Submission No. 20-164
December 2, 2020

Mr. Christopher J. Kirkpatrick
Secretary of the Commission
Office of the Secretariat
Commodity Futures Trading Commission
Three Lafayette Centre
1155 21st Street, NW
Washington, DC 20581

Re: Weekly Notification of Rule Changes
Submission Pursuant to Section 5c(c)(1) of the Act and Regulation 40.6 (d)

Dear Mr. Kirkpatrick:

Pursuant to Section 5c(c)(1) of the Commodity Exchange Act, as amended, and Commission Regulation 40.6(d), ICE Futures U.S., Inc. (“Exchange”) submits notification to the Commission that, during the preceding week, the Exchange amended the Trade At Settlement (TAS) Frequently Asked Questions (FAQ) document on its website. In accordance with Exchange Rule 4.17, the Exchange has made TAS trades available for the first 25 listed contract months in Henry Hub futures. All other aspects of the FAQ remain unchanged. The amendments to the document are provided in Exhibit A.

If you have any questions or need further information, please contact me at 312-836-6745 or at patrick.swartz@theice.com.

Sincerely,

A handwritten signature in black ink, appearing to read 'Patrick Swartz', is written over a light gray signature line.

Exhibit A

**TRADE AT SETTLEMENT (TAS)
FREQUENTLY ASKED QUESTIONS**

[~~July 2020~~]November 2020

ICE Futures U.S. (IFUS) allows Trade At Settlement (TAS) trades for certain futures contracts traded on the ICE electronic trading platform. This document is meant to provide information concerning TAS orders and TAS trading.

WHAT IS TAS?

TAS is a capability that allows a trader to enter an order to buy or sell an eligible futures contract during the course of the trading day at a price equal to the settlement price for that contract, or at a price up to five ticks (minimum price fluctuations) above or below the settlement price. (Note that there is an exception for Henry Hub futures only, for which the permitted TAS bid/offer and trading range is up to and including 100 ticks above and below the settlement price.)

Examples:

For Cotton No. 2[®] futures, the minimum price fluctuation is .01 cents per pound. A cotton trader may enter a TAS order at a price of 0, which means the trader wants to trade at the settlement price, or at +.01,+.02 or up to as much as +.05 above the settlement price, or at -.01, -.02, or down to as much as -.05 below the settlement price.

For Frozen Concentrate Orange Juice (FCOJ) futures the minimum price fluctuation is .05 cents per pound. A trader may enter an order for a TAS trade at a price of 0 (which would mean the trader wanted to trade at the settlement price), or at +.05, +.10, or up to as much as +.25 above the settlement price, or at -.05, -.10, or down to as much as -.25 below the settlement price.

TAS buy and sell orders are matched on a first-in, first-out basis. After a TAS trade is matched, each TAS transaction receives a trade price equal to, or up to five ticks above or below, the Exchange's daily settlement price for the respective futures contract month.

WHEN ARE CONFIRMATIONS RECEIVED FOR TAS TRADES?

TAS trades are confirmed when TAS bids and offers match. A confirmation of a TAS trade indicates that a trade has been executed at the settlement price (0), or at the agreed tick interval above or below the settlement price.

WHEN CAN TAS ORDERS BE ENTERED?

TAS buy and sell orders may be entered from the start of the pre-open period for the respective product through the end of the [futures contract settlement window](#) each day.

ARE THERE ANY RESTRICTIONS ON WHO IS ELIGIBLE TO EXECUTE A TAS TRADE?

No, any market participant is eligible to enter a TAS order and to execute a TAS trade.

WHAT CONTRACTS ARE ELIGIBLE FOR TAS TRADING?

Agricultural Contracts

Cocoa (CC)
Coffee “C”[®] (KC)
Cotton No. 2 (CT)
Frozen Concentrated Orange Juice (OJ)
Sugar No. 11[®] (SB)
Canola (RS)

Stock Index Contracts

NYSE FANG+[™] Index Futures (FNG)
MSCI EAFE Index Futures (MFS)
MSCI Emerging Markets Index Futures (MME)

Currency Index and Currency Pair Contracts

U.S. Dollar Index[®] (“USD[®]”)
Australian dollar/US Dollar (KAU)
Brazil Real/US Dollar (KBX)
British Pound/US Dollar (MP)
Euro/British Pound (KGB)
Euro/Japanese yen (KEJ)
Euro/Norwegian krone (KOL)
Euro/Swedish krona (KRK)
Euro/Swiss franc (KRZ)
Euro/US Dollar (KEO)

Metals Contracts:

100 oz. Gold Futures (ZG)
Mini Gold Futures (YG)
5000 oz. Silver Futures (ZI)
Mini Silver Futures (YI)

Energy Contracts:

Henry LD1 Fixed Price Future (H)

Digital Currency Contracts

Bakkt[™] Bitcoin (USD) Monthly Futures

WHAT CONTRACT MONTHS ARE ELIGIBLE FOR TAS TRADING?

For each TAS-eligible contract there is a pre-set number of contract months that are eligible for TAS trading on any day. Those numbers are:

for Cocoa, Coffee “C”, Frozen Concentrated Orange Juice and U.S. Dollar Index futures,
the first three listed contract months;
for Cotton No. 2 futures, the first five contract months;.

for Sugar No. 11 and NYSE FANG+ futures, the first four contract months.
for 100 oz. and Mini Gold futures, the first three contract months in the February, April, June, August, October and December contracts only;
for 5000 oz. and Mini Silver futures, the first three contract months in the January, March, May, July, September and December contracts;
for Bakkt™ Bitcoin (USD) Monthly futures, the first contract month;
for currency pair, MSCI EAFE Index and MSCI Emerging Markets Index futures, the front two listed contract months and
for Henry Hub futures, the first ~~24~~ 25 listed contract months.

Note that for the agricultural contracts and metals contracts shown above, once a futures contract month has gone into its Notice Period the contract is no longer eligible to be traded via TAS (outright or as a spread). For the currency, energy, and MSCI stock index contracts shown above, the front contract month remains eligible to be traded via TAS (outright and spread) through and including its last trading day. For the NYSE FANG+ stock index contracts and the Bakkt Bitcoin (USD) Monthly futures contract, the front contract month remains eligible to be traded via TAS (outright and spread) through and including the business day prior to the last trading day of the futures contract.

WHAT ABOUT TAS SPREAD TRADES?

TAS spread trading is enabled for all contracts for which TAS trading is offered.

WHAT SPREAD PAIRS ARE ELIGIBLE FOR TAS TRADING?

TAS spread trading is enabled for all spread pairs in which outright TAS trading is offered

AT WHAT PRICES CAN TAS SPREADS BE TRADED?

TAS spread trades can be executed at the spread differential between the daily settlement prices for the respective futures contract months, or up to five ticks above and below that spread differential. The sole exception to this is Henry Hub futures, for which the maximum spread differential is 100 ticks above and below the respective spread differential.

WHAT IS THE SPREAD CONVENTION FOR TAS SPREADS?

The spread convention for TAS spreads is identical to the regular calendar spread convention for the particular product. That is, if the calendar spread convention for a product on the platform means that the spread buyer is buying the front month/selling the back month, this same convention will apply to TAS spreads for the product.

For ICE Futures US products, two different calendar spread conventions are followed.

For the Agricultural Contracts, Metal Contracts and Henry Hub Contracts, buying the spread means buying the front month/selling the back month.

For the Currency Index and Currency Pair Contracts and Stock Index Contracts, buying the spread means buying the back month/selling the front month.

HOW ARE TAS SPREAD LEGS PRICED?

Like TAS outright trades, the prices of TAS spread legs are set after the daily settlement prices for the respective contracts are determined after the end of the settlement window for the respective product.

For TAS spreads done at a price of zero (“at the settlement difference”), each leg of the TAS is priced at the settlement price of the respective futures contract in the spread.

For TAS Spreads done at one or two or up to five ticks above/below the settlement, the leg prices are set as follows:

Front Month – price is set at the settlement price for the respective contract;

Back Month – price is set at the settlement price for the respective contract plus the TAS spread trade price (which can be a positive number or a negative number).

NOTE: For Cotton No. 2 futures contracts only, on a day on which either or both legs of the TAS spread settles at the contract’s daily trading limit up or down, the leg price of the back month of the TAS spread is determined by the Exchange using the prices of trades done for that Calendar Spread during the settlement period, rather than using the settlement price of that contract month.

WHAT IS THE POLICY REGARDING TAS TRADES IN LIMIT UP/DOWN MARKETS?

IFUS allows TAS trading in several futures contracts that are subject to daily trading limits: Cotton No. 2, Canola and FCOJ-A futures. During the course of the TAS trading day for these products, TAS trades may be matched at a range of TAS +5 ticks to TAS -5 ticks, and the specific contract month may settle at limit up or limit down. In such instances, the matched TAS trades stand, notwithstanding the fact that this futures contract month settles at its limit up or down price.

For example, suppose on Day 1 the May 2018 Cotton No. 2 futures contract has settled at a price of 93.00, and that on Day 2 TAS trades have been matched in the platform at a price of +.05, or five minimum ticks above the settlement price. If on Day 2 the May contract settles at a limit up price of 97.00, the TAS trades at a price of +.05 stands, despite fact that the clearing price of 97.05 exceeds the limit up price of 97.00 on that trading day.
