Re: CFTC Regulation 40.6(a) Certification. Notification Regarding Amendments to NYMEX Rule 589. ("Special Price Fluctuation Limits") for the Henry Hub Natural Gas Futures and all Related Associated Contracts. NYMEX Submission No. 20-166

Dear Mr. Kirkpatrick:

New York Mercantile Exchange, Inc. ("NYMEX" or "Exchange") is notifying the Commodity Futures Trading Commission ("CFTC" or "Commission") that it is self-certifying amendments to NYMEX 589. ("Special Price Fluctuation Limits") for the Henry Hub Natural Gas Futures contract and Related Associated Products (the "Contracts") as noted below effective on Sunday, April 5, 2020 effective for trade date Monday, April 6, 2020.

CONTRACT TITLE	RULEBOOK CHAPTER	COMMODITY CODE	PRIMARY/ ASSOCIATED	ASSOCIATED WITH
Henry Hub Natural Gas Futures	220	NG	Primary	Primary
E-mini Natural Gas Futures	402	QG	Associated	NG
Henry Hub Natural Gas Look-Alike Penultimate Financial Futures	824	HP	Associated	NG
Henry Hub Natural Gas Look-Alike Last Day Financial Futures	823	HH	Associated	NG
Henry Hub Natural Gas Last Day Financial Futures	508	NN	Associated	NG
Henry Hub Natural Gas Last Day Financial Futures	508	NNE	Associated	NG

Specifically, the Exchanges are increasing the special price fluctuation limits from 7% to 15% in light of recent market volatility. These changes are intended to reduce market interruptions and ensure fair and orderly trading to help preserve liquidity in the Contracts which are subject to NYMEX Rule 589. ("Special Price Fluctuation Limits").

For your convenience, a copy of NYMEX Rule 589. appears in Exhibit A. The applicable levels are set forth in the Special Price Fluctuation Limits and Daily Price Limits Table (the "Table") in the Interpretations Section at the end of Chapter 5 ("Trading Qualifications and Practices") of the NYMEX Rulebook.

The amendments to the Table are provided in blackline format in Exhibit B attached under separate cover.

The Exchange reviewed the designated contract market core principles (“Core Principles”) as set forth in the Commodity Exchange Act (“CEA” or the “Act”) and identified that the change may have some bearing on the following Core Principles:

Prevention of Market Disruption: The Exchange is amending the special price fluctuation limits to maintain an orderly market and allow efficient price discovery and risk transfer.

Availability of General Information: The change will be communicated to the marketplace via the issuance of a CME Group Special Executive Report. The SER will be distributed via email to subscribers of these publications in addition to being posted publicly on the CME Group website.

The Exchange hereby certifies that the amendments comply with the Act and regulations thereunder. There were no substantive opposing views to this proposal.

The Exchange certifies that this submission has been concurrently posted on the Exchange’s website at <http://www.cmegroup.com/market-regulation/rule-filings.html>.

If you have any questions regarding this submission, please contact me at 212.299.2200 or via email at CMEGSubmissionInquiry@cmegroup.com.

Sincerely,

/s/ Christopher Bowen
Managing Director and Chief Regulatory Counsel

Exhibit A

NYMEX Rulebook Chapter 5 ("Trading Qualifications and Practices")

* * *

589. SPECIAL PRICE FLUCTUATION LIMITS

The special price fluctuation limits, including dynamic price fluctuation limits, applicable to those contracts with such limits are set forth in the Special Price Fluctuation Limits and Daily Price Limits Table ("Table") in the Interpretations Section at the end of Chapter 5.

589.A. Initial Price Fluctuation Limits for All Contract Months

At the commencement of each trading day, there shall be initial price fluctuation limits in effect for each futures contract month of the primary futures contract (as identified in the Table) above or below the previous day's settlement price for such contract month set at the first special price fluctuation limit level as provided in the Table.

589.B. Triggering Events and Temporary Trading Halts

1. First Triggering Event and Temporary Trading Halt

If the lead contract month (as identified by the Exchange) of the primary futures contract is bid or offered via Globex at the upper or lower price fluctuation limit at the first special price fluctuation limit level, as applicable, it will be considered a triggering event that will begin a two (2) minute monitoring period in the lead contract month. If, at the end of the two (2) minute monitoring period, the lead contract month of the primary futures contract is not bid or offered at the applicable special price fluctuation limit, the special price fluctuation limits shall be expanded an additional increment above and below the previous day's settlement price for all contract months of the primary futures contract and all contract months of associated products of the primary futures contract as provided in the Table. If, however, at the end of the two (2) minute monitoring period, the lead contract month of the primary futures contract is bid or offered at the applicable special price fluctuation limit, a two (2) minute temporary trading halt will commence in all contract months of the primary futures contract and in all contract months of associated products of the primary futures contract as provided in the Table. In addition, trading in any associated product that is an option related to the primary futures contract or in an option contract related to any other associated product of the primary futures contract that may be available for trading on Globex shall be subject to a coordinated temporary trading halt.

2. Expansion of Limits Following Temporary Trading Halt

Following the end of a temporary trading halt, the affected markets shall re-open simultaneously in all contract months of the primary futures contract and in all contract months of associated products of the primary futures contract. When trading resumes, the special price fluctuation limits shall be expanded an additional increment above and below the previous day's settlement price for all contract months of the primary futures contract and all contract months of associated products of the primary futures contract as provided in the Table.

In each instance in which a triggering event occurs, a two (2) minute monitoring period will commence as provided in Section B.1. of this Rule. In each instance, the special price fluctuation limits shall be expanded by an additional increment above and below the previous day's settlement price for all contract months of the primary futures contract and all contract months of associated products of the primary futures contract as provided in the Table. Following the fourth triggering event on a trading day, there shall be no further special price fluctuation limits.

3. Metals Contracts

For certain Metals contracts, as designated in the Table, the GCC shall designate a lead primary contract month for purposes of this Rule. Additionally, an expiring contract month of a primary futures contract shall have no special price fluctuation limits from the contract's first position day through its last delivery day.

On each trading day, there shall be no temporary trading halts or expansion of special price fluctuation limits in the primary futures contract or in any associated products of the primary futures contract during

the five (5) minutes preceding the end of the primary futures contract's settlement price determination period. If a triggering event occurs during this five (5) minute period, trading will continue with the current price limit in effect until the conclusion of the five (5) minute period, at which time a monitoring period, temporary trading halt or special price fluctuation limit expansion, as applicable, will occur.

On each trading day, there shall be no temporary trading halts or expansion of special price fluctuation limits in the primary futures contract or in any associated products of the primary futures contract during the five (5) minute period preceding the close of trading. If a triggering event occurs during this five (5) minute period, trading will continue with the current price limit in effect until the close of trading.

589.C Dynamic Price Fluctuation Limits

At the commencement of each trading day, the subject contracts, as designated in the Table, shall be assigned a price limit variant which shall equal a percentage of the prior trading day's Exchange-determined settlement price, or a price deemed appropriate by the GCC, ("dynamic variant"). During the trading day, the dynamic variant shall be applied in rolling 60-minute look-back periods to establish dynamic lower and upper price fluctuation limits as follows:

- (a) the dynamic variant shall be subtracted from the highest trade and/or bid price during a look-back period to establish the lower price fluctuation limit, i.e., trade and/or offer, and
- (b) the dynamic variant shall be added to the lowest trade and/or offer price during a look-back period to establish the upper price fluctuation limit, i.e., trade and/or bid.

1. Triggering Events and Temporary Trading Halts

If the lead contract month (as identified by the Exchange) of the primary futures contract is traded, bid or offered via Globex through the lower or upper dynamic price fluctuation limits, it shall be considered a triggering event which shall begin a two (2) minute temporary trading halt in all contract months of the primary futures contract and in all contract months of associated products of the primary futures contract as provided in the Table. If a non-lead contract month of the primary futures contract or associated futures contract is traded, bid or offered via Globex through the lower or upper dynamic price fluctuation limits, it shall be considered a triggering event which shall begin a two (2) minute temporary trading halt for that non-lead contract month of the primary contract or associated futures contract.

2. Limits Following Temporary Trading Halt

Following the end of a temporary trading halt triggered by the lead month, the affected markets shall re-open simultaneously at the indicative opening price as determined by the Exchange in all contract months of the primary futures contract and in all contract months of the associated contracts of the primary futures contract as provided in the Table. When trading resumes, the dynamic lower and upper price fluctuation limits shall be recalculated as described above. Likewise following the end of a temporary trading halt triggered by a non-lead month or associated futures contract, the affected market shall re-open at the indicative opening price as determined by the Exchange and the dynamic lower and upper price fluctuation shall be recalculated as described above.

3. Additional Characteristics

On each trading day, should there be a triggering event in the lead contract month of the primary futures contract during such contract's settlement determination period, there shall be a (5) five second temporary trading halt in all contract months of the primary futures contract and in all contract months of associated products of the primary futures contract as provided in the Table. If a non-lead contract month of the primary futures contract, or any contract month of an associated product of the primary futures contract, experiences a triggering event during the primary futures contracts settlement determination period, there shall be a (5) five second temporary trading halt for that non-lead contract month or that contract month of an associated product of the primary contract.

On each trading day, should there be a triggering event in the lead contract month of the primary futures contract during the (2) two-minute period preceding the close of trading, there shall be a (5) five second temporary trading halt in all contract months of the primary futures contract and in all contract months of associated products of the primary futures contract as provided in the Table. If a non-lead contract month of the primary futures contract, or any contract month of an associated product of the primary futures contract, experiences a triggering event during the (2) two-minute period preceding the close of trading of the primary futures contract, there shall be a (5) five second temporary trading halt for that non-lead contract month or that contract month of an associated product of the primary contract.
