market price for that contract immediately before the trade under review. The GCC may consider any relevant information, including but not limited to the existing market conditions, the volatility of the market, the prices of related instruments in other markets, the last trade price on GLOBEX, a better bid or offer price, a more recent price in a different contract month, the price of the same or related contract established in open outcry trading, theoretical value of an option based on the current (most recent) implied volatility, and any other factors that the GCC deems relevant.

1. Trade Price Inside the No Bust Range

If the GCC determines that the price of the trade was inside the No Bust Range, the GCC will promptly issue an alert indicating that the trade shall stand.

2. Trade Price Outside the No Bust Range

a. Eurodollar Futures Contracts

If the GCC determines that a trade price is outside the applicable No Bust Range, the trade price shall be adjusted to a price that equals the actual or implied market price for that contract at the time of the questioned trade, plus or minus the standard or doubled No Bust Range, as may be applicable. The GCC will promptly issue an alert indicating

- that the prices of the trades outside the No Bust Range have been adjusted to the No Bust Range limit.
- For example, if the standard No Bust Range for Eurodollars is 2.5 points above and below the market price and the doubled No Bust Range was in effect at the time of the transactions, all trade prices outside the doubled No Bust Range shall be adjusted to the applicable No Bust Range limit, i.e., 5 points above or below the market price.
- b. Eurodollar Futures Contracts – Non-Implied Combination Trades
- Non-implied combination Eurodollar trades, such as packs and bundles, which are priced outside of the No Bust Range, may be busted. If the GCC determines that the trade price is outside the No Bust Range, the GCC shall promptly issue an alert indicating that trades outside the No Bust Range have been busted.
- c. All Other Futures and Option Contracts
- If the GCC determines that the trade price is outside the No Bust Range, the GCC shall promptly issue an alert indicating that trades outside the No Bust Range have been busted.
- Notwithstanding the above, trades consummated pursuant to Rule 585 that are determined by the GCC to be outside the No Bust Range will stand, and a reciprocal trade negating the original trade will be consummated by means of a "type 8 transfer."
3. Liability for Losses Resulting from a Price Adjustment or Trade Bust
- a. Eurodollar Futures Contracts – Adjusted Stop Orders
- A party responsible for an order(s) that results in a trade price adjustment shall be liable for actual losses incurred by persons whose stop orders were elected as a result of the order(s). The compensable loss on each futures contract executed as part of a stop order shall be the difference between the adjusted price, as determined by the GCC, and the price in the market at the time the person knew or should have known that his stop order was erroneously elected.
- b. Eurodollar Futures Contracts – Adjusted Spread Trades
- A party responsible for an order that results in a trade price adjustment shall not be liable to persons whose spread orders were executed and adjusted unless the adjusted execution price of the spread is less favorable than the market equilibrium spread price for the relevant spread. The liability of the party responsible for an order that results in a price adjustment shall be limited to the difference between the adjusted price and the equilibrium market price, but shall not exceed the relevant No Bust Range.
- c. Eurodollar Futures Contracts – Other Transactions
- A party responsible for entering an order that results in a trade price adjustment shall not be liable for losses incurred by persons whose trade prices were adjusted, except as provided in 3.a. and 3.b. above.

If a party does not agree to transfer a position pursuant to Section F., any other party to the trade may file an arbitration claim against the member or clearing member representing the other side of the trade. Written notice of such claim must be provided to the Exchange within five business days of the trade occurring. Failure to file the claim within five business days shall

588.G. Arbitration of Disputes Regarding "Type 8 Transfers"

Positions that result from a trade determined by the GOC to be outside the No Bust Range that cannot be busted because the trade was not reported within eight minutes of the trade occurring may be transferred between the parties using a "type 8 transfer" upon agreement of the parties. The transfer must use the original trade price and quantity. Any party may, but is not required to, include a cash adjustment to another party to the trade. Trades determined by the GOC to be inside the No Bust Range may not be reversed using a "type 8 transfer."

588.F. "Type 8 Transfers"

If the trade is not busted, the parties to the transaction cannot reverse the transaction by using a "type 8 transfer" except as provided in Section C.2.c and Section F. Additionally, if the trade is not busted, the parties may not reverse the trade by entering into a pre-arranged offsetting transaction unless the reversal is effected in accordance with Rule 539.C.

Upon a determination by the GOC that a trade shall be busted or that trade prices shall be adjusted, that decision will be implemented. The busted trade price and any price quotes that have been adjusted will be reflected as cancelled in the Exchange's official record of time and sales. Time and sales will reflect the trades at the adjusted price.

588.E. Trade Cancellation or Offset Procedures

A claim for a loss pursuant to Sections C.3.a. and b. must be submitted to the Exchange, on an Exchange claim form, within five business days of the price adjustment or the election of the stop. The Exchange shall reject any claim that is not permitted by Section C. Such decision shall be final. All claims, which are not rejected by the Exchange, shall be forwarded to the party responsible for the order(s) that results in a trade bust or a price adjustment and to the clearing firm through which the trade was placed. Such party, or the clearing firm on behalf of the party, shall within ten business days of receipt of the claim admit or deny responsibility in whole or in part. The liability for losses for a single incident shall be limited to \$500,000. To the extent that liability is admitted, payment shall be made within ten business days. If liability is admitted but the total claims exceed \$500,000, the claims shall be reduced pro rata so that the total payment does not exceed \$500,000. To the extent that liability is denied, the claims shall be submitted to arbitration in accordance with Rule 618.

588.D. Claim Process

A party responsible for an order that results in a trade bust may be liable for the reasonable out-of-pocket losses incurred by persons whose trades were busted or persons whose stop orders were elected and not busted. Issues of liability in such cases will be determined based upon all relevant facts and circumstances, including the conduct of the respective parties. All claims in connection with such losses must be pursued under the applicable rules of Chapter 6.

d. All Other Futures and Options Contracts

Futures Contract No Bust Range

588.K. GLOBEX No Bust Ranges

If a non-member customer, who is responsible for entering an order into GLOBEX that results in a trade bust, fails to pay the fee in accordance with this section, the clearing firm carrying the customer's account shall be responsible for payment of the fee.

When GCC busts a trade, the party responsible for entering the order into GLOBEX that gave rise to the trade bust shall pay an administrative fee to the Exchange in accordance with the following schedule. The fee is \$250 for each of the first five occasions in a calendar year where a party's order entry results in a trade bust, \$500 for each of the next three occasions within the same calendar year where a party's order entry results in a trade bust, and \$1,000 for each subsequent occasion within the same calendar year where a party's order entry results in a trade bust.

588.J. Schedule of Administrative Fees

In the event that the matching engine freezes with live orders in the queue waiting to be matched, such orders may be matched when the system is unfrozen before the GCC can halt the matching engine. The GCC is authorized to bust trades resulting from such matches if the price of such trades is outside of the No Bust Range at the time that a confirmation of the trades was sent.

588.I. Busting Trades After System Freeze

1. The GCC approves the adjustment.

2. The quantity of the position being reestablished is the same as the quantity of the trade that was busted.

3. In the case of a trade below the actual or implied market price, the adjusted price must be the lowest price that traded at or about the time of the trade without being busted. In the case of a trade above the actual or implied market price, the adjusted price must be the highest price that traded at or about the time of the trade without being busted.

4. The parties to the adjusted trade must report it to the clearing system using a "type 8 transfer" with a "G" transfer code not later than the close of business on the business day after the trade occurred.

When a trade outside of the No Bust Range is busted in accordance with this rule, the parties to the trade may agree voluntarily to reestablish the trade but to adjust its price and make a cash adjustment provided that all of the following conditions are met:

588.H. Voluntary Adjustment of Trade Price

In deciding the claim, the Arbitration Committee may consider, among other factors, the reasonableness of the actions taken by each party and what action the party on the other side of the error trade took before being notified that the trade was being questioned.

arbitration claim will be conducted in accordance with the provisions of Chapter 6 of CME rules. 400 or a person otherwise subject to the Exchange's jurisdiction. If not dismissed, the owner of the account on the other side of the trade is not deemed a Member as defined in Rule 400 or a person otherwise subject to the Exchange's jurisdiction. If not dismissed, the arbitration claim will be conducted in accordance with the provisions of Chapter 6 of CME rules.

owner of the account on the other side of the trade is not deemed a Member as defined in Rule 400 or a person otherwise subject to the Exchange's jurisdiction. If not dismissed, the arbitration claim will be conducted in accordance with the provisions of Chapter 6 of CME rules.

618. CLAIMS REGARDING TRADE CANCELLATIONS OR PRICE ADJUSTMENTS

618.A. General

All claims pursuant to Rule 588.C.3.a. and b. shall be arbitrated in accordance with the specific requirements of Rule 618 and, to the extent not inconsistent with such requirements, the provisions of Chapter 6.

All claims pursuant to Rule 588.C.3.d. shall be arbitrated in accordance with the provisions of Chapter 6. The party alleged to have made the trade that caused the trade bust and the clearing firm through which that trade was placed both may be respondents in such arbitration. If the party alleged to have made the trade that caused the trade bust is not a member subject to arbitration jurisdiction under Chapter 6 and has not voluntarily submitted to arbitration under these rules, the claim may proceed solely against the relevant clearing firm, and that firm shall be liable for any damages awarded by the panel.

618.B. Initiation of Claim

Following any denial of liability by a party responsible for a trade bust or price adjustment and the clearing firm through which the trade was placed as described in Rule 588.D., the dispute shall be referred to arbitration. The Exchange shall administer the arbitration and provide notice to all parties. Any party responsible for a trade bust or price adjustment who is not otherwise subject to arbitration under these rules may voluntarily submit to such arbitration

Within thirty days of completion of the hearing, the panel shall issue a written decision signed by a majority of the arbitrators. The total award for a single incident shall not exceed \$500,000. Except as provided below, the claims shall be limited to out-of-pocket losses. If the claimants' allowable losses exceed \$500,000, the amount awarded to each claimant shall be reduced pro rata so that the total award does not exceed \$500,000. Any award shall be made jointly and severally against the respondents. In the event the panel finds the respondent(s) liable for the full amount of the claim (or the capped amount of \$500,000), the panel shall also award the claimants their costs and attorneys fees incurred in connection with arbitrating the claim. Punitive damage, loss of profits, loss of use, and indirect, incidental or consequential damages shall not be awarded. The decision of a majority of the panel shall be final and may not be appealed. A party may move, within five business days of the award, that the award be corrected or modified to remedy any miscalculation or misdescription or where the award is otherwise imperfect in a matter of form not affecting the merits of the award.

618.E. Award

All claims arbitrable under this rule that arise out of a trade bust or price adjustment caused by the same incident shall be consolidated in a single arbitration.

618.D. Related Claims

The arbitration panel shall consist of three arbitrators appointed by the Exchange, including two members from the Arbitration Committee and one non-member who is not associated with any member of a contract market, or an employee thereof, and is not otherwise associated with a contract market. The Exchange shall designate one of the arbitrators as chairman of the panel.

618.C. Selection and Qualification of Arbitration Panel

by filing an approved submission agreement to the Exchange within 20 days of that party's receipt of notice of the referral to arbitration. In the absence of the voluntary submission to arbitration by such party, the arbitration shall proceed solely against the clearing firm through which the trade was placed.

CME GLOBEX ERROR TRADE POLICY

(Special Executive Report S-2590, December 7, 1992. Revised September 1993; June 1994; November 1995; March 1996; April 1996; May 1996; April 1997; September 1997; April 1998; August 1998; December 1998; March 1999; June 1999; October 1999; April 2000; July 2000; November 2000; November 2001; May 2002; July 2002; September 2002; October 2002; November 2002; January 2003; April 2003; July 2003; September 2003; October 2003; January 2004; June 2004; July 2004; August 2004; September 2004)

A. Policy for Futures Contracts Traded Outside Pit Trading Hours

Part A of the GLOBEX Error Trade Policy applies to futures contracts that are traded on GLOBEX outside pit trading hours. Pit trading hours are those when the contract in question or a comparable contract is traded by open outcry on the CME's trading floor. For example, the pit trading hours for Eurodollar futures are from 7:20 a.m. to 2:00 p.m. (Chicago time).

1. Invoking Error Trade Policy

Any request by market users to invoke the error trade policy must be made to the GLOBEX Control Center ("GCC") as soon as possible and not later than 8 minutes after the trade occurred. Additionally, an employee of the GCC can bring a potential error trade to the GCC's attention. However, the GCC can provide assistance only to firm employees, individual members and clearing member employees who are appropriately registered as Contacts with the GCC. Individuals not so registered including, but not limited to, non-members with GLOBEX access pursuant to Rule 574.C, must contact their clearing member firm to request the error trade policy be invoked. In all cases, if a potential error trade is not brought to the GCC's attention within 8 minutes after the trade occurred, the trade will stand. (See Part D below.)

When a potential error trade is brought to the GCC's attention, it will determine whether the trade price is in the No Bust Range for the particular contract as set forth in the attached GLOBEX Error Trade Tick Range List. In measuring the No Bust Range, the GCC shall determine what the true market price for that contract was immediately before the error trade occurred. In making that determination, the GCC may consider all relevant information, including the last trade price on GLOBEX, a better bid or offer price, a more recent price in a different contract month, the price of the same or a related contract established in open outcry trading, and the prices of related contracts trading in other markets (e.g., cash FX and SIMEX Eurodollars).

2. Trade Price Inside No Bust Range

If the GCC determines that the price of the potential error trade was inside the No Bust Range, then the trade will stand, and no further action will be taken. The trade cannot be busted by agreement of the parties.

3. Trade Price Outside No Bust Range

If the GCC determines that the price of the potential error trade was outside the No Bust Range, then it will send an alert to all keystations and to the quote vendor network indicating that the trade may be an error. The GCC will also attempt to contact all parties to the transaction.

If all parties to the trade agree to bust the trade, and no third party notifies the GCC within 10 minutes from the time the error trade alert message was sent that he or she objects to the trade being busted, then the trade will be busted.

If a party to the trade cannot be contacted or does not agree to bust the trade, or a third party objects to the trade being busted, the GOC will determine if the trade should be busted. Exchange staff will review the circumstances surrounding the transaction to determine whether the trade should be busted. The factors that may be considered by the panel include: the market conditions immediately before and after the trade occurred; the volatility of the market; the prices of related instruments in other markets; whether one or more parties to the trade believe the trade was made at a valid price; and any other factors that the panel deems relevant. The panel shall make its decision as promptly as practicable. The decision of the panel is final.

If the trade is busted, either by agreement of the parties or by Exchange staff, the GOC will cancel the trade and will automatically inform the clearing system that the busted trade is to be removed. The error trade price and any invalid price quotes due to an error trade that is busted will be removed from the Exchange's official record of time and sales.

If the trade is not busted, the parties to the transaction cannot reverse the transaction by using a "type 8 transfer," except as provided in Part D below. The parties to the transaction may not "trade out" of the error trade by entering into a pre-arranged offsetting transaction; provided, however, that a transaction effected in accordance with the Exchange's interpretation entitled "Pre-Execution Discussions Regarding GLOBEX® Trades" is permissible.

4. Contingency Orders Elected by Error Trade

If an error trade is busted, either by agreement of parties or Exchange staff, the GOC will also (a) bust all trades that were triggered as a result of contingency orders being elected by the error trade and (b) cancel all bids and offers that were immediately entered into the system as a result of contingency orders being elected by the error trade. The GOC will notify the clearing firms responsible for the busted trades and the bids or offers that were cancelled so that the original orders can be re-entered into the system.

5. Notice of Final Action

As soon as a decision regarding a questioned trade has been made, the GOC will send a notice to all keystations and to the quote vendor network indicating whether the trade is busted or stands.

B. Policy for Futures Contracts Traded During Pit Trading Hours

The policy for futures contracts traded during pit trading hours is the same as the policy for futures contracts traded outside pit trading hours as set forth in Part A above with the following exceptions:

1. Error trades in futures contracts executed during pit trading hours cannot be busted by agreement of the parties without Exchange staff action.

2. Exchange staff should normally make its decision as to whether a questioned trade should be busted within 15 minutes from the time that the error trade alert message was disseminated by the GOC, although additional time may be needed in exceptional circumstances.

C. Policy for Options and Combination Trades

The policy for options and combination trades is the same as the policy for futures contracts traded outside pit trading hours as set forth in Part A above with the following exceptions:

If all parties to the trade agree to bust the trade, and no third party notifies the GOC within 10 minutes from the time the error trade alert message was sent that he or she objects to the trade being busted, then the trade will be busted. This applies to trade prices inside and outside the No Bust Range and to trades executed during and outside pit trading hours.

Notwithstanding the provisions for busting trades in this Error Trade Policy, error trades consummated pursuant to Rule 585 - GLOBEX Call Market Trading Algorithm stands. A reciprocal trade negating the error shall be consummated by means of a "type 8 position transfer."

D. Policy When Error Trade Not Brought to GOC's Attention Within Time Limit

This Part D applies only to error trades that cannot be busted under Parts A through C above because the error trade was not brought to the GOC's attention within the applicable time limit after the trade occurred. This Part D cannot be used if the price of the error trade is within the No Bust Range for the particular contract as of the time that the trade occurred.

1. Both Parties Agree to Transfer Position

If both parties to the error trade agree, they can transfer the position resulting from the error trade to each other by using a "type 8 transfer." The transfer must use the original trade price and quantity. The parties may also, but are not required to, include a cash adjustment to compensate the other side of the error trade. The parties to such a transfer must report it to the Division of Market Regulation on a form approved by the Exchange.

2. Arbitration of Disputes

In the event that the other side of the error trade does not agree to transfer the position, then the party causing the error trade may file an arbitration claim against the member or clearing member representing the other side. Written notice of such claim must be given to the Exchange not later than the close of business on the business day after the error trade occurred. The arbitration claim will be dismissed if the owner of the account on the other side of the error trade is not a member, clearing member, ETT permit holder, or entity otherwise subject to the Exchange's jurisdiction. If not dismissed, the arbitration will be conducted in accordance with CME Rule 600. In deciding the claim, the Arbitration Committee will consider, among other factors, the reasonableness of the actions taken by each party and what action (e.g., laying off the position in another market) the party on the other side of the error trade took before being notified that the trade was being questioned. The maximum amount that can be recovered in such arbitration is the difference between the error trade price and the true market price for the contract immediately before the error trade occurred, as determined with reference to the factors listed in Part A above.

E. Voluntary Adjustment of Trade Price

When an error trade outside of the No Bust Range is busted in accordance with this Policy, the parties to such trade may agree voluntarily to keep the trade but to adjust its price. This procedure may be used only if all of the following conditions are met:

1. Only the parties who were parties to an error trade that was busted may use this procedure.

2. The quantity of the position being transferred must be the same as the quantity of the error trade that was busted.

3. In the case of an error trade below the true market price, the adjusted price must be the lowest price that traded at or about the time of the error trade without being busted. In the case of an error trade above the true market price, the adjusted price must be the highest price that traded at or about the time of the error trade without being busted.

4. The parties to the adjusted trade must report it to the clearing system using a "type 8 transfer," with a "G" transfer code not later than the close of business on the business day after the error trade occurred. The parties must also report it to the Division of Market Regulation on a form approved by the Exchange.

F. Schedule of Administrative Fees

When an error trade is taken to Exchange staff and busted pursuant to Parts A through C above, the party making the error trade shall pay an administrative fee to the Exchange in accordance with the following schedule. The fee is \$250 for each of the first five occasions that a member or firm made an error trade that was busted by committee action during a calendar year, \$500 for each of the next three occasions during such year, and \$1,000 for each occasion thereafter during such year.

When a party making an error trade is able to have the resulting position transferred pursuant to Part D.1 above, or brings an arbitration claim pursuant to Part D.2 above, such party shall pay an administrative fee to the Exchange in accordance with the following schedule. The fee is \$500 for the first occasion during a calendar year when such action is taken, \$1,000 for the second occasion, and \$2,000 for the third and each subsequent occasion during such year.

G. Busting Trades After System Freeze

In certain types of GLOBEX system failures, it is possible that the matching engine will freeze with live orders in the queue waiting to be matched. When the system is unfrozen, the pending orders can be matched before the G.C.C. can halt the matching engine. The G.C.C. is authorized to bust trades resulting from matches in these circumstances if, and only if, the price of such trades is outside of the No-Bust Range at the time that a confirmation of the trades was sent.
