Re: New Biodiesel Outright - D4 RINs (OPIS) Current Year Future and Related Amendments (42 of 45)
Submission Pursuant to Section 5c(c)(1) of the Act and Regulation 40.2

Dear Mr. Kirkpatrick:

Pursuant to Commission Regulations 40.2, ICE Futures U.S., Inc. ("Exchange") submits, by written certification, new Rules 18.A.190-18.A.199, 18.B.340-18.B.341, 18.E.095-18.E.110, 19.A.31-19.A.34, 19.C.104, and 19.D.79-19.D.80, amendments to Resolutions 1 and 2 of Chapter 18, and amendments to Resolutions 1 and 2 of Chapter 19. The new rules and amendments provide for 19 new futures contracts and 26 new options on futures contracts, which will be listed on September 17, 2018.

New Financial Gas Futures and Options Contracts

The Exchange is listing seven new Financial Gas fixed price futures, the NWP Rockies Fixed Price Future, Waha Fixed Price Future, EP Permian Fixed Price Future, HSC Fixed Price Future, Michcon Fixed Price Future, TETCO M3 Fixed Price Future, and the AB NIT Fixed Priced Future, monthly cash settled futures based upon the monthly price for natural gas at NWP Rockies, Waha, El Paso Permian Basin, Houston Ship Channel, Michcon, TETCO M3, and Alberta Nova price hubs, respectively. The contracts will reach expiry at the close of business on the last business day prior to the first calendar day of the contract period. All new Financial Gas fixed price futures will cash settle to the *Inside FERC* price published by Platts, except the AB NIT Fixed Price Future, which will cash settle to the price published by ICE-NGX in its *Canadian Gas Price Reporter*.

The Exchange is listing one new Financial Gas basis future, the Trunkline Zone 1A Basis Future, a monthly cash settled future based upon the difference between the monthly price for natural gas at Trunkline Zone 1A price hub published by Platts for *Inside FERC* and the NYMEX Henry Hub Natural Gas Futures contract. The contract will reach expiry at the close of business on the last business day prior to the first calendar day of the contract period.

The Exchange is listing one new Financial Gas swing future, the Tennessee 500L Swing Future, a daily cash settled future based upon the price for natural gas at Tennessee 500 Leg price hub. The contract will reach expiry on the business day prior to the contract period. The future will cash settle to the price published by Platts in *Gas Daily* for the relevant contract period for natural gas at the Tennessee 500 Leg price hub. Additionally, the Exchange is amending Resolution No. 2 to Chapter 18 to include the Tennessee 500L Swing Future as a positive aggregate with the existing Tennessee 500L Index Future.

The Exchange is listing one new Financial Gas future, the US EIA Financial Weekly Index (100 USD), a weekly cash settled future based upon the Weekly Natural Gas Storage Inventory Number as reported by the U.S. Energy Information Administration (EIA) in its *Weekly Natural Gas Report*. The futures contract will settle at 10:28 am (EPT) on the day of the EIA Storage Number corresponding to the contract period.

The contract size, minimum price fluctuation, Interval Price Limits (IPLs) and IPL recalculation times, No-Cancellation Ranges (NCRs), spot month position limits and single and all month accountability levels are provided in relevant documents attached as Exhibit A. All relevant terms of the contracts are similar to other Financial Gas contracts listed by the Exchange. The listing cycle and other relevant specifications are provided in the contract specifications in Exhibit A. The Exchange has set spot month position limits, and single and all month accountability levels consistent with similar Financial Gas contracts. A deliverable supply analysis detailing the methodology the Exchange used to determine spot month position limits for the Trunkline Zone 1A Basis Future is attached to this submission as Exhibit B.

The Exchange is also listing seven European-style options on futures contracts based on the NWP Rockies Fixed Price Future, Waha Fixed Price Future, EP Permian Fixed Price Future, HSC Fixed Price Future, Michcon Fixed Price Future, TETCO M3 Fixed Price Future, and the AB NIT Fixed Priced Future, as described further below. The contracts will reach expiration at the end of the trading session on the last business day prior to the first calendar day of the contract period. These new options are subject to the position limit and accountability levels of the underlying futures contracts.

Financial Power Fixed Price Futures and Options Contracts

The Exchange is listing two new Financial Power fixed price futures, the CAISO NP-15 Day-Ahead Peak HE 0900-1600 Fixed Price Future and CAISO SP-15 Day-Ahead peak HE 0900-1600 Fixed Price Future, monthly cash settled futures based upon the average locational marginal price (LMP) between hours ending 09:00 and 16:00 (PPT) for electricity at California ISO's NP-15 and SP-15 price hubs, respectively. The contracts will reach expiry at the close of business on the last business day of the contract period and will cash settle to the average of the LMPs, as published by California ISO.

The Exchange is also listing six American-style and one European-style options on futures contracts based on existing futures contracts listed by the Exchange, the PJM PSEG Day-Ahead Peak Fixed Price Future, PJM PSEG Day-Ahead Peak Daily Fixed Price Future, PJM PPL Zone Day-Ahead Peak Fixed Price Future, PJM PEPCO Zone Day-Ahead Peak Fixed Price Future, PJM PECO Zone Day-Ahead Fixed Price Future, PJM BGE Zone Day-Ahead Peak Fixed Price Future, and the ERCOT North 345KV Day-Ahead Peak Fixed Price Future, as described further below. The American-style options will reach expiration on the second business day prior to the first calendar day of the contract period and the European-style option will reach expiration at the end of the trading session on the last business day prior to the contract period. These new options are subject to the position limit and accountability levels of the underlying futures contracts.

The contract size, minimum price fluctuation, Interval Price Limits (IPLs) and IPL recalculation times, No-Cancellation Ranges (NCRs), spot month position limits and single and all month accountability levels are provided in relevant documents attached as Exhibit A. All relevant terms of the contracts are similar to other Financial Power contracts listed by the Exchange. The listing cycle and other relevant specifications are provided in the contract specifications in Exhibit A. For the CAISO NP-15 Day-Ahead Peak HE 0900-1600 Fixed Price Future and CAISO SP-15 Day-Ahead peak HE 0900-1600 Fixed Price Future contracts, the Exchange has set spot month position limits, and single and all month accountability levels consistent with similar Financial Power contracts that reference CAISO NP-15 and SP-15 price hubs.

Physical Environmental Options Contracts

The Exchange is also listing twelve new European-style Physical Environmental options on futures contracts based on existing futures contracts listed by the Exchange, the Massachusetts Solar Renewable Certificate Future Vintages 2018-2023 and Massachusetts Solar Renewable Energy Certificate Carve Out II Future Vintages 2018-2023, as described further below. The contract will reach expiration at 4:00 p.m. EPT on the 15th calendar day of the delivery month. These new options are subject to the position limit and accountability levels of the underlying futures contracts.

Natural Gas Liquids Futures Contracts

The Exchange is listing two new Natural Gas Liquids futures contracts, the Butane, Argus CIF ARA Mini Balmo Future and the Propane - Daily Argus Far East Mini Future. The Butane, Argus CIF ARA Mini Balmo Future is a balance of the month cash settled future based upon the average of the daily prices published by Argus in its *International LPG Report* for butane at CIF ARA. The contract will expire on the last trading day of the contract month. The Propane - Daily Argus Far East Mini Future is a daily cash settled mini future based on the Argus daily assessment price for propane in the Far East, as published by Argus in its *International LPG Report*. The contract will expire on the second business day after the nominal contract date. For both contracts, the Exchange currently lists a similar contract with a contract size of 1,000 MT, the Butane, Argus CIF ARA Balmo Future (“1ON-1PH) (which aggregate into the Butane, Argus CIF ARA Future (“ABR”) for position limit purposes) and the Propane, Argus Far East Index (AFEI) Future (“AFE”). For position limit purposes, positions in the new butane and propane futures will be aggregated with positions in the existing ABR and AFE contracts, respectively.

The contract size, minimum price fluctuation, Interval Price Limits (IPLs) and IPL recalculation times, No-Cancellation Ranges (NCRs), spot month position limits and single and all month accountability levels are provided in relevant documents attached as Exhibit A. All relevant terms of the contracts are similar to other Natural Gas Liquids contracts listed by the Exchange. The listing cycle and other relevant specifications are provided in the contract specifications in Exhibit A. The Exchange has set spot month position limits, and single and all month accountability levels consistent with similar Natural Gas Liquids contracts that reference butane at CIF ARA and Far East propane.

Oil Americas Futures Contracts

a. Diesel Outright - Diesel EIA Flat Tax On-Highway Future

The Exchange is listing one monthly cash settled futures contract based on the Diesel EIA Flat Tax On-Highway price published by the U.S. Energy Information Administration (“EIA”) in its *Weekly Retail On-Highway Diesel Prices* report. The assessment estimates, via a survey, the “retail cash price of self-serve, motor vehicle diesel fuel.”¹ The contract will reach expiration on the last business day of the contract month and cash settle to the arithmetic average of the weekly prices published by EIA.

The contract size, minimum price fluctuation, Interval Price Limits (IPLs) and IPL recalculation times, No-Cancellation Ranges (NCRs), spot month position limits and single and all month accountability levels are provided in relevant documents attached as Exhibit A. All relevant terms of the contract are similar to other Oil Americas contracts listed by the Exchange. The listing cycle and other relevant specifications are provided in the contract specifications in Exhibit A. A Deliverable Supply Analysis detailing the methodology the Exchange used to determine the spot month position limits for the aforementioned contract is attached hereto as Exhibit B.

b. Biodiesel Outright - D4 RINS (OPIS) Current Year Future and Biodiesel Outright - D4 RINS (OPIS) Previous Year Future

The Exchange is listing two monthly cash settled futures contracts based on the daily assessment price published by OPIS for physically delivered D4 RINs. A renewable identification number, or RIN, is a serial number assigned to every gallon of renewable transportation fuel to track production, consumption, and trading as required by the U.S. Environmental Protection Agency (EPA). Generally, one gallon of biofuel equals one RIN. As it relates to the instant contract, D4 RINs correspond to renewable fuels manufactured from biomass-based diesel, including diesel produced from soybean oil, oil from annual covercrops, oil from algae grown photosynthetically, and canola and rapeseed oil, among other renewable biomass-based fuel sources. The settlement price is based on the average of the mean of the high and low quotations appearing in the OPIS *Ethanol & Gasoline Component Spot Market Prices* report under US Biodiesel RINs for each business day in the determination period. The Biodiesel Outright - D4 RINS (OPIS) Current Year Future will settle to prices corresponding to the “Current Yr” category in the relevant price assessment, while the Biodiesel Outright - D4 RINS (OPIS) Previous Year Future will settle to prices corresponding to the “Previous Yr” category in the relevant price assessment. The contract will reach expiry at the close of business on the last business day of the contract month.

The contract size, minimum price fluctuation, Interval Price Limits (IPLs) and IPL recalculation times, No-Cancellation Ranges (NCRs), spot month position limits and single and all month accountability levels are provided in relevant documents attached as Exhibit A. All relevant terms of the contracts are similar to other Oil Americas contracts listed by the Exchange. The listing cycle and other relevant specifications are provided in the contract specifications in Exhibit A. A Deliverable Supply Analysis detailing the methodology the Exchange used to determine the spot month position limits for the aforementioned contracts is attached hereto as Exhibit B.

c. Gasoline Outright - D6 RINs (OPIS) Previous Year Future

The Exchange is listing one monthly cash settled futures contract based on the daily assessment price published by OPIS for physically delivered D6 RINs. As it relates to the instant contract, D6 RINs correspond to renewable fuels manufactured from sorghum ethanol using dry mill processing, corn starch ethanol, butanol, and starches from crop residue and cover crops, among other renewable fuel sources. The settlement price is based on the average of the mean of the high and low quotations appearing in the OPIS *Ethanol & Gasoline Component Spot Market Prices* report under US Ethanol RINs for the previous year each business day in the determination period. The contract will reach expiry at the close of business on the last business day of the contract month.

The contract size, minimum price fluctuation, Interval Price Limits (IPLs) and IPL recalculation times, No-Cancellation Ranges (NCRs), spot month position limits and single and all month accountability levels are provided in relevant documents attached as Exhibit A. All relevant terms of the contract are similar to other Oil Americas contracts listed by the Exchange. The listing cycle and other relevant specifications are provided in the contract specifications in Exhibit A. A Deliverable Supply Analysis detailing the methodology the Exchange used to determine the spot month position limits for the aforementioned contract is attached hereto as Exhibit B.

d. Gasoline Diff - RBOB Gasoline 1st Line vs Argus Eurobob Non-Oxy FOB Rotterdam Barges Future

The Exchange is listing one monthly cash settled futures contract based on the difference between the ICE daily settlement for the RBOB Gasoline 1st Line Future and the Argus daily assessment price for Eurobob Non-Oxy FOB Rotterdam Barges. As it relates to the instant contract, RBOB gasoline is Reformulated Gasoline Blendstock for Oxygen Blending (RBOB), which relates to export-grade, non-oxygenated gasoline exchanged in the U.S. Eurobob Non-Oxy FOB Rotterdam relates to European-based, non-

oxygenated gasoline freight-on-board exchanged at Rotterdam, Netherlands. The contract will reach expiry at the close of business on the last business day of the contract month and settle to the difference between the average of prices published by ICE and Argus in its *European Products Report* for each business day in the determination period.

The contract size, minimum price fluctuation, Interval Price Limits (IPLs) and IPL recalculation times, No-Cancellation Ranges (NCRs), spot month position limits and single and all month accountability levels are provided in relevant documents attached as Exhibit A. All relevant terms of the contract are similar to other Oil Americas contracts listed by the Exchange. The listing cycle and other relevant specifications are provided in the contract specifications in Exhibit A. A Deliverable Supply Analysis detailing the methodology the Exchange used to determine the spot month position limits for the aforementioned contract is attached hereto as Exhibit B.

New Options Contracts

As indicated above, the Exchange is listing 26 new options contracts based on the price of an underlying futures contract currently listed by the Exchange or included in this filing. The contract sizes, minimum price fluctuations, No-Cancellation Ranges (NCRs), spot month position limits and single and all month accountability levels are provided in relevant documents attached as Exhibit A. All relevant terms of the contracts are similar to other Financial Gas, Financial Power and Physical Environmental options contracts currently listed by the Exchange. The listing cycle and other relevant specifications are provided in the contract specifications in Exhibit A. The position limits for the options contracts will be based on the position limits for the futures contracts underlying the options.

Certifications

The new rules and rule amendments will become effective with the listing of the new futures and options contracts on September 17, 2018. The Exchange is not aware of any substantive opposing views to the new futures and options contracts. The Exchange certifies that the rule amendments comply with the requirements of the Act and the rules and regulations promulgated thereunder. The Exchange has reviewed the designated contract market core principles ("Core Principles") as set forth in the Act and has determined that the listing of the contracts complies with the following relevant Core Principles:

COMPLIANCE WITH RULES

The terms and conditions of the new futures and options contracts are set forth in new rules 18.A.190-18.A.199, 18.B.340-18.B.341, 18.E.095-18.E.110, 19.A.31-19.A.34, 19.C.104, and 19.D.79-19.D.80, amendments to Resolutions 1 and 2 of Chapter 18, and amendments to Resolutions 1 and 2 of Chapter 19, and will be enforced by the Exchange. In addition, trading of the contract is subject to all relevant Exchange rules which are enforced by the Market Regulation Department.

CONTRACTS NOT READILY SUBJECT TO MANIPULATION

The new futures and options contracts are not readily subject to manipulation as they are based on established and liquid underlying cash markets. In addition, trading of the new contracts will be monitored by the Market Regulation Department.

POSITION LIMITS OR ACCOUNTABILITY

Positions in the new futures and options contracts will be subject to position limits and accountability levels set by the Exchange. As described above, such position limits are based upon existing levels set for substantially similar products or are based upon the deliverable supply in the cash market. A Deliverable Supply Analysis is attached hereto as Exhibit B. Positions in the new options will be aggregated with the underlying futures contracts and subject to the position limits in place for the underlying futures contracts.

FINANCIAL INTEGRITY OF CONTRACTS

The new futures and options contracts will be cleared by ICE Clear Europe, a registered derivatives clearing organization subject to Commission regulation, and carried by registered futures commission merchants qualified to handle customer business.

The Exchange further certifies that, concurrent with this filing, a copy of this submission was posted on the Exchange's website and may be accessed at (<https://www.theice.com/futures-us/regulation>).
