

Submission No. 22-170  
September 23, 2022

Mr. Christopher J. Kirkpatrick  
Secretary of the Commission  
Office of the Secretariat  
Commodity Futures Trading Commission  
Three Lafayette Centre  
1155 21<sup>st</sup> Street, NW  
Washington, DC 20581

**Re: New One Year Mid-Curve Option on PJM Tri Qualified Renewable Energy Certificate Class I Future (Futures Style Margining) and Related Amendments (12 of 14)**  
**Submission Pursuant to Section 5c(1) of the Act and Regulation 40.2**

Dear Mr. Kirkpatrick:

Pursuant to Section 5c(1) of the Commodity Exchange Act, as amended (the “CEA”), and Commission Regulations 40.2, ICE Futures U.S., Inc. (“Exchange”) submits, by written certification, new Rules 18.B.412-18.B.415, 18.D.65-18.D.66, 18.E.155-18.E.158, and 19.G.12, amendments to Rules 18.D.022 and 18.D.024, and amendments to Resolutions 1 and 2 of Chapters 18 and 19. The new rules and amendments provide for nine new futures and five new option on futures contracts, which will be listed on or about October 10, 2022, or such other date as the Exchange shall determine which shall be no sooner than the second business day following the business day on which this submission is received by the Commission.

**Financial Olefins Futures Contract**

a. Ethylene, I.C.I.S. FD NWE Future

The Exchange is listing one monthly cash settled futures contract, the Ethylene, I.C.I.S. FD NWE Future, which is based on the average of the daily prices published by I.C.I.S. for ethylene in northwestern European delivery points. The contract generally represents the average price of European ethylene during the contract month. The contract supplements the existing suite of Financial Olefins and ethylene contracts currently listed by the Exchange. The contract will cease trading on the last trading day of the contract month and will cash settle to a price in Euro and cents per metric tonne based on the average of the specified daily prices published by I.C.I.S. during the contract month.

The contract size, minimum price fluctuation, Interval Price Limits (IPLs) and IPL recalculation times, No-Cancellation Ranges (NCRs), spot month position limits and single and all month accountability levels are provided in relevant documents attached as Exhibit A. All relevant terms of the contract are similar to other Financial Olefins contracts listed by the Exchange. The listing cycle and other relevant specifications are provided in the contract specifications in Exhibit A. The new futures contract is block eligible. The minimum block trade size has been set consistent with existing Financial Olefins futures contracts. New Exchange Rule 19.G.12 lists the aforementioned ethylene futures contract. A Deliverable Supply Analysis detailing the methodology the Exchange used to determine the spot month position limits for the aforementioned contract is attached hereto as Exhibit B. The Exchange has set single and all month accountability levels consistent with the spot month position limits for the product. Additionally, it is the

Exchange's good faith belief that the aforementioned contract does not meet the definition of *referenced contract* as prescribed in CFTC §150.1.

### **Financial Power Futures Contracts**

#### a. ERCOT Real-Time 1800-2200 Futures

The Exchange is listing four new monthly futures contracts, the ERCOT Houston 345 KV Real-Time HE 1800-2200 Fixed Price Future, ERCOT North 345 KV Real-Time HE 1800-2200 Fixed Price Future, ERCOT South 345 KV Real-Time HE 1800-2200 Fixed Price Future, and the ERCOT West 345 KV Real-Time HE 1800-2200 Fixed Price Future, which are based on the real-time electricity prices at ERCOT Houston, North, South, and West price hubs, respectively, for certain peak times. The products supplement the existing suite of Financial Power products related to ERCOT price hubs offered by the Exchange. The contracts' sizes are consistent with other Financial Power contracts offered by the Exchange, offering commercial market participants further opportunity to balance their exposures. The real-time contracts will cease trading on the last business day of the contract period, at which time the contracts will cash settle to a price in USD based on the mathematical average of peak hourly prices. For the contracts, they will generally settle to the average of LMPs for all hours ending 1800-2200 CPT for the relevant contract period. Spot month position limits and single and all-month accountability levels have been set consistent with other futures contracts referencing the relevant ERCOT price hubs. Additionally, positions in the new contracts will be aggregated with the relevant monthly contract corresponding to peak timing at the relevant price hub.

The contract size, minimum price fluctuation, Interval Price Limits (IPLs) and IPL recalculation times, where applicable, No-Cancellation Ranges (NCRs), spot month position limits and single and all month accountability levels are provided in relevant documents attached as Exhibit A. All relevant terms of the contracts are similar to other Financial Power futures and option on futures contracts listed by the Exchange. Each of the new contracts are block eligible. The minimum block trade size has been set consistent with existing Financial Power contracts. The listing cycle and other relevant specifications are provided in the contract specifications in Exhibit A. New Exchange Rules 18.B.412-18.B.415 list the new futures contracts. For each new product the Exchange has set spot month position limits, and single and all month accountability levels consistent with similar Financial Power contracts that reference the ERCOT Houston, North, South, and West price hubs. Positions held in the futures contracts will be aggregated with the relevant monthly futures contracts for position limit and accountability purposes. Additionally, it is the Exchange's good faith belief that the above-referenced Financial Power futures and option on futures contracts do not meet the definition of *referenced contract* as prescribed in CFTC §150.1.

### **Physical Environmental Futures and Option on Futures Contracts**

#### a. California Carbon Allowance Vintage 2026 Futures

California Carbon Allowance ("CCA") futures contracts are physically-delivered carbon emission allowance futures contracts. The Exchange currently lists futures contracts for the 2013 through 2025 vintage-years. The term "vintage" identifies the compliance year for which an allowance is designated. The deliverable instruments for the existing CCA contracts are California Carbon Allowances issued as a limited authorization to emit up to one metric ton of CO<sub>2</sub> or CO<sub>2</sub>-equivalent in the California Cap and Trade Program equal to the contract size, delivered through the California MTS, which have a vintage corresponding to the specific vintage year or prior to the specific vintage year. The contract specifications will be identical to other CCA vintage futures contracts currently listed by the Exchange, which prescribe that the contract will cease trading three business days prior to the last business day of the delivery month, at which time the contract will settle based on physical delivery of the underlying allowances. Amendments to Exchange Rule 18.D.022 add the 2026 vintage year to the suite of existing CCA futures.

b. California Carbon Allowance Vintage Specific 2026 Futures

California Carbon Allowance Vintage Specific (“CCAVS”) futures contracts are physically-delivered carbon emission allowance contracts. The Exchange currently lists vintage-specific futures contracts for the 2017 through 2025 vintage-years. The deliverable instruments for the existing CCAVS contracts are California Carbon Allowances issued as a limited authorization to emit up to one metric ton of CO<sub>2</sub> or CO<sub>2</sub>-equivalent in the California Cap and Trade Program equal to the contract size, delivered through the California MTS, which have a vintage corresponding to the specific vintage year only. The contract specifications will be identical to other CCA vintage futures contracts currently listed by the Exchange, which prescribe that the contract will cease trading three business days prior to the last business day of the delivery month, at which time will settle based on physical delivery of the underlying vintage year 2026 allowances/instruments. Amendments to Exchange Rule 18.D.024 list the 2026 Vintage Specific futures contract to the suite of existing CCAVS futures.

c. Option on RGGI Vintage 2022, 2023 Futures (Futures-Style Margining)

The Exchange is listing two new option on futures contracts calling for the delivery of Regional Greenhouse Gas Initiative (“RGGI”) CO<sub>2</sub> Allowances having a vintage of 2022 and allowances having a vintage of any year prior to the 2022 vintage year, and in the other contract, CO<sub>2</sub> Allowances having a vintage of 2023 and allowances having a vintage of any year prior to the 2023 vintage year. The options are European-style and are based on existing futures contracts currently listed by the Exchange. The new contracts will be margined based on futures-style margining, for which the premium for the contracts will be paid in full at maturity, as opposed to equity-style margining utilized by certain of the Exchange’s other Physical Environmental options. The options will expire at 4:00 p.m. (EPT) on the 15<sup>th</sup> calendar day of the delivery month. If the 15<sup>th</sup> calendar day is not a business day, then the expiry day will be the first business day following the 15<sup>th</sup> calendar day of the delivery month, consistent with other RGGI options contracts.

d. Pennsylvania Compliance Alternative Energy Credit Tier II Future

The Exchange is listing one new monthly futures contract, the Pennsylvania Compliance Alternative Energy Credit Tier II Future (PCT), which calls for the delivery of Pennsylvania Tier II Alternative Energy Certificates at expiration. A Pennsylvania Tier II REC is an electronic certificate issued by PJM-GATS for qualifying generation, as defined in Pennsylvania Statutes Title 73 P.S. Trade and Commerce § 1648.2 and which are eligible to meet the Tier II alternative energy source requirement of the Pennsylvania Alternative Energy Portfolio standards Act as specified in Pennsylvania Statutes Title 73 Chapter 18F and issued by PJM GATS having a vintage or energy year designation that corresponds to the specified vintage of the expiring contract. The contract will cease trading three business days prior to the last business day of the delivery month, at which point will settle based on physical delivery of the applicable underlying instruments.

e. New Jersey Compliance Renewable Energy Certificate Class II Future

The Exchange is listing one new monthly futures contract, the New Jersey Compliance Renewable Energy Certificate Class II Future (NJV), which calls for the delivery of New Jersey Class II Renewable Energy Certificates at expiration. A New Jersey Class II REC is an electronic certificate issued by PJM-GATS for qualifying generation, as defined in New Jersey Renewable Energy Portfolio Standard and promulgated under N.J.A.C. 14:8. The generation must be verified and qualified by the New Jersey Board of Public Utilities having a vintage or energy year designation that corresponds to the specified vintage of the expiring contract. The contract will cease trading three business days prior to the last business day of the delivery month, at which point will settle based on physical delivery of the applicable underlying instruments, consistent with other Physical Environmental contracts.

f. Option on PJM Tri Qualified Renewable Energy Certificate Class I Future (Futures Style Margining)

The Exchange is listing one new option on futures contract based on the PJM Tri-Qualified Renewable Energy Certificate Class I Futures contract. The option is European-style and is based on the aforementioned existing futures contract currently listed by the Exchange. The new contract will be margined based on futures-style margining, for which the premium for the contracts will be paid in full at maturity, as opposed to equity-style margining utilized by certain of Exchange's other Physical Environmental options. The options will expire at 4:00 p.m. (EPT) on the 15th calendar day of the delivery month. If the 15th calendar day is not a business day, then the expiry day will be the first business day following the 15th calendar day of the delivery month. In-the-money options will expire into a position in the contract month of the underlying futures contract. The expiration schedule for the new product is consistent with other Physical Environmental options contracts.

g. One-Year and Two-Year Mid-Curve Option on PJM Tri Qualified Renewable Energy Certificate Class I Future (Futures Style Margining)

The Exchange is listing two additional new option on futures contracts based on the PJM Tri-Qualified Renewable Energy Certificate Class I Futures contract. The options are European-style and is based on the aforementioned existing futures contract currently listed by the Exchange. The new contracts will be margined based on futures-style margining, for which the premium for the contracts will be paid in full at maturity, as opposed to equity-style margining utilized by certain of the Exchange's other Physical Environmental options. The options will expire at 4:00 p.m. (EPT) on the 15th calendar day of the delivery month. If the 15th calendar day is not a business day, then the expiry day will be the first business day following the 15th calendar day of the delivery month. In-the-money options will expire into a position in the underlying futures contract that is one year and two years later, for the One-Year and Two-Year Curve Options, respectively. The expiration schedule for the new products is consistent with other Physical Environmental options contracts.

The contract sizes, minimum price fluctuations, Interval Price Limits (IPLs) and IPL recalculation times, where applicable, No-Cancellation Ranges (NCRs), spot month position limits and single and all month accountability levels are provided in relevant documents attached as Exhibit A. All relevant terms of the aforementioned Physical Environmental futures and option on futures contracts are similar to other Physical Environmental futures and option on futures contracts listed by the Exchange. The listing cycle and other relevant specifications are provided in the contract specifications in Exhibit A. Each of the new contracts are block eligible. The minimum block trade sizes have been set consistent with existing Physical Environmental contracts. New Exchange Rules 18.D.065-18.D.066, and 18.E.155-18.E.158, and amendments to Rules 18.D.022 and 18.D.024 list the new futures and option on futures contracts. Position limits and accountability levels for the contracts have been set at levels consistent with existing Physical Environmental futures contracts for California Carbon Allowances, RGGI Allowances, and PJM Tri-Qualified Allowances, currently listed by the Exchange. The Exchange believes that the PCT and NJV contracts are substantially the same as existing contracts (*look-a-likes*) currently listed on another designated contract market. Therefore, pursuant to CFTC Regulation 150.5(b)(3), the Exchange has set spot month position limits and single and all-months-combined accountability levels for PCT and NJV at levels identical to those of existing contracts listed by such designated contract market, in compliance with the requirement.<sup>1</sup> Positions held in the aforementioned option on futures contracts will be aggregated with the

---

<sup>1</sup> 17 C.F.R. § 150.5(b)(3) (October 15, 2020) (relevant regulation providing that: "For any newly listed commodity derivative contract subject to paragraph (b) of this section that is substantially the same as an existing contract listed on a designated contract market or swap execution facility that is a trading facility, the designated contract market or swap execution facility that is a trading facility listing such newly listed contract shall adopt spot month, individual month, and all-months-combined speculative position limits comparable to those of the existing contract.") Here, the PCT and NJV contracts have identical deliverable instruments and expiration schedules to those listed by Nodal

underlying futures contract for position limits and single and all-month accountability purposes. Additionally, it is the Exchange's good faith belief that none of the contracts meet the definition of *referenced contract* as prescribed in CFTC §150.1.<sup>2</sup>

Pursuant to Section 5c(c)(1) of the Commodity Exchange Act, as amended (the "CEA"), and Commission Regulations 40.2, ICE Futures U.S., Inc. ("Exchange") submits, by written certification, new Rules 18.B.412-18.B.415, 18.D.65-18.D.66, 18.E.155-18.E.158, and 19.G.12, amendments to Rules 18.D.022 and 18.D.024, and amendments to Resolutions 1 and 2 of Chapters 18 and 19. The new rules and amendments provide for nine new futures and five new option on futures contracts, which will be listed on or about October 10, 2022, or such other date as the Exchange shall determine which shall be no sooner than the second business day following the business day on which this submission is received by the Commission.

## **Certifications**

The rules and amendments establishing the new futures and option on futures contracts' terms and conditions are to become effective on the second business day following the business day on which this submission is received by the Commission. The Exchange is not aware of any substantive opposing views to the new futures and option on futures contracts. The Exchange certifies that the rule amendments comply with the requirements of the Act and the rules and regulations promulgated thereunder. The Exchange has reviewed the designated contract market core principles ("Core Principles") as set forth in the Act and has determined that the listing of the contracts complies with the following relevant Core Principles:

### **COMPLIANCE WITH RULES**

The terms and conditions of the new futures and option on futures contracts are set forth in new Rules 18.B.412-18.B.415, 18.D.65-18.D.66, 18.E.155-18.E.158, and 19.G.12, amendments to Rules 18.D.022 and 18.D.024, and amendments to Resolutions 1 and 2 of Chapters 18 and 19, and will be enforced by the Exchange. In addition, trading of the contracts is subject to all relevant Exchange rules which are enforced by the Market Regulation Department.

### **CONTRACTS NOT READILY SUBJECT TO MANIPULATION**

The new futures and option on futures contracts are not readily subject to manipulation as they are based on established and liquid underlying cash markets. In addition, trading of the new contracts will be monitored by the Market Regulation Department.

### **POSITION LIMITS OR ACCOUNTABILITY**

Positions in the new futures and option on futures contracts will be subject to position limits and accountability levels set by the Exchange. As described above, such position limits are based upon existing levels set for substantially similar products at the Exchange or another designated contract market or based on the deliverable supply of the cash commodity underlying the contract. Positions held in the new option on futures contracts will be aggregated with the futures contracts underlying the option contracts for purposes of position limits and accountability.

---

Exchange in its New Jersey Compliance Renewable Energy Certificate Class 2 Vintage 2023 Future and Pennsylvania Alternative Energy Certificate Tier II Vintage 2023 Future, as well as the subsequent vintages of the products listed by Nodal Exchange. Therefore, the Exchange has determined to set spot month speculative position limits, single and all-months-combined accountability levels at 22,500 contracts for PCT and 7,350 for NJV, identical to those at Nodal Exchange. ([https://www.nodalexchange.com/wp-content/uploads/Nodal\\_Rulebook\\_Appendix\\_A-Nodal\\_Exchange\\_Contract\\_Specification\\_All\\_2022-09-19.pdf](https://www.nodalexchange.com/wp-content/uploads/Nodal_Rulebook_Appendix_A-Nodal_Exchange_Contract_Specification_All_2022-09-19.pdf) and [https://www.nodalexchange.com/files/autogenerated/Nodal\\_Rulebook\\_Appendix\\_C-Limits\\_and\\_Levels.PDF](https://www.nodalexchange.com/files/autogenerated/Nodal_Rulebook_Appendix_C-Limits_and_Levels.PDF))

<sup>2</sup> 17 C.F.R. § 150.1 (October 15, 2020) (providing for *referenced contract* definition).

## **FINANCIAL INTEGRITY OF CONTRACTS**

The new futures and option on futures contracts will be cleared by ICE Clear Europe, a registered derivatives clearing organization subject to Commission regulation, and carried by registered futures commission merchants qualified to handle customer business.

The Exchange is not aware of any opposing views expressed by members or others regarding the listing of the new futures contracts and option on futures contracts and the adoption of related amendments. The Exchange further certifies that concurrent with this filing a copy of this submission was posted on the Exchange's website, which may be accessed at: (<https://www.theice.com/futures-us/regulation#rule-filings>).

## Subchapter 18D – Physical Environmental Futures Contracts

| Rule     | Subject  |
|----------|--|
| 18.D.022 | California Carbon Allowance Future - Vintage 2019 and After        |
| 18.D.024 | California Carbon Allowance Vintage Specific Future                |
| 18.D.065 | Pennsylvania Compliance Alternative Energy Credit Tier II Future   |
| 18.D.066 | New Jersey Compliance Renewable Energy Certificate Class II Future |

\* \* \*

\* \* \*

## **18.D.022 California Carbon Allowance Future - Vintage 2019 and After**

**Contract Description:** Physically delivered greenhouse gas emissions allowances where each is an allowance issued by the California Air Resources Board or a linked program (“California Carbon Allowance”) representing one metric ton of CO<sub>2</sub> equivalent under California Assembly Bill 32 "California Global Warming Solutions Act of 2006" and its associated regulations, rules and amendments, all together known as the "California Cap and Trade Program".

**Contract Symbol:** CAX: Vintage 2019, CAY Vintage 2020, CAZ: Vintage 2021, CB0: Vintage 2022, CBI: Vintage 2023, CB4: Vintage 2024, CB5: Vintage 2025; CB6: Vintage 2026

**Settlement Method:** Physical delivery

**Contract Size:** 1,000 California Carbon Allowances

**Currency:** USD

**Minimum Price Fluctuation:** The price quotation convention shall be One cent (\$0.01) per Allowance; minimum price fluctuation may vary by trade type. Please see Table in Resolution 1 to this Chapter 18.

**Listing Cycle:** 1. The Exchange may list monthly contracts in the Standard Cycle or any other calendar month it determines for the current year and forward for up to ten years.

2. The Standard Cycle is: January, February, March, April, May, June, July, August, September, October, November and December

**Last Trading Day:** Three Business Days prior to the last Business Day of the delivery month

**Deliverable Instruments:** The deliverable instruments are California Carbon Allowances equal to the contract size delivered through the California MTS.

California Carbon Allowances acceptable for delivery are those issued as a limited authorization to emit up to one metric ton of CO<sub>2</sub> or CO<sub>2</sub> equivalent in the California Cap and Trade Program having a vintage corresponding to the specified vintage year and allowances having a vintage of any year prior to the specified vintage-year.

If the specified vintage year allowances do not exist in the California MTS at contract expiry, allowances of any prior vintage year or allowances of the earliest vintage year available in the California MTS shall be delivered.

**Registry:** California MTS

**MIC CODE:** IFED

**CLEARING VENUE:** ICEU

## **18.D.024 California Carbon Allowance Vintage Specific Future**

**Contract Description:** Physically delivered greenhouse gas emissions allowances where each is an allowance issued by the California Air Resources Board or a linked program (“California Carbon Allowance”) representing one metric ton of CO<sub>2</sub> equivalent under California Assembly Bill 32 "California Global Warming Solutions Act of 2006" and its associated regulations, rules and amendments, all together known as the "California Cap and Trade Program".

**Contract Symbol:** CA8: CCAS Vintage 2018, CA9: CCAS Vintage 2019, CC0: CCAS Vintage 2020, CCI: Vintage 2021, CC2: Vintage 2022, CC3: Vintage 2023, CC4: Vintage 2024, CCT: Vintage 2025; CCU: Vintage 2026

**Settlement Method:** Physical delivery

**Contract Size:** 1,000 California Carbon Allowances

**Currency:** USD

**Minimum Price Fluctuation:** The price quotation convention shall be One cent (\$0.01) per California Carbon Allowance; minimum price fluctuation may vary by trade type. Please see Table in Resolution 1 to this Chapter 18.

**Listing Cycle:** 1. The Exchange may list monthly contracts in the Standard Cycle or any other calendar month it determines for the current year and forward for up to ten years.  
2. The Standard Cycle is: January, February, March, April, May, June, July, August, September, October, November and December

**Last Trading Day:** Three Business Days prior to the last Business Day of the delivery month

**Deliverable Instruments:** The deliverable instruments are California Carbon Allowances equal to the contract size delivered through the California MTS.

California Carbon Allowances acceptable for delivery are those issued as a limited authorization to emit up to one metric ton of CO<sub>2</sub> or CO<sub>2</sub> equivalent in the California Cap and Trade Program having a vintage corresponding to the specified vintage year only.

**Registry:** California MTS

**MIC CODE:** IFED

**CLEARING VENUE:** ICEU

## **18.D.065 Pennsylvania Compliance Alternative Energy Credit Tier II Future**

**Description:** Physically delivered Pennsylvania Tier II Alternative Energy Certificates (“Pennsylvania Tier II REC”) where a Pennsylvania Tier II REC is an electronic certificate issued by PJM-GATS for qualifying generation.

**Contract Symbol:** PCT

**Settlement Method:** Physical delivery

**Contract Size:** 100 MWh representing 100 qualifying Tier II RECs

**Currency:** USD

**Minimum Price Fluctuation:** The price quotation convention shall be One cent (\$0.01) per MWh; minimum price fluctuation may vary by trade type

**Listing Cycle:** 1. The Exchange may list monthly contracts in the Standard Cycle or any other calendar month it determines for the current year and forward for up to ten years.

2. The Standard Cycle is: January, February, March, April, May, June, July, August, September, October, November and December

**Last Trading Day:** Three Business Days prior to the last Business Day of the delivery month.

**Deliverable Instruments:** Pennsylvania Tier II RECs eligible for delivery are those representing Tier II alternative energy sources (as defined in Pennsylvania Statutes Title 73 P.S. Trade and Commerce § 1648.2) which are eligible to meet the Tier II alternative energy source requirement of the Pennsylvania Alternative Energy Portfolio Standards Act as specified in Pennsylvania Statutes Title 73 Chapter 18F and issued by PJM GATs having a vintage or energy year designation that corresponds to the specified vintage of the expiring contract.

**Registry:** PJM GATS

**MIC Code:** IFED

**Clearing Venue:** ICEU

## **18.D.066 New Jersey Compliance Renewable Energy Certificate Class II Future**

**Description:** Physically delivered New Jersey Class II Renewable Energy Certificates (“New Jersey Class II REC”) where a New Jersey Class II REC is an electronic certificate issued by the PJM Environmental Information System Generation Attribute Tracking System (PJM GATS) for qualifying generation.

**Contract Symbol:** NJV

**Settlement Method:** Physical delivery

**Contract Size:** 100 MWh representing 100 New Jersey Class 2 RECs

**Currency:** USD

**Minimum Price Fluctuation:** The price quotation convention shall be One cent (\$0.01) per MWh; minimum price fluctuation may vary by trade type.

**Listing Cycle:** 1. The Exchange may list monthly contracts in the Standard Cycle or any other calendar month it determines for the current year and forward for up to ten years.

2. The Standard Cycle is: January, February, March, April, May, June, July, August, September, October, November and December

**Last Trading Day:** Three Business Days prior to the last Business Day of the delivery month.

**Deliverable Instruments:** New Jersey Class II RECs eligible for delivery are those which are eligible to meet the Class II Renewable Energy requirements specified in N.J.A.C. 14:8-2.6 under the New Jersey Renewable Energy Portfolio Standard promulgated under N.J.A.C. 14:8 verified and qualified by the NJ Board of Public Utilities having a vintage or energy year designation that corresponds to the specified vintage of the expiring contract.  
For deliveries of Class II RECs generated from a resource recovery facility located outside of the State of New Jersey, the seller must also deliver the Class II Renewable Energy Certification Form.

**Registry:** PJM GATS

**MIC Code:** IFED

**Clearing Venue:** ICEU

## **18.B.412 ERCOT Houston 345 KV Real-Time HE 1800-2200 Fixed Price Future**

**Description:** A monthly cash settled Exchange Futures Contract based upon the mathematical average of daily prices calculated by averaging the peak hourly electricity prices published by ERCOT for the location specified in Reference Price A.

**Contract Symbol:** ERB

**Settlement Method:** Cash settlement

**Contract Size:** 1 MW

**Currency:** USD

**Minimum Price Fluctuation:** The price quotation convention shall be One cent (\$0.01) per MWh; minimum price fluctuation may vary by trade type. Please see Table in Resolution 1 to this Chapter 18.

**Listing Cycle:** Up to 50 consecutive monthly contract periods, or as otherwise determined by the Exchange

**Last Trading Day:** The last Business Day prior to the Contract Period

**Final Settlement:** Reference Price A

### **REFERENCE PRICE A: ELECTRICITY-ERCOT-HOUSTON 345KV HUB-REAL TIME**

- a) **Ref Price A - Description:** "ELECTRICITY-ERCOT-HOUSTON 345KV HUB-REAL TIME" means that the price for a Pricing Date will be that day's Specified Price per MWh of electricity for delivery on the Delivery Date, stated in U.S. Dollars, published by the ERCOT at [http://www.ercot.com/content/cdr/html/real\\_time\\_spp](http://www.ercot.com/content/cdr/html/real_time_spp), or any successor headings where prices are published.
- b) **Ref Price A - Pricing Date:** Each Monday through Friday, excluding NERC holidays, that prices are reported for the Delivery Date
- c) **Ref Price A - Specified Price:** Average of SPPs for all hours ending 1800-2200 CPT
- d) **Ref Price A - Pricing calendar:** ERCOT
- e) **Ref Price A - Delivery Date:** Contract Period

**Final Payment Date:** The sixth Clearing Organization business day following the Last Trading Day

**MIC Code:** IFED

**Clearing Venue:** ICEU

## **18.B.413 ERCOT North 345 KV Real-Time HE 1800-2200 Fixed Price Future**

**Description:** A monthly cash settled Exchange Futures Contract based upon the mathematical average of daily prices calculated by averaging the peak hourly electricity prices published by ERCOT for the location specified in Reference Price A.

**Contract Symbol:** ERC

**Settlement Method:** Cash settlement

**Contract Size:** 1 MW

**Currency:** USD

**Minimum Price Fluctuation:** The price quotation convention shall be One cent (\$0.01) per MWh; minimum price fluctuation may vary by trade type. Please see Table in Resolution 1 to this Chapter 18.

**Listing Cycle:** Up to 50 consecutive monthly contract periods, or as otherwise determined by the Exchange

**Last Trading Day:** The last Business Day prior to the Contract Period

**Final Settlement:** Reference Price A

### **REFERENCE PRICE A: ELECTRICITY-ERCOT-NORTH 345KV HUB-REAL TIME**

- a) **Ref Price A - Description:** "ELECTRICITY-ERCOT-NORTH 345KV HUB-REAL TIME" means that the price for a Pricing Date will be that day's Specified Price per MWh of electricity for delivery on the Delivery Date, stated in U.S. Dollars, published by the ERCOT at [http://www.ercot.com/content/cdr/html/real\\_time\\_spp](http://www.ercot.com/content/cdr/html/real_time_spp), or any successor headings where prices are published.
- b) **Ref Price A - Pricing Date:** Each Monday through Friday, excluding NERC holidays, that prices are reported for the Delivery Date
- c) **Ref Price A - Specified Price:** Average of SPPs for all hours ending 1800-2200 CPT
