 Washington, D.C. 20581

**Re: CFTC Regulation 40.2(a) Certification. Initial Listing of One-Hundred and Forty-Four (144) Season Strip Weather Futures and Options Contracts.  
 CME Submission No. 24-141 (120 of 144)**

Dear Mr. Kirkpatrick:

Chicago Mercantile Exchange Inc. (“CME” or “Exchange”) certifies to the Commodity Futures Trading Commission (“CFTC” or “Commission”) the initial listing of one-hundred and forty-four (144) CME Seasonal Strip Index futures and options contracts (collectively, the “Contracts”) for trading on the CME Globex electronic platform (“CME Globex”) and for submission for clearing via CME ClearPort. There will be four (4) effective dates as set forth below.

(1) Effective: Sunday, June 2 for trade date Monday, June 3, 2024

## Section 2: Price Reporting Agency

The official weather data that is used to settle our contracts is published by government weather agencies and then supplied to us from Speedwell Settlement Services Ltd. (“SSS”). In the case of the United States, the National Weather Service (“NWS”), Federal Aviation Administration (“FAA”), the Department of Defense (“DoD”), and the National Oceanic and Atmospheric Administration (“NOAA”) are responsible for the measurement, recording and issuance of the data. Weather stations used for CME weather contracts are located at major airports or government owned properties having 24 hour/365 day security measures in place to insure the accuracy of the data being reported. Similar to the US, European and Asian governments have implemented similar systems and collect the data in the same way, with the same authority and oversight.

These weather stations serve a vital function to air traffic safety around the world. Data readings from these stations are used to determine such things as flying and de-icing conditions. Therefore, the accuracy and security of these instruments are a high priority for these government agencies. Instrument placement is usually out on the property in remote secure locations, so as not to be affected by jet engine or tarmac heat radiation and most importantly human tampering.

### Settlement Data

Raw Data Weather Elements that have been processed to produce Certified Data, and when needed, Calculated Data.

### Data Certification

Data Certification involves the process of detecting data problems (Gross Errors and Missing Data) and then correcting those problems by removing and replacing problem values with Estimated Values.

As weather data is being released, a number of weather data suppliers are monitoring the data for any unusual readings. If a reading were to be an outlier or missing it would be reported to the issuing agency to verify for accuracy and/or correction. Weather data suppliers, such as SSS, not only monitor the specific CME weather locations, but also surrounding weather stations. They use surrounding weather stations as one means to verify for the accuracy of data being issued by the reporting agency. SSS is an industry leader in weather-related data to the futures and over-the-counter (“OTC”) markets.

### Section 3: Compliance with Core Principles

The Exchange reviewed the designated contract market core principles (“Core Principles”) as set forth in the Commodity Exchange Act (“CEA” or “Act”) and identified that the following Core Principles may be impacted by this initiative as follows:

- **Compliance with Rules:** Trading in the Contracts will be subject to all CME Rules, including prohibitions against fraudulent, noncompetitive, unfair and abusive practices as outlined in CME Rule Chapter 4, the Exchange’s trade practice rules, the majority of which are contained in Chapter 5 and Chapter 8 of the CME Rulebook, and the dispute resolution and arbitration procedures of CME Rule Chapter 6. As with all products listed for trading on one of CME Group’s designated contract markets, trading activity in the Contract will be subject to monitoring and surveillance by CME Group’s Market Regulation Department. The Market Regulation Department has the authority to exercise its investigatory and enforcement power where potential rule violations are identified.
- **Contracts not Readily Subject to Manipulation:** The Contracts are not readily subject to manipulation because of their structural attributes and reliance on government supplied data. Final settlements are based on official weather data that is published by government weather agencies and supplied to the Exchange by a single PRA, Speedwell Settlement Services Ltd. In the case of the United States, NWS, FAA, DoD, and NOAA are responsible for the measurement, recording and issuance of the data. Weather stations used for CME weather contracts are located at major airports or government owned properties having 24 hour/365 day security measures in place to ensure the accuracy of the data being reported. Similar to the U.S., European and Asian governments have implemented similar systems and collect the data in the same way, with the same authority and oversight.
- **Prevention of Market Disruption:** Trading in the Contracts will be subject to the rules of the Exchange, which include prohibitions on manipulation, price distortion, and disruption to the cash settlement process. As with any new product listed for trading on a CME Group designated contract market, trading activity in the Contracts will be subject to monitoring and surveillance by CME Group’s Market Regulation Department.
- **Position Limitations or Accountability:** The speculative position limits for the Contracts as demonstrated in this submission are consistent with the Commission’s guidance.
- **Emergency Authority:** As with all CME Group futures and options product, the Exchange shall have full authority to act appropriately and as necessary in emergency situations.
- **Availability of General Information:** The Exchange will publish on its website information in regard to contract specifications, terms, and conditions, as well as daily trading volume, open interest, and price information for the Contracts. The Exchange will issue a Special Executive Report (“SER”) regarding the launch of the Contracts. The SER will also be posted on the CME Group website.

- **Daily Publication of Trading Information:** The Exchange will publish contract trading volumes, open interest levels, and price information daily on its website and through quote vendors for the Contracts.
- **Execution of Transactions:** The Contracts will be listed for trading on the CME Globex and for submission of clearing through the CME ClearPort platform. The CME Globex trading venue provides for competitive and open execution of transactions and affords the benefits of reliability and global connectivity.
- **Trade Information:** All requisite trade information for the Contracts will be included in the audit trail and is sufficient for the Market Regulation Department to monitor for market abuse.
- **Financial Integrity of Contracts:** The Contracts will be cleared by the CME Clearing, a derivatives clearing organization registered with the CFTC and subject to all CFTC Regulations related thereto.
- **Protection of Market Participants:** CME Rulebook Chapters 4 and 5 set forth multiple prohibitions that preclude intermediaries from disadvantaging their customers. These rules apply to trading in all of the Exchange's competitive trading venues.
- **Disciplinary Procedures:** Chapter 4 of the Rulebook contains provisions that allow the Exchange to discipline, suspend or expel members or market participants that violate the Rulebook. Trading in the Contracts will be subject to Chapter 4, and the Market Regulation Department has the authority to exercise its enforcement power in the event rule violations in these products are identified.
- **Dispute Resolution:** Disputes with respect to trading in the Contracts will be subject to the arbitration provisions set forth in Chapter 6 of the Rulebook. Chapter 6 allows all non-members to submit a claim for financial losses resulting from transactions on the Exchange to arbitration. A member named as a respondent in a claim submitted by a non-member is required to participate in the arbitration pursuant to Chapter 6. Additionally, the Exchange requires that members resolve all disputes concerning transactions on the Exchange via arbitration.

Pursuant to Section 5c(c) of the Act and CFTC Regulation 40.2(a), the Exchange hereby certifies that the listing of the Contracts complies with the Act, including regulations under the Act. There were no substantive opposing views to this proposal.

The Exchange certifies that this submission has been concurrently posted on the Exchange's website at <http://www.cmegroup.com/market-regulation/rule-filings.html>.

Should you have any questions concerning the above, please contact the undersigned at 312-466-7478 or via e-mail at [CMEGSubmissionInquiry@cmegroup.com](mailto:CMEGSubmissionInquiry@cmegroup.com).

Sincerely,

/s/ Timothy Elliott  
 Managing Director and Chief Regulatory Counsel

## **Exhibit A**

### **Position Limit/Accountability Levels and Market Overview [Applicable to all Contracts and all Effective Dates]**

#### **Position Limit/Accountability Levels**

The Contracts will mirror the currently listed weather futures and options contracts with single month accountability levels of 10,000 contracts. These changes will be reflected in the position accountability table in Chapter 5.

The 10,000 per month contract accountability level has been vetted with the CFTC due to the fact that Section 151 of the Act was vacated and reverted back to Section 150, which does not have an interpretation for position accountability for Alternative products. The CFTC acknowledged that weather is unique and that it is an excluded commodity and has no deliverable supply. In the conversation, CME noted the following: 1) due to the secured locations of the recording instruments (i.e., major airports), the index is not easily susceptible to manipulation and 2) a number of weather data suppliers are monitoring the data being released by these governmental agencies and any errors would most likely be reported and corrected promptly by the reporting agencies.

#### **Cash Market Overview**

Heating Degree Days (“HDD”)/Cooling Degree Days (“CDD”) and Cumulative Average Temperature (“CAT”) contracts are employed by a wide variety of enterprises, largely operating in the context of the energy industry, to manage their temperature related risks.

Energy companies, for example, have been known to sell HDD or CDD contracts to manage the risk of diminished revenues under mild weather conditions, noting that the quantity of energy sold is heavily contingent upon consumer demand driven by temperatures. Large scale energy consumers including automobile manufacturers and large residential building operators may buy HDD or CDD contracts to hedge against the risk of rising utility costs under extreme weather conditions.

Retailers whose sales are sensitive to weather conditions might control inventory costs more effectively through the use of HDD or CDD contracts. Beer consumption reaches a seasonal peak in the summer and cool weather can put a dent in beer sales. “the 2000 Preliminary Report for SABMiller, “History shows that on a summer day with the temperature over 25 degrees Celsius, sales can be more than 50% greater than on a day where the temperature is under 20 degrees...”

Utility companies may utilize HDD or CDD contracts to guard against “volumetric risks.” These volumetric risks are based upon the quantity of energy that might be expected to be marketed throughout the course of a heating or cooling season. These transactions rely upon the intuitive and well-documented relationship between power consumption and temperature extremes.

Thus, if the daily average temperatures during the course of a winter season were abnormally high, utility firms might face depressed demand for heating. Utilities have traditionally increased consumer prices to offset lower retail consumption volume. However, intensifying competition caused by ongoing deregulation has made it increasingly difficult for utilities to raise prices arbitrarily. Therefore, it becomes necessary for utility firms to address volumetric risks using other means such as HDD or CDD contracts.

Proper use of temperature related contracts not only enables utility firms to stabilize revenue streams but may also be used to provide at least a partial hedge to the cost side of the equation. Note that most utility firms operate under inherent capacity limitations. Electricity represents a non-storable commodity. If temperature suddenly rises or declines dramatically, utility firms may need to deploy less efficient generators to meet the sudden jump in demand or may be compelled to purchase electricity from the power grid in the face of soaring demands and rising prices. This implies that energy prices may increase, and

transmission costs may grow simultaneously. In this case, utility firms may find both weather derivatives and energy contracts useful to stabilize their economic outcomes, i.e., to hedge both volumetric and cost-based risks.

## **Weather Market Overview**

It has been estimated that over 2/3 of the global economy is impacted either directly or indirectly by weather conditions. The impact that weather has on businesses in the energy and agriculture industries is particularly acute. However, not only energy and agriculture businesses observe the weather conditions. The lists of other economic sectors that are affected by the weather include construction and transportation sectors that have to contend with delays and budget overruns. The retail and entertainment sectors face similar challenges when weather turns unfavorable. A retailer may have stocked up on winter clothing only to have the season be unseasonably warm, causing markdowns at the end of the season to move merchandise, and incurring a loss. Entertainment such as concerts, municipal parades, ski resorts, amusement parks etc. can be impacted by rain, cold and heat translating into lost revenue.

In addition to the commercial market participants like utility companies, some of the most active participants in the existing weather markets are insurance and reinsurance companies. Reinsurance companies, for example, offer clients a path to transfer their weather-related risk, and are then able to lay off a portion of that risk by participating in our weather futures and options markets. Hedge funds, pension funds, and asset managers that are looking for assets that are uncorrelated to their current portfolio holdings are also active participants in weather futures and options markets.

**Effective June 3, 2024**

#### 40901. CONTRACT SPECIFICATIONS

##### 1. Cumulative Average Temperature (CAT)

The daily average temperature is defined as the arithmetic average of the maximum temperature (Tmax) and minimum temperature (Tmin), measured at the following times for each location. Observations are recorded by the relevant National Meteorological Service and processed by Speedwell Settlement Services Ltd.

- Amsterdam-Schiphol, Netherlands (WMO 06240)  
Tmax: observed 0000 UTC<sub>D0</sub> to 0000 UTC<sub>D+1</sub> (D = calendar day)  
Tmin: observed 0000 UTC<sub>D0</sub> to 0000 UTC<sub>D+1</sub> (D = calendar day)  
National Meteorological Service: Royal Netherlands Meteorological Institute (KNMI)
- London-Heathrow, United Kingdom (WMO 03772)  
Tmax: observed 0850 UTC<sub>D0</sub> to 0850 UTC<sub>D+1</sub> (D = calendar day)  
Tmin: observed 0850 UTC<sub>D-1</sub> to 0850 UTC<sub>D0</sub> (D = calendar day)  
National Meteorological Service: UK Met Office
- ESSEN, Germany (WMO 10410)  
Tmax: observed 0000 UTC<sub>D0</sub> to 0000 UTC<sub>D+1</sub>  
Tmin: observed 0000 UTC<sub>D0</sub> to 0000 UTC<sub>D+1</sub>  
National Meteorological Service: Deutscher Wetterdienst (DWD)
- PARIS ORLY, France (WMO 07149)  
Tmax: observed 0600 UTC<sub>D0</sub> to 0600 UTC<sub>D+1</sub>  
Tmin: observed 1800 UTC<sub>D-1</sub> to 1800 UTC<sub>D0</sub>  
National Meteorological Service: Meteo France

##### 2. The CME European Seasonal Strip CAT Indexes

Each defined CME European Seasonal Strip CAT index below is the accumulation of like daily average temperatures over the season.

CAT Strips:

- May – September
- July – August
- **Q3 (July – September)**

A separate futures contract shall be listed for each strip. The accumulation period of each CME European Seasonal Strip CAT Index begins with the first calendar day of the first month of the strip, and ends with the last calendar day of the last month of the strip.

#### **41201. CONTRACT SPECIFICATIONS**

##### **1. Cumulative Average Temperature**

The daily average temperature is defined as the arithmetic average calculated over a twenty-four (24) hour period. Observations are recorded by the Japan Meteorological Agency (JMA) and processed by Speedwell Settlement Services Ltd.

- Tokyo, Japan (WMO 47662): Average of the 24-hourly readings between and including 0100 JST D0 and 0000 JST <sub>D+1</sub> (D = calendar day)

##### **2. The Pacific Rim Seasonal CAT Indexes**

Each particular CME Pacific Rim Seasonal index is the accumulation of the daily average temperatures over a minimum of two, and a maximum of seven, consecutive calendar months. A separate futures contract shall be listed for each strip. The accumulation period of each CME Pacific Rim CAT strip index begins with the first calendar day of the first month of the strip, and ends with the last calendar day of the last month of the defined strip.

## **Chapter 405 CME Seasonal Strip Degree Days Index Futures**

\*\*\*

### **40501. CONTRACT SPECIFICATIONS**

1. Heating Degree Days and Cooling Degree Days

The daily average temperature is defined as the arithmetic average of the maximum and minimum temperature recorded between 0000 LST to 2359 LST. Observations are recorded by the U.S. National Weather Service and processed by Speedwell Settlement Services Ltd.

For each day, Heating-Degree-Days (HDD) is the greater of (1) zero, (2) 65 degrees Fahrenheit minus the daily average temperature.

For each day, Cooling-Degree-Days (CDD) is the greater of (1) zero, (2) the daily average temperature minus 65 degrees Fahrenheit.

2. The CME Seasonal Strip Degree Days Indexes and Listing Cities

Each defined CME Seasonal Strip Degree Days index below is the accumulation of like Degree Days over the season.

Cooling Degree Days Strips:

- May – September
- July – August
- Q3 (July – September)

Atlanta Hartsfield International Airport (WBAN 13874)  
Boston-Logan International Airport (WBAN 14739)  
Burbank-Glendale-Pasadena Airport (WBAN 23152)  
Chicago O'Hare International Airport (WBAN 94846)  
Cincinnati-Northern Kentucky (Covington) Airport (WBAN 93814)  
Dallas – Ft. Worth International Airport (WBAN 03927)  
Houston-George Bush Intercontinental Airport (WBAN 12960)  
Las Vegas McCarran International Airport (WBAN 23169)  
Minneapolis-St. Paul International Airport (WBAN 14922)  
New York La Guardia Airport (WBAN 14732)  
Philadelphia International Airport (WBAN 13739)  
Portland International Airport (WBAN 24229)  
Sacramento Executive Airport (WBAN 23232)

Heating Degree Days Strips:

- November – March
- December – February
- **Q4 (October – December)**

Atlanta Hartsfield International Airport (WBAN 13874)  
Boston-Logan International Airport (WBAN 14739)  
Burbank-Glendale-Pasadena Airport (WBAN 23152)

#### **Chapter 407**

#### **CME European Seasonal Strip HDD Index Futures**

\*\*\*

#### **40701. CONTRACT SPECIFICATIONS**

##### 1. Heating Degree Days (HDD)

The daily average temperature is defined as the arithmetic average of the maximum temperature (Tmax) and minimum temperature (Tmin), measured at the following times for each location. Observations are recorded by the relevant National Meteorological Service and processed by Speedwell Settlement Services Ltd.

- Amsterdam-Schiphol, Netherlands (WMO 06240)  
Tmax: observed 0000 UTC<sub>D0</sub> to 0000 UTC<sub>D+1</sub> (D = calendar day)  
Tmin: observed 0000 UTC<sub>D0</sub> to 0000 UTC<sub>D+1</sub> (D = calendar day)  
National Meteorological Service: Royal Netherlands Meteorological Institute (KNMI)
- London-Heathrow, United Kingdom (WMO 03772)  
Tmax: observed 0850 UTC<sub>D0</sub> to 0850 UTC<sub>D+1</sub> (D = calendar day)  
Tmin: observed 0850 UTC<sub>D-1</sub> to 0850 UTC<sub>D0</sub> (D = calendar day)  
National Meteorological Service: UK Met Office
- ESSEN, Germany (WMO 10410)  
Tmax: observed 0000 UTC<sub>D0</sub> to 0000 UTC<sub>D+1</sub>  
Tmin: observed 0000 UTC<sub>D0</sub> to 0000 UTC<sub>D+1</sub>  
National Meteorological Service: Deutscher Wetterdienst (DWD)
- PARIS ORLY, France (WMO 07149)  
Tmax: observed 0600 UTC<sub>D0</sub> to 0600 UTC<sub>D+1</sub>  
Tmin: observed 1800 UTC<sub>D-1</sub> to 1800 UTC<sub>D0</sub>  
National Meteorological Service: Météo France

For each day, HDD is the greater of (1) zero, (2) 18 degrees Celsius ("C") minus the daily average temperature.

2. The CME European Seasonal Strip HDD Indexes

Each defined CME European Seasonal Strip HDD index below is the accumulation of like Degree Days over the season.

Heating Degree Days Strips:

- November – March
- December – February
- **Q4 (October – December)**

A separate futures contract shall be listed for each strip. The accumulation period of each CME European Seasonal Strip HDD begins with the first calendar day of the first month of the strip and ends with the last calendar day of the last month in the defined strip.

## Chapter 405 CME Seasonal Strip Degree Days Index Futures

\*\*\*

### 40501. **CONTRACT SPECIFICATIONS**

1. Heating Degree Days and Cooling Degree Days

The daily average temperature is defined as the arithmetic average of the maximum and minimum temperature recorded between 0000 LST to 2359 LST. Observations are recorded by the U.S. National Weather Service and processed by Speedwell Settlement Services Ltd.

For each day, Heating-Degree-Days (HDD) is the greater of (1) zero, (2) 65 degrees Fahrenheit minus the daily average temperature.

For each day, Cooling-Degree-Days (CDD) is the greater of (1) zero, (2) the daily average temperature minus 65 degrees Fahrenheit.

2. The CME Seasonal Strip Degree Days Indexes and Listing Cities

Each defined CME Seasonal Strip Degree Days index below is the accumulation of like Degree Days over the season.

Cooling Degree Days Strips:

- May – September
- July – August
- Q3 (July – September)

Atlanta Hartsfield International Airport (WBAN 13874)

Boston-Logan International Airport (WBAN 14739)

Burbank-Glendale-Pasadena Airport (WBAN 23152)

Chicago O'Hare International Airport (WBAN 94846)

Cincinnati-Northern Kentucky (Covington) Airport (WBAN 93814)

**40701. CONTRACT SPECIFICATIONS**

1. Heating Degree Days (HDD)

The daily average temperature is defined as the arithmetic average of the maximum temperature (Tmax) and minimum temperature (Tmin), measured at the following times for each location. Observations are recorded by the relevant National Meteorological Service and processed by Speedwell Settlement Services Ltd.

- Amsterdam-Schiphol, Netherlands (WMO 06240)  
Tmax: observed 0000 UTC<sub>D0</sub> to 0000 UTC<sub>D+1</sub> (D = calendar day)  
Tmin: observed 0000 UTC<sub>D0</sub> to 0000 UTC<sub>D+1</sub> (D = calendar day)  
National Meteorological Service: Royal Netherlands Meteorological Institute (KNMI)
- London-Heathrow, United Kingdom (WMO 03772)

Tmax: observed 0850 UTC<sub>D0</sub> to 0850 UTC<sub>D+1</sub> (D = calendar day)  
Tmin: observed 0850 UTC<sub>D-1</sub> to 0850 UTC<sub>D0</sub> (D = calendar day)  
National Meteorological Service: UK Met Office

- ESSEN, Germany (WMO 10410)  
Tmax: observed 0000 UTC<sub>D0</sub> to 0000 UTC<sub>D+1</sub>  
Tmin: observed 0000 UTC<sub>D0</sub> to 0000 UTC<sub>D+1</sub>  
National Meteorological Service: Deutscher Wetterdienst (DWD)
- PARIS ORLY, France (WMO 07149)  
Tmax: observed 0600 UTC<sub>D0</sub> to 0600 UTC<sub>D+1</sub>  
Tmin: observed 1800 UTC<sub>D-1</sub> to 1800 UTC<sub>D0</sub>  
National Meteorological Service: Meteo France

For each day, HDD is the greater of (1) zero, (2) 18 degrees Celsius (“C”) minus the daily average temperature.

## 2. The CME European Seasonal Strip HDD Indexes

Each defined CME European Seasonal Strip HDD index below is the accumulation of like Degree Days over the season.

Heating Degree Days Strips:

- November – March
- December – February
- **Q1 (Jan – March)**
- Q4 (October – December)

A separate futures contract shall be listed for each strip. The accumulation period of each CME European Seasonal Strip HDD begins with the first calendar day of the first month of the strip and ends with the last calendar day of the last month in the defined strip.

[Remainder of Chapter unchanged.]

## Chapter 405 CME Seasonal Strip Degree Days Index Futures

\*\*\*

### 40501. CONTRACT SPECIFICATIONS

1. Heating Degree Days and Cooling Degree Days

The daily average temperature is defined as the arithmetic average of the maximum and minimum temperature recorded between 0000 LST to 2359 LST. Observations are recorded by the U.S. National Weather Service and processed by Speedwell Settlement Services Ltd.

For each day, Heating-Degree-Days (HDD) is the greater of (1) zero, (2) 65 degrees Fahrenheit minus the daily average temperature.

For each day, Cooling-Degree-Days (CDD) is the greater of (1) zero, (2) the daily average temperature minus 65 degrees Fahrenheit.

2. The CME Seasonal Strip Degree Days Indexes and Listing Cities

Each defined CME Seasonal Strip Degree Days index below is the accumulation of like Degree Days over the season.

Cooling Degree Days Strips:

- May – September
- July – August
- **Q2 (April – June)**
- Q3 (July – September)

Atlanta Hartsfield International Airport (WBAN 13874)  
Boston-Logan International Airport (WBAN 14739)  
Burbank-Glendale-Pasadena Airport (WBAN 23152)  
Chicago O'Hare International Airport (WBAN 94846)  
Cincinnati-Northern Kentucky (Covington) Airport (WBAN 93814)  
Dallas – Ft. Worth International Airport (WBAN 03927)  
Houston-George Bush Intercontinental Airport (WBAN 12960)  
Las Vegas McCarran International Airport (WBAN 23169)  
Minneapolis-St. Paul International Airport (WBAN 14922)  
New York La Guardia Airport (WBAN 14732)  
Philadelphia International Airport (WBAN 13739)  
Portland International Airport (WBAN 24229)  
Sacramento Executive Airport (WBAN 23232)

Heating Degree Days Strips:

- November – March
- December – February
- Q1 (Jan – March)
- Q4 (October – December)

Atlanta Hartsfield International Airport (WBAN 13874)  
Boston-Logan International Airport (WBAN 14739)  
Burbank-Glendale-Pasadena Airport (WBAN 23152)  
Chicago O'Hare International Airport (WBAN 94846)

Cincinnati-Northern Kentucky (Covington) Airport (WBAN 93814)  
Dallas – Ft. Worth International Airport (WBAN 03927)  
Houston-George Bush Intercontinental Airport (WBAN 12960)  
Las Vegas McCarran International Airport (WBAN 23169)  
Minneapolis-St. Paul International Airport (WBAN 14922)  
New York La Guardia Airport (WBAN 14732)  
Philadelphia International Airport (WBAN 13739)  
Portland International Airport (WBAN 24229)  
Sacramento Executive Airport (WBAN 23232)

A separate futures contract shall be listed for each strip. The accumulation period of each CME SSHDD or CME SSCDD begins with the first calendar day of the first month of the strip, and ends with the last calendar day of the last month of the defined strip.

[Remainder of Chapter unchanged.]

##### 1. Cumulative Average Temperature (CAT)

The daily average temperature is defined as the arithmetic average of the maximum temperature (Tmax) and minimum temperature (Tmin), measured at the following times for each location. Observations are recorded by the relevant National Meteorological Service and processed by Speedwell Settlement Services Ltd.

- Amsterdam-Schiphol, Netherlands (WMO 06240)  
Tmax: observed 0000 UTC<sub>D0</sub> to 0000 UTC<sub>D+1</sub> (D = calendar day)  
Tmin: observed 0000 UTC<sub>D0</sub> to 0000 UTC<sub>D+1</sub> (D = calendar day)  
National Meteorological Service: Royal Netherlands Meteorological Institute (KNMI)
- London-Heathrow, United Kingdom (WMO 03772)  
Tmax: observed 0850 UTC<sub>D0</sub> to 0850 UTC<sub>D+1</sub> (D = calendar day)  
Tmin: observed 0850 UTC<sub>D-1</sub> to 0850 UTC<sub>D0</sub> (D = calendar day)  
National Meteorological Service: UK Met Office
- ESSEN, Germany (WMO 10410)  
Tmax: observed 0000 UTC<sub>D0</sub> to 0000 UTC<sub>D+1</sub>  
Tmin: observed 0000 UTC<sub>D0</sub> to 0000 UTC<sub>D+1</sub>  
National Meteorological Service: Deutscher Wetterdienst (DWD)
- PARIS ORLY, France (WMO 07149)  
Tmax: observed 0600 UTC<sub>D0</sub> to 0600 UTC<sub>D+1</sub>  
Tmin: observed 1800 UTC<sub>D-1</sub> to 1800 UTC<sub>D0</sub>  
National Meteorological Service: Météo France

2. The CME European Seasonal Strip CAT Indexes

Each defined CME European Seasonal Strip CAT index below is the accumulation of like daily average temperatures over the season.

CAT Strips:

- May – September
- July – August
- **Q2 (April – June)**
- Q3 (July – September)

A separate futures contract shall be listed for each strip. The accumulation period of each CME European Seasonal Strip CAT Index begins with the first calendar day of the first month of the strip, and ends with the last calendar day of the last month of the strip.
