Washington, DC 20581

Re: New Option on Regional Greenhouse Gas Initiative Future Contract and Related Amendments (13 of 14)
Submission Pursuant to Section 5c(c)(1) of the Act and Regulation 40.2 and 40.6(a)

Dear Mr. Kirkpatrick:

Pursuant to Commission Regulations 40.2 and 40.6(a), ICE Futures U.S., Inc. (“Exchange”) submits, by written certification, new Rules 18.D.022 and 18.E.067 and amendments to 18.D.005 through 18.D.008, 18.D.011, 18.D.017, 18.D.018, 18.E.047, 18.E.059 through 18.E.062, Resolutions 1 and 2 of Chapter 18, and the Exchange’s Block Trade Procedures, which are codified in the Exchange’s Block Trade FAQ, as set forth in Exhibit A. The new rules and amendments provide for ten new environmental futures and seven new environmental options contracts, which will be listed on December 14, 2015.

Cross State Air Pollution TR NOx

The Cross State Air Pollution (“CSAPR”) TR NOx futures contracts call for the delivery of CSAPR TR NOx Trading Program Allowances. The Exchange currently lists futures and options on the CSAPR NOx Annual Allowance Future and the CSAPR NOx Ozone Season Allowance Future for vintage-year 2015. The term “vintage” identifies the compliance year for which an allowance is designated. Amendments to Exchange Rules 18.D.005 and 18.D.006 list futures for the 2016 vintage-year for both contracts. Amendments to Exchange Rules 18.E.059 and 18.E.060 list options on the 2016 vintage-year for these two contracts.

All contract specifications for the new CSAPR TR NOx futures, such as the contract size, listing cycle, IPL Amount (\$60.00), IPL Recalculation Time (3 seconds), IPL Hold Period (5 seconds) and NCR (\$10.00) match those for the CSAPR TR NOx futures vintages currently listed by the Exchange. The minimum block sizes of 4 lots for the new contracts are also set at the same level as existing vintages. The minimum price fluctuation has been set at \$0.01 for screen and block trades, which is consistent with similar environmental contracts currently listed by the Exchange. The spot month position limits for the new CSAPR TR NOx futures contracts—6,000 lots for the Annual and 3,000 lots for the Ozone Season—are set at levels that are consistent with the spot month position limits for similar environmental contracts currently listed by the Exchange.

All contract specifications for the new CSAPR TR NOx options, such as the contract size, listing cycle, minimum price fluctuation (\$0.01 for screen and block trades), IPL Amount (\$60.00), IPL Recalculation Time (3 seconds), IPL Hold Period (5 seconds) and NCR (20% of Premium FMV up to 10.00) match those for the CSAPR TR NOx option vintages currently listed by the Exchange. The

minimum block sizes of 4 lots for the new contracts are also set at the same level as existing vintages. Both new CSAPR TR NO_x options are subject to the position limit and accountability levels of the underlying futures contracts.

Cross State Air Pollution TR SO₂

The Cross State Air Pollution Rule TR SO₂ futures contracts call for the delivery of CSAPR TR SO₂ Trading Program Allowances. The Exchange currently lists a CSAPR SO₂ Group 1 Allowance Future and a CSAPR SO₂ Group 2 Allowance Future for vintage-year 2015. In addition, the Exchange currently lists options on both of those futures. Amendments to Exchange Rules 18.D.007 and 18.D.008 list futures for the 2016 vintage-year for these two contracts. Amendments to Exchange Rules 18.E.061 and 18.E.062 list options on the 2016 vintage-year for these two contracts.

All contract specifications for the new CSAPR SO₂ futures, such as the contract size, listing cycle, IPL Amount (\$60.00), IPL Recalculation Time (3 seconds), IPL Hold Period (5 seconds) and NCR (\$10.00) match those for the CSAPR SO₂ Group 1 and Group 2 Allowance futures vintages currently listed by the Exchange. The minimum block sizes of 4 lots for the new contracts are also set at the same level as existing vintages. The minimum price fluctuation has been set at \$0.01 for screen and block trades, which is consistent with similar environmental contracts currently listed by the Exchange. The spot month position limits for the new CSAPR SO₂ futures contracts—10,000 lots for Group 1 and 5,000 lots for Group 2—are set at levels that are consistent with the spot month position limits for similar environmental contracts currently listed by the Exchange.

All contract specifications for the new CSAPR SO₂ options, such as the contract size, listing cycle, IPL Amount (\$60.00), IPL Recalculation Time (3 seconds), IPL Hold Period (5 seconds) and NCR (20% of Premium FMV up to 10.00) match those for the CSAPR SO₂ Group 1 and Group 2 Allowance option vintages currently listed by the Exchange. The minimum block sizes of 4 lots for the new contracts are also set at the same level as existing vintages. The minimum price fluctuation has been set at \$0.01 for screen and block trades, which is consistent with similar environmental contracts currently listed by the Exchange. Both new CSAPR SO₂ options are subject to the position limit and accountability levels of the underlying futures contracts.

Massachusetts Compliance Renewable Energy Certificates Class 1 Vintage Future

The Exchange is listing one new vintage-year contract to supplement existing Massachusetts Class 1 Renewable Energy Certificates (“RECs”) futures contracts. These contracts call for the delivery of Massachusetts Class 1 RECs. Commencing in 2003, Massachusetts put in place legislation to require sellers of retail electricity to acquire certificates produced by renewable energy generation in amounts corresponding to their retail sales. Such certificates, known as RECs, are generated and physically traded on the electronic registry system maintained by the New England Power Pool (“NEPOOL”). The Exchange currently lists Massachusetts REC futures contracts which deliver annual vintages for the years 2015-2018. Amendments to Rule 18.D.017 list a Massachusetts Compliance REC Class 1 Vintage futures contract for vintage-year 2019.

All contract specifications for the new 2019 vintage-year contract, such as the contract size, listing cycle, minimum price fluctuation, NCR (\$1.00), IPL Amount (\$10.00), IPL Recalculation Time (3 seconds), and IPL Hold Period (5 seconds) match those for the existing Massachusetts Compliance REC Class 1 Vintage futures currently listed by the Exchange. In addition, the block trade minimum size is 50 lots, matching the existing vintages. Spot month position limits for the vintage-year 2019 contract—3,500 lots—are being set at levels that are consistent with the spot month position limits for similar environmental contracts currently listed by the Exchange.

New Jersey Compliance Renewable Energy Certificates Class 1 Vintage Future

The Exchange is listing two new vintage-year contracts, which supplement existing New Jersey Compliance REC futures contracts. These contracts call for the delivery of New Jersey Class 1 RECs. Like Massachusetts, New Jersey has a program which requires that retail sellers of electricity turn in a specified amount of RECs determined as a percentage of their retail sales. These RECs are generated and issued in the PJM Environmental Information System Generation Attribute Tracking System (“PJM GATS”). The Exchange currently lists New Jersey Compliance REC futures contracts which deliver annual vintages for the years 2015-2018. Amendments to Rule 18.D.018 list New Jersey Compliance REC Class 1 Vintage futures contracts for vintage-years 2019 and 2020.

All contract specifications for the new 2019 and 2020 vintage-year contracts, such as the contract size, listing cycle, minimum price fluctuation, NCR (\$0.25), IPL Amount (\$2.50), IPL Recalculation Time (3 seconds), and IPL Hold Period (5 seconds) match those for the existing New Jersey Compliance REC Class 1 Vintage futures currently listed by the Exchange. In addition, the block trade minimum size is 50 lots, matching the existing vintages. Spot month position limits for the vintage-year 2019 and 2020 contracts—3,500 lots—are being set at levels that are consistent with the spot month position limits for similar environmental contracts currently listed by the Exchange.

California Carbon Allowance

The California Carbon Allowance (“CCA”) futures contracts are carbon emission allowance contracts. The Exchange currently lists futures contracts for the 2013 through 2018 vintage-years. New Exchange Rule 18.D.022 lists the 2019 and 2020 vintage-years for the futures, while new Exchange Rule 18.E.064 list the 2019 and 2020 vintage-years for the options.

Most contract specifications for the new 2019 and 2020 vintage-year futures contracts, such as the contract size, listing cycle, minimum price fluctuation, NCR (\$0.25), IPL Amount (\$2.50), IPL Recalculation Time (3 seconds), and IPL Hold Period (5 seconds) match those for the existing CCA contracts listed by the Exchange. Similarly, the block trade minimum sizes of 10 lots are consistent with the minimum sizes for existing CCA vintages. The new contracts differ, however, from the contract under which existing vintages are listed in one respect. Specifically, the Exchange has removed provisions detailing the treatment of expiring contracts in the event the California Market Tracking System (“MTS”) were to be non-operational. In order to give the Exchange greater flexibility in achieving an equitable resolution, treatment of expiring vintage 2019 and 2020 futures contracts will be determined pursuant to Exchange Rule 6.01 if the California MTS becomes non-operational. The spot month position limits for the new CCA futures contracts—10,000 lots—are set at levels that are consistent with the spot month position limits for similar environmental contracts currently listed by the Exchange.

All contract specifications for the new CCA options, such as the contract size, listing cycle, IPL Amount (\$2.50), IPL Recalculation Time (3 seconds), IPL Hold Period (5 seconds) and NCR (20% of Premium FMV up to 0.25) match those for the CCA option vintages currently listed by the Exchange. The minimum block sizes of 10 lots for the new contracts are also set at the same level as existing vintages. The minimum price fluctuation has been set at \$0.01 for screen and block trades, which is consistent with similar environmental contracts currently listed by the Exchange. Finally, the new CCA options are subject to the position limit and accountability levels of the underlying futures contracts.

Regional Greenhouse Gas Initiative

The Regional Greenhouse Gas Initiative (“RGGI”) futures contracts are carbon emission allowance contracts. The Exchange currently lists RGGI futures contracts which deliver annual vintages for the years 2013-2016. Amendments to Exchange Rule 18.D.011 list a RGGI futures contract for the

vintage-year 2017. Amendments to Exchange Rule 18.E.047 list a RGGI options contract for the vintage-year 2017.

All contract specifications for the new 2017 vintage-year futures contract, such as the contract size, listing cycle, quotation basis, minimum price fluctuation, NCR (\$0.10), IPL Amount (\$1.00), IPL Recalculation Time (3 seconds), and IPL Hold Period (5 seconds) match those for the existing RGGI futures contracts currently listed by the Exchange. In addition, the Exchange Block Trade Procedures currently provide a minimum block size of 10 contracts for all RGGI futures. The spot month position limits for the new RGGI contracts—10,000 lots—are set at levels that are consistent with the spot month position limits for similar environmental contracts currently listed by the Exchange.

All contract specifications for the new 2017 vintage-year options contract, such as the contract size, listing cycle, quotation basis, minimum price fluctuation, NCR (20% of Premium FMV up to 0.10), IPL Amount (\$1.00), IPL Recalculation Time (3 seconds), and IPL Hold Period (5 seconds) match those for the existing RGGI futures contracts currently listed by the Exchange. In addition, the Exchange Block Trade Procedures currently provide a minimum block size of 10 contracts for all RGGI options contracts. The new RGGI option is subject to the position limit and accountability levels of the underlying futures contract.

Certifications

The new rules and rule amendments will become effective with the listing of the new physical environmental contracts on December 14, 2015. The Exchange is not aware of any substantive opposing views to the new physical environmental contracts. The Exchange certifies that the rule amendments comply with the requirements of the Act and the rules and regulations promulgated thereunder. The Exchange has reviewed the designated contract market core principles ("Core Principles") as set forth in the Act and has determined that the listing of the contract complies with the following relevant Core Principles:

COMPLIANCE WITH RULES

The terms and conditions of the new physical environmental contracts are set forth in new Rules 18.D.022 and 18.E.067 and amendments to 18.D.005 through 18.D.008, 18.D.011, 18.D.017, 18.D.018, 18.E.047, 18.E.059 through 18.E.062, Resolutions 1 and 2 of Chapter 18, and the Exchange's Block Trade Procedures, and will be enforced by the Exchange. In addition, trading of the contracts is subject to all relevant Exchange rules which are enforced by the Market Regulation Department.

CONTRACTS NOT READILY SUBJECT TO MANIPULATION

The new physical environmental futures and options contracts are not readily subject to manipulation as they are based on established and liquid underlying cash markets. In addition, trading of the new contracts will be monitored by the Market Regulation Department.

POSITION LIMITS OR ACCOUNTABILITY

Positions in the new physical environmental futures and options contracts will be subject to position limits set by the Exchange. As described above, such position limits for the new futures contracts are based upon existing levels set for substantially similar products. Positions in the options will be aggregated with the underlying futures contracts and subject to the position limits currently in place for the underlying futures contracts.

FINANCIAL INTEGRITY OF CONTRACTS

The new physical environmental contracts will be cleared by ICE Clear Europe, a registered derivatives clearing organization subject to Commission regulation, and carried by registered futures commission merchants qualified to handle customer business.

The Exchange further certifies that, concurrent with this filing, a copy of this submission was posted on the Exchange's website and may be accessed at (<https://www.theice.com/futures-us/regulation>).

18.D.005 Cross State Air Pollution TR NOx Annual Allowance Future

Contract Description: Physically delivered EPA Cross State Air Pollution (“CSAPR”) TR NOx Annual Trading Program Allowances (“U.S. EPA CSAPR TR NOx Annual Allowances”).

Contract Symbol: NAL: Vintage 2015, [NAN: Vintage 2016](#)

Settlement Method: Physical delivery

Contract Size: 5 U.S. EPA CSAPR TR NOx Annual Allowances (Vintage 2012)

25 U.S. EPA CSAPR TR NOx Annual Allowances (Vintage 2015 and after)

Currency: USD

Minimum Price Fluctuation: The price quotation convention shall be One cent (\$0.01) per U.S. EPA TR NOx Annual Allowance; minimum price fluctuation may vary by trade type. Please see Table in Resolution 1 to this Chapter 18

Listing Cycle: 1. Standard-cycle contract listings: Annual December expirations for the current year and forward for up to five consecutive years.
2. The Exchange may list any other calendar month contract sets off the standard-cycle listing schedule through the last expiring contract set.

Last Trading Day: Three Business Days prior to the last Business Day of the delivery month

Deliverable Instruments: Allowances acceptable for delivery are those designated as U.S. EPA CSAPR TR NOx Annual Allowances as promulgated under CSAPR having a vintage corresponding to the specified vintage and allowances having a vintage of any year prior to the specified vintage-year.

If the specified vintage year allowances do not exist in the allowance tracking system at contract expiry, allowances of any prior vintage year or allowances of the earliest vintage year available in the allowance tracking system shall be delivered.

Applicable for contracts with a 2015 vintage designation, allowances deliverable are only those having a 2015 vintage.

Registry: CAMD ATS

18.E.059 Option on Cross State Air Pollution Rule TR NO_x Annual Allowance Future - Vintage 2015 and After

Contract Description: An Option on the corresponding month of the U.S. EPA Cross State Air Pollution Rule NO_x Annual Allowance Future.

Contract Symbol: NAL: [Vintage 2015](#), NAN: [Vintage 2016](#)

Settlement Method: Exercise into Underlying Futures Contract

Contract Size: 1 Cross State Air Pollution Rule TR NO_x Annual Allowance Futures

Currency: USD

Minimum Price Fluctuation: The price quotation convention shall be One cent (\$0.01) per metric ton; minimum price fluctuation may vary by trade type. Please see Table in Resolution 1 to this Chapter 18.

Listing Cycle: 1. Standard-cycle contract listings: Annual December for the current year and forward three years.

2. The Exchange may list any other calendar month contract sets off the standard-cycle listing schedule through the last expiring contract set.

Strike Price Intervals: A minimum of ten Strike Prices in increments of \$5.00 above and below the at-the-money Strike Price. Strike Price boundaries are adjusted according to futures price movements. User-defined Strike Prices are allowed in \$5.00 increments.

Last Trading Day: At 4:00pm EPT on the 15th calendar day of the delivery month. Where the 15th calendar day is not a Business Day, the Last Trading Day shall be the first Business Day following the 15th calendar day of the delivery month.

Option Style: European

Exercise Method: Automatic

Exercise Procedure: Clearing Members shall provide exercise and abandon instructions to the Clearing Organization in accordance with the Clearing Organization rules

Exercise Time: 5:30 pm EPT on the Last Trading Day

18.D.006 Cross State Air Pollution TR NOx Ozone Season Allowance Future

Contract Description: Physically delivered EPA Cross State Air Pollution (“CSAPR”) TR NOx Ozone Season Trading Program Allowances (“U.S. EPA CSAPR TR NOx Ozone Season Trading Program Allowance”).

Contract Symbol: NON: Vintage 2015, NOO: Vintage 2016

Settlement Method: Physical delivery

Contract Size: 5 U.S. EPA CSAPR TR NOx Ozone Season Trading Program Allowances (Vintage 2012)

25 U.S. EPA CSAPR TR NOx Ozone Season Trading Program Allowances (Vintage 2015 and after)

Currency: USD

Minimum Price Fluctuation: The price quotation convention shall be One cent (\$0.01) per U.S. EPA CSAPR TR NOx Ozone Season Trading Program Allowance; minimum price fluctuation may vary by trade type. Please see Table in Resolution 1 to this Chapter 18.

Listing Cycle: 1. Standard-cycle contract listings: Annual December expirations for the current year and forward for up to five consecutive years.

2. The Exchange may list any other calendar month contract sets off the standard-cycle listing schedule through the last expiring contract set.

Last Trading Day: Three Business Days prior to the last Business Day of the delivery month

Deliverable Instruments: Allowances acceptable for delivery are those designated as U.S. EPA CSAPR TR NOx Ozone Season Trading Program Allowances as promulgated under CSAPR having a vintage corresponding to the specified vintage and allowances having a vintage of any year prior to the specified vintage-year.

If the specified vintage year allowances do not exist in the allowance tracking system at contract expiry, allowances of any prior vintage year or allowances of the earliest vintage year available in the allowance tracking system shall be delivered.

Applicable for contracts with a 2015 vintage designation, allowances deliverable are only those having a 2015 vintage.

Registry: CAMD ATS

18.E.060 Option on Cross State Air Pollution Rule TR NOx Ozone Season Allowance Future - Vintage 2015 and After

Contract Description: An Option on the corresponding month of the U.S. EPA Cross State Air Pollution Rule NOx Ozone Season Allowance Future.

Contract Symbol: NON: [Vintage 2015](#), NOO: [Vintage 2016](#)

Settlement Method: Exercise into Underlying Futures Contract

Contract Size: 1 Cross State Air Pollution Rule TR NOx Ozone Season Allowance Futures

Currency: USD

Minimum Price Fluctuation: The price quotation convention shall be One cent (\$0.01) per metric ton; minimum price fluctuation may vary by trade type. Please see Table in Resolution 1 to this Chapter 18.

Listing Cycle: 1. Standard-cycle contract listings: Annual December expirations for the current year and forward three years.
2. The Exchange may list any other calendar month contract sets off the standard-cycle listing schedule through the last expiring contract set.

Strike Price Intervals: A minimum of ten Strike Prices in increments of \$5.00 above and below the at-the-money Strike Price. Strike Price boundaries are adjusted according to futures price movements. User-defined Strike Prices are allowed in \$5.00 increments.

Last Trading Day: At 4:00pm EPT on the 15th calendar day of the delivery month. Where the 15th calendar day is not a Business Day, the Last Trading Day shall be the first Business Day following the 15th calendar day of the delivery month.
