Mr. Christopher J. Kirkpatrick Office of the Secretariat Commodity Futures Trading Commission Three Lafayette Centre 1155 21st Street, N.W. Washington, D.C. 20581

Re: CFTC

CFTC Regulation 40.6(a) Certification. Notification Regarding Amendments to the Option Exercise and Assignment Rule for Thirteen (13) Foreign Exchange ("FX") Dollar-Based

Option Contracts.

CME Submission No. 20-139

Dear Mr. Kirkpatrick:

Chicago Mercantile Exchange Inc. ("CME" or "Exchange") is certifying to the Commodity Futures Trading Commission ("CFTC" or "Commission") amendments to the option exercise and assignment rule (the "Rule Amendments") of thirteen (13) Foreign Exchange ("FX") dollar-based option contracts (the "Contracts") as noted in Table 1 below effective Sunday, April 19, 2020, for trade date Monday, April 20, 2020.

CME calculates and publishes fixing prices at 10:00 a.m. Eastern Time for the Contracts. CME is increasing the number of sales to calculate the fixing for Tier 1 trades from three (3) to twenty (20) sales for the Contracts traded via open outcry,¹ the CME Globex electronic trading platform and for submission for clearing via CME ClearPort. The Exchange is implementing the amendments to broaden ithe use of substantive available market data when setting the currency fixing price for the Contracts.

In addition, for the FX dollar-based option contracts as noted in Table 2 below, the fixing methodology will be modified and thus if there are less than 20 trades the fixing will be derived from quote vendor spot rates and forward points given their lower levels of liquidity (collectively, the "Rule Amendments").

Amendments to the rulebook chapters are provided in Exhibit A below in blackline format.

The Exchange reviewed the designated contract market core principles ("Core Principles") as set forth in the Commodity Exchange Act ("Act" or "CEA") and identified that the Rule Amendments may have some bearing on the following Core Principles:

Core Principle 7 – Availability of General Information Market participants have been advised of the Rule Amendments via a Special Executive Report ("SER"). The SER is also available on the CME Group website.

Core Principle 9 – Execution of Transactions

The Rule Amendments will promote CME market efficiency for the Contracts. These changes will not impede CME's ability as a designated contract market to provide a competitive, open, and efficient market mechanism for executing transactions that protects the price discovery and physical delivery processes of the Contracts, insofar as they increase the robustness of the currency fixing price for the Contracts.

Pursuant to Section 5c(c) of the Act and CFTC Regulation 40.6(a), CME hereby certifies that the Rule Amendments comply with the Act and rules thereunder. There were no substantive opposing views to this proposal.

CME certifies that this submission has been concurrently posted on the Exchange's website at http://www.cmegroup.com/market-regulation/rule-filings.html.

Should you have any questions concerning the above, please contact the undersigned at (212) 299-2200 or CMEGSubmissionInquiry@cmegroup.com.

Sincerely,

/s/ Christopher Bowen
Managing Director and Chief Regulatory Counsel

Attachment: Appendix A – Amendments to CME Product Rulebook Chapters (blackline format)

APPENDIX A

CME Rulebook

(additions underlined; deletions struck through)

Chapter 251A Options on British Pound /U.S. Dollar (GBP/USD) Futures

* * *

251A02. EXERCISE AND ASSIGNMENT

* * *

251A032.A.1. [Reserved]

251A032.A.2. [Reserved]

251A032.A.3. Exercise of Options

All in-the-money options are automatically exercised by the Clearing House on the day of expiration for the option. All out-of-the-money options are abandoned by the Clearing House on the day of expiration for the option. To determine whether an option is in or out of the money on this day, the Exchange shall calculate the relevant "CME currency fixing price" from GLOBEX-traded underlying futures contracts as follows:

Tier 1 Take the 60-second average of sale (trade) prices, weighted by volume from 8:59:00 to 8:59:59 a.m. on the day of determination of the CME currency fixing price.

Tier 2 If less than three twenty or no sales (trades) occurred during the 60-second interval noted above, take the midpoint of each bid & ask spread where available and average the resulting midpoints over the 60-second interval.

Tier 3 If no sales (trades) and no bid and ask prices occurred during the 60-second interval, then Exchange staff shall derive the CME currency fixing price (as a synthetic futures price) from quote vendor spot rates and appropriate maturity forward points.

An option is in-the-money if the fixing price of the underlying futures contract lies above I to the exercise price in the case of a call, or lies below the exercise price in the case of a put.

251A032.B. Assignment

[Remainder of Rule unchanged]

Chapter 252A Options on Canadian Dollar/U.S. Dollar (CAD/USD) Futures

252A02. EXERCISE AND ASSIGNMENT

* * :

252A032.A.1. [Reserved]

252A032.A.2. [Reserved]

252A032.A.3. Exercise of Options

All in-the-money options are automatically exercised by the Clearing House on the day of expiration for the option. All out-of-the-money options are abandoned by the Clearing House on the day of expiration for the option. To determine whether an option is in or out of the money on this day, the Exchange shall calculate the relevant "CME currency fixing price" from GLOBEX-traded underlying futures contracts as follows:

Tier 1 Take the 60-second average of sale (trade) prices, weighted by volume from 8:59:00 to 8:59:59 a.m. on the day of determination of the CME currency fixing price.

Tier 2 If less than three twenty or no sales (trades) occurred during the 60-second interval noted above, take the midpoint of each bid & ask spread where available and average the resulting midpoints over the 60-second interval.

Tier 3 If no sales (trades) and no bid and ask prices occurred during the 60-second interval, then Exchange staff shall derive the CME currency fixing price (as a synthetic futures price) from quote vendor spot rates and appropriate maturity forward points.

An option is in-the-money if the fixing price of the underlying futures contract lies above or is equal to the exercise price in the case of a call, or lies below the exercise price in the case of a put.
