**Re: Delisting of Various Physical Environmental Futures and Options Contract Months -
Submission Pursuant to Section 5c(c)(1) of the Act and Regulation 40.6(a)**

Dear Mr. Kirkpatrick:

Pursuant to Section 5c(c)1 of the Commodity Exchange Act, as amended (the “Act”) and Commodity Futures Trading Commission (“Commission”) Regulation 40.6(a), ICE Futures U.S., Inc. (“Exchange”) submits notice to the Commission that, effective as of the close of business today, February 22, 2019, the Exchange will delist the contract months and strikes in the “named vintage” Physical Environmental futures and options contracts set forth in Exhibit A (collectively the “Contracts”). None of the Contracts being delisted have open interest.

The Contracts are being delisted in connection with the Exchange’s plan to consolidate open interest in certain Physical Environmental futures and options contracts. Currently, the Exchange lists a suite of named vintage and a corresponding suite of continuous vintage futures and options which call for delivery of the same renewable energy or solar renewable energy certificates. The two suites of contracts are essentially the same, all economic terms and conditions of the named vintage futures and options are identical to the economic terms and conditions of the corresponding expiration month of the continuous vintage future or option. In order to simplify our product offering, the Exchange intends to consolidate open interest into a single suite and will migrate open interest in the named vintage contracts to the equivalent continuous vintage contracts later this year (a separate filing will be submitted by the Exchange in accordance with Commission Regulation 40.6).

To limit the number of contracts that have to be consolidated, all named vintage contracts which have no open interest are being delisted in advance of the migration. Further, the Exchange will not list any additional expiration months for the Contracts.
