**Re: Listing of New Cash Settled Currency Futures Contracts -
Submission Pursuant to Section 5c(c)(1) of the Act and Regulation 40.2 and 40.6(a)**

Dear Mr. Kirkpatrick:

Pursuant to Section 5c(c)(1) of the Commodity Exchange Act, as amended, and Commission Regulation 40.2, ICE Futures U.S., Inc. (“Exchange”) submits by written certification the amendments to Rules 16.01-16.04, 6.24, 27.18 , as well as the Exchange’s Block Trade FAQ and Notice on No Cancellation Ranges, Reasonability Limits, Interval price Limits and Calendar Spread Limit Order levels, attached as Exhibits A and B. The amendments provide for five new physical delivery futures contracts on the following currency pairs: Israeli Shekel-US Dollar, Polish zloty- Euro, Polish zloty-US dollar, Turkish lira-Euro and Turkish lira-US dollar. Key terms of the new futures contracts are shown below and full specifications are set forth in Exhibit C:

<u>Futures Contract</u>	<u>Contract Size</u>	<u>Pricing</u>	<u>Min Tick</u>	<u>Value of Min Tick</u>
Israeli Shekel-US Dollar	1,000,000 Shekel	dollars per shekel, to 6 decimals	0.000005	\$ 5.00
Polish zloty-Euro	500,000 zloty	euro per zloty, to 5 decimals	0.00001	€ 5.00
Polish zloty-US Dollar	500,000 zloty	dollars per zloty, to 5 decimals	0.00001	\$ 5.00
Turkish lira-Euro	500,000 lira	euro per lira, to 5 decimals	0.00001	€ 5.00
Turkish lira-US Dollar	500,000 lira	dollars per lira, to 5 decimals	0.00001	\$ 5.00

The new contracts will be listed for trading on January 12, 2015 alongside the existing physical delivery currency pair futures contracts of the Exchange, commencing with the March 2015 delivery month. They will also be subject to the same contract month listing cycle, trading hours, first and last trading day, block trading and EFRP trading provisions as the existing contracts. For each of the new contracts, the spot month position limit has been set at 2,000 contracts and the position accountability level for any one month and for all months combined is 6,000 contracts. The contracts will be available for trading on the ICE Platform Sunday through Friday 8:00PM through 5:00PM¹, New York Time. The No Cancellation Range, Reasonability Limit and Interval Price Limit levels have been set at levels similar to those of the existing currency futures contracts, and will be reflected in an updated Exchange notice, a draft of which is contained in Exhibit B to this submission. All of the contracts have a block trade minimum quantity of 5 contracts, which is consistent with the current block trade size for all other currency pair contracts listed by the Exchange. These block levels are reflected in changes to the Exchange's Block Trade FAQ, which is contained in Exhibit B.

Physical Delivery Terms:

The proposed new Shekel futures contract will utilize the delivery procedures of the existing futures contracts involving CLS currencies, since the Shekel is a CLS currency.

Because the Polish zloty and Turkish lira are not CLS currencies, the four futures contracts based on these currencies will utilize the delivery procedures used for the existing futures contracts on other non-CLS currencies (that is, pairs that include the Hungarian forint and the Czech koruna). However, the optional use of Directives to Pay (or "DTP") that is currently in place will not be available for the new contracts because the DTP alternative is being eliminated for all contracts commencing with the March 2015 delivery. Accordingly final settlement will be made by clearing members depositing the appropriate amount of the relevant currency into the ICE Clear U.S. settlement bank on the day prior to the delivery date for the expiring contract.

Israeli Shekel-US Dollar Futures

This contract will have a size of 1 million Shekel which equates to approximately US\$255,000 notional value at the current exchange rate. The listing cycle will consist of six months in the March quarterly cycle and the final settlement price is based on the Shekel-US Dollar spot exchange rate disseminated at 10:16 a.m. on the last trading day.

Polish Zloty-Euro/USD Futures

This contract will have a size of 500,000 Zloty, which equates to approximately \$146.666 and €117,000 notional value, respectively, at the current exchange rate. The listing cycle will consist of six months in the March quarterly cycle. The final settlement price for the Zloty/Dollar is based on the spot exchange rate disseminated at 10:16 a.m. on the last trading day, and the

¹ Sunday evening trading opens at 6:00PM, New York Time.

final settlement for the Zloty/Euro is calculated by dividing the final settlement price in the corresponding Zloty/Dollar by the final settlement of the Euro/US Dollar contract and rounding to the nearest tradable tick.

Turkish Lira-Euro/USD Futures

This contract will have a size of 500,000 Turkish Lira, which equates to approximately \$214,500 and €173,600 notional value, respectively, at the current exchange rate. The listing cycle will consist of six months in the March quarterly cycle. The final settlement price for the Turkish Lira/US Dollar is based on the spot exchange rate disseminated at 10:16 a.m. on the last trading day. That price is divided by the final settlement price of the Euro/US Dollar contract and rounded to the nearest tradable tick to derive the final settlement price of the Turkish Lira-Euro.

Certifications

The Exchange certifies that the amendments related to the listing of these contracts comply with the requirements of the Commodity Exchange Act and the rules and regulations promulgated thereunder. The Exchange has reviewed the designated contract market core principles ("Core Principles") as set forth in the Commodity Exchange Act and has determined that the listing of the new contracts complies with the following relevant Core Principles:

COMPLIANCE WITH RULES

The terms and conditions of the new contracts are set forth in Rules 16.01-16.04, 6.24 and 27.18 as well as Exchange Notices and FAQs and will be enforced by the Exchange. In addition, trading of the new contracts is subject to all relevant Exchange rules which are enforced by the Market Regulation Department.

CONTRACTS NOT READILY SUBJECT TO MANIPULATION

The new contracts should not be readily subject to manipulation as the final settlement price is based on readily available spot market quotations and there are liquid markets in these currencies.

POSITION LIMITS OR ACCOUNTABILITY

The Exchange has set spot month position limits and all other months combined accountability levels which are consistent with similar, physically delivered currency futures contracts listed by the Exchange.

The Exchange is not aware of any substantive opposing views expressed by members or others with respect to the amendments and certifies that, concurrent with this filing, a copy of this submission was posted on the Exchange's website and may be accessed at (<https://www.theice.com/notices/RegulatoryFilings.shtml>).
