**RE: CFTC Regulation 40.6(a) Certification. Clarifying Amendments to
CME/CBOT/NYMEX/COMEX Rule 818.C; CME Rules 8G01 and 8H01
COMEX Submission No. 14-477 (5 of 5)**

Dear Mr. Kirkpatrick:

Pursuant to Commission Regulation 40.6(a), Chicago Mercantile Exchange Inc. (“CME”), The Board of Trade of the City of Chicago, Inc. (“CBOT”), New York Mercantile Exchange, Inc. (“NYMEX”) and Commodity Exchange, Inc. (“COMEX”) (collectively, the “Exchanges”) are notifying the Commodity Futures Trading Commission (“Commission” or “CFTC”) that they are adopting clarifying amendments to CME/CBOT/NYMEX/COMEX Rule 818.C (Netting and Offset) and CME Rules 8G01 and 8H01. The proposed effective date for the amendments is November 28, 2014.

Rule 818.C provides for the master netting agreement that applies in the event of a CME Bankruptcy Event (as defined in Rule 818) or default (as described in Rule 818). The proposed amendments clarify that netting will occur separately for each of the proprietary accounts, futures customer accounts, and clearing swap customer accounts of each Clearing Member at the time of close-out. The proposed amendments add sub-clauses to clarify that the relevant account classes will be closed out separately consistent with CFTC Regulations and §4d of the Commodity Exchange Act (“Act” or “CEA”)—Clearing Member’s proprietary, futures customer, and cleared swaps customer account classes will be closed out separately from one another, and cleared swaps customers will be closed out on an individual customer basis. Further, the proposed amendments add a provision clarifying that in the event of Bankruptcy Event that is preceded by (or occurs simultaneously with) a limited recourse event in Interest Rate Swaps (“IRS”) and Credit Default Swaps (“CDS”), the amount of any variation margin haircut that is applied as a result of the limited recourse Rules (CME Rule 8G802.B for IRS and CME Rule 8H802.B for CDS) will not be available for netting with losses from products subject to other financial safeguards under Rule 818.C.

CME is also amending Rules 8G01 and 8H01 to further clarify that Rule 818 (Close-Out Netting) will apply for all products in the event of a CME Bankruptcy Event or default and will not be superseded by the conflict of rules provisions of Rules 8G01 and 8H01, respectively.

The Exchanges reviewed the derivatives clearing organization (“DCO”) core principles (“Core Principles”) and the designated contract market (“DCM”) core principles, as set forth in the CEA, and identified the following Core Principles as potentially impacted:

DCO Core Principles

- *Treatment of Funds* – The proposed amendments comport with Core Principle F (Treatment of Funds) by maintaining the segregation of different account classes by clarifying that they separately net in the event of a Bankruptcy Event or default; existing account classes will be

preserved, and Clearing Members will be closed out based on their respective account class (i.e., proprietary, futures and cleared swaps).

- *Legal Risk Considerations* – These amendments comport with Core Principle R (Legal Risk) by clarifying the legal netting procedures that occur in the event of a CME insolvency that is preceded by (or occurs simultaneously with) a limited recourse event in IRS and CDS, the amount of any variation margin haircut that is applied as a result of such limited recourse Rules will not be available for netting with losses from other financial safeguards under Rule 818.C.

DCM Core Principle

- *Availability of General Information* – The Exchanges certify that this submission will be posted on the CME Group website.

The text of the amendments is attached, with deletions ~~overstruck~~ and additions underlined.

The Exchanges certify that the amendments comply with the CEA and regulations promulgated thereunder. No substantive opposing views regarding these proposed rule amendments were expressed to the Exchanges.

The Exchanges certify that this submission has been concurrently posted on its website at <http://www.cmegroup.com/market-regulation/rule-filings.html>.
