Submission No. 20-156 (4 of 10)  
November 27, 2020

Mr. Christopher J. Kirkpatrick  
Secretary of the Commission  
Office of the Secretariat  
Commodity Futures Trading Commission  
Three Lafayette Centre  
1155 21<sup>st</sup> Street, NW  
Washington, DC 20581

**Re: New MSCI Hong Kong NTR Index Futures Contract (4 of 10)  
Submission Pursuant to Section 5c(c)(1) of the Act and Regulation 40.2**

Dear Mr. Kirkpatrick:

Pursuant to Commission Regulation 40.2, ICE Futures U.S., Inc. (“Exchange” or “IFUS”) submits, by written certification, the amendments to Chapter 23, Rule 6.25, the No-Cancellation Range (“NCR”) and Reasonability Limit tables and the Interval Price Limit table, as set for the in Exhibits B and C, which provide for the listing of ten new MSCI equity index futures contracts.

The Exchange currently lists a number of futures contracts based on various broad based MSCI equity indexes. IFUS will add to that group by listing the following new MSCI equity index futures contracts:

Contract Name	Contract Size	Minimum Tick (Index Points)	Accountability Level (Single Month)	Position Limit (All Months)
MSCI Australia NTR Index Futures	\$10 x Index	1 Index Point = \$10.00 Block Trades can be done at .001 Index Points	10,000 Contracts	50,000 Contracts
MSCI China Technology ADR and P-Chip NTR Index Futures	\$10 x Index	.10 Index = \$1.00 Block Trades can be done at .001 Index Points	20,000 Contracts	100,000 Contracts
MSCI Europe Climate Change NTR Index Futures	€20 x Index	0.1 Index Point = €20 Block Trades can be done at .001 Index Points	50,000 Contracts	200,000 Contracts
MSCI Hong Kong NTR Index Futures	\$1 x Index	1 Index = \$1.00 Block Trades can be done at .001 Index Points	10,000 Contracts	20,000 Contracts
MSCI KOKUSAI GTR Index Futures	¥ 1,000 x Index	0.100 Index points = ¥ 100 Block Trades can be done at .001 Index points	20,000 Contracts	100,000 Contracts
MSCI Malaysia NTR USD Index Futures	\$100 x Index	.10 Index Point = \$10.00 Block Trades can be done at .001 Index Points	10,000 Contracts	20,000 Contracts

MSCI Thailand NTR Index Futures	\$25 x Index	0.10 Index Points = \$2.50 Block Trades can be done at .001 Index Points	10,000 Contracts	20,000 Contracts
MSCI World Climate Change NTR Index Futures	\$20 x Index	.1 Index Point = \$20.00 Block Trades can be done at .001 Index Points	20,000 Contracts	100,000 Contracts
MSCI World Low Carbon Leaders NTR Index Futures	\$10 x Index	1 Index Point = \$10.00 Block Trades can be done at .001 Index Points	20,000 Contracts	100,000 Contracts
MSCI World Low Carbon Target NTR Index Futures	\$10 x Index	1 Index Point = \$10.00 Block Trades can be done at .001 Index Points	20,000 Contracts	100,000 Contracts

Each futures contract is based on an existing MSCI Index. The MSCI Australia NTR Index Future is based on the MSCI Australia NTR Index. First listed in 1986, the index represents large and mid-capitalization performance in the Australian market.<sup>1</sup> The index is currently comprised of 64 different constituents or companies, which together cover approximately 85% of the highest performance rated companies in the large and mid-cap segments of the Australian market.

The MSCI China Technology ADR and P-Chip NTR Index Futures is based on the MSCI China Technology ADR and P-Chip NTR Index. First listed in 2015, the index aims to track the performance of Chinese companies represented by Depository Receipts listed on NYSE, NASDAQ or London Stock Exchange and P-Chips that generate revenue from technology related activities<sup>2</sup>. The index is currently comprised of 31 different constituents or companies, which aims to increase diversification by capping the weight of individual constituent securities within the MSCI China Index, its parent Index.<sup>3</sup>

The Exchange currently lists futures contracts based on the MSCI Europe Index, MSCI Europe NTR Index and MSCI Europe ESG Leaders NTR Index and is now listing a futures contract based on the MSCI Europe Climate Change NTR Index.<sup>4</sup> First listed in 2019, the index currently comprised of 423 different constituents or companies, is a subset of the MSCI Europe Index<sup>5</sup> that re-weights securities based on opportunities and risks associated with lower carbon economy transitioning, while minimizing exclusions from the parent index. The parent index includes large and mid-capitalization companies across 15 Developed Market countries in Europe.<sup>6</sup>

The MSCI Hong Kong NTR Index Futures Contract is based on the MSCI Hong Kong NTR Index. First listed in 1986, the index represents large and mid-capitalization performance in the Hong Kong market.<sup>7</sup> The index is currently comprised of 40 different constituents or companies, which together cover approximately 85% of the highest performance rated companies in the large and mid-cap segments of the Hong Kong market.

The MSCI Kokusai GTR Index Futures Contract is based on the MSCI Kokusai GTR Index. First listed in 1986, the index represents large and mid-capitalization companies across 22 of 23 Developed Market countries (excluding Japan).<sup>8</sup> The index is currently comprised of 1,281 different constituents or

companies, which together cover approximately 85% of the free float-adjusted market capitalization in each country.

The MSCI Malaysia NTR USD Index Futures Contract is based on the MSCI Malaysia NTR USD Index. First listed in 1988, the index represents large and mid-capitalization performance in the Malaysian market.<sup>9</sup> The index is currently comprised of 40 different constituents or companies, which together cover approximately 85% of the highest performance rated companies in the large and mid-cap segments of the Malaysian market.

The MSCI Thailand NTR Index Futures Contract is based on the MSCI Thailand NTR Index. First listed in 2001, the index represents large and mid-capitalization performance in the Thailand market.<sup>10</sup> The index is currently comprised of 43 different constituents or companies, which together cover approximately 85% of the highest performance rated companies in the large and mid-cap segments of the Thailand market.

The Exchange currently lists future contracts based on the MSCI World Index, MSCI World Net Total Return (NTR) Index, MSCI World ESG Leaders NTR Index and is now listing futures contracts based on the MSCI World Climate Change NTR Index, MSCI World Low Carbon Leaders NTR Index and the MSCI World Low Carbon Target NTR Index Futures. First listed in 2019 the MSCI World Climate Change NTR Index is a subset of the MSCI World Index and represents the performance of an investment strategy that re-weights securities based on the opportunities and risks associated with transitioning to a lower carbon economy, in large and mid-capitalization companies across the 23 DM countries. The index is currently comprised of 1,561 different constituents or companies, which aims to reduce exposure to companies with transition risks and increase exposure to companies with transition opportunities within the parent Index.<sup>11</sup>

First listed in 2014, the MSCI World Low Carbon Leaders NTR Index is also a subset of the MSCI World Index which seeks to limit client exposure to carbon risk by excluding companies with the highest carbon emissions intensity and the largest owners of carbon reserves per dollar of market capitalization, with the intention of reducing its carbon footprint by at least 50%. in large and mid-capitalization companies across the 23 DM countries. The index is currently comprised of 1,256 different constituents or companies within the parent Index.<sup>12</sup>

Finally, the MSCI World Low Carbon Target NTR Index, which was first listed in 2015, is also a subset of the MSCI World Index which seeks to overweight companies with low carbon emissions with a tracking error target of 30 basis points while minimizing the carbon exposure, in large and mid-capitalization companies across the 23 DM countries. The index is currently comprised of 1,361 different constituents or companies, which aims to reduce exposure to companies with low carbon emissions (relative to sales) and those with low potential carbon emissions (per dollar of market capitalization) within the parent Index.<sup>13</sup>

Contract specifications for each of the ten new futures contracts are similar to those of the existing IFUS MSCI Index futures contracts: each is cash settled at expiration using a final settlement price derived from the underlying MSCI Index; listed contract months, trading hours, daily settlement window, last trading day and last trading day hours and Exchange and Clearing fees match the respective terms of the existing contracts. The index multiplier for each futures contract is set forth in the table above. In addition, the NCR levels and Reasonability Limits, as well as the Interval Price Limits for the new MSCI equity

index futures contracts are in-line with the levels for the current equity index futures listed by the Exchange and are set forth on the Exchange's website. Copies of the relevant tables are attached in Exhibit C

The new contracts are subject to the position limits and position accountability levels, which are set forth in amended Exchange Rule 6.25(b). For the purpose of determining positions for the new MSCI Europe Climate Change NTR Index Futures, the Exchange will combine all long and short positions in related MSCI Europe Index Futures and Options Contracts. For the purpose of determining positions for the new MSCI World Climate Change NTR Index Futures, MSCI World Low Carbon Leaders NTR Index Futures and MSCI World Low Carbon Target NTR Index Futures, the Exchange will combine all long and short positions in related MSCI World Index Futures and Options Contracts. Participants exceeding the accountability level of the new MSCI Contracts: (i) automatically consent not to increase further and automatically consent to decrease those positions when so ordered by the Exchange acting in its own discretion and (ii) shall provide, in a timely manner, information on the nature of that participant's related cash position, Exchange Futures and Options position, trading strategy and/or hedging strategy and such other relevant information as the Exchange may require.

### **Certifications**

The amendments will become effective with the listing of the new MSCI equity index contracts on or about December 14, 2020, or such other date as the Exchange shall determine, which shall be no sooner than the second business day following the day on which this submission is filed. The Exchange is not aware of any substantive opposing views to the new contracts. The Exchange certifies that the rule amendments comply with the requirements of the Act and the rules and regulations promulgated thereunder. The Exchange has reviewed the designated contract market core principles ("Core Principles") as set forth in the Act and has determined that the listing of the contracts complies with the following relevant Core Principles:

#### **COMPLIANCE WITH RULES**

The terms and conditions of the new MSCI equity index contracts will be enforced by the Exchange and are set forth in Chapter 23 and Rule 6.25, and the no-cancellation range ("NCR") table posted on the Reasonability Limits and NCR page on the Exchange's website as well as the Interval Price Limits table on the site. In addition, trading of the contracts is subject to all relevant Exchange rules which are enforced by the Market Regulation Department.

#### **CONTRACTS NOT READILY SUBJECT TO MANIPULATION**

The new contracts are not readily subject to manipulation as they are based on liquid underlying broad-based equity indexes which are widely traded. In addition, trading of the new contracts will be monitored by the Exchange's Market Regulation Department.

#### **POSITION LIMITS OR ACCOUNTABILITY**

Positions in the new MSCI equity index contracts will be subject to the single month accountability levels and all-months combined position limits set by the Exchange. Such accountability levels and position limits are based upon the deliverable supply in the cash market. Position accountability levels and limits are based upon the deliverable supply in the cash market. A detailed deliverable supply analysis accompanies this submission as Exhibit D<sup>14</sup>.

---

<sup>14</sup> In accordance with CFTC Regulation 40.8, the Exchange has filed a request for confidential treatment of Exhibit D.

**FINANCIAL INTEGRITY OF CONTRACTS**

The new contracts will be cleared by ICE Clear U.S., a registered derivatives clearing organization subject to Commission regulation, and carried by registered futures commission merchants qualified to handle customer business.

The Exchange further certifies that, concurrent with this filing, a copy of this submission was posted on the Exchange's website and may be accessed at (<https://www.theice.com/futures-us/regulation#rule-filings>).

**For any Oil or NGL future not listed above the following NCR's are applied:**

Contract	NCR 1-6M	Spread	NCR 7M+	Spread
Oil (Barrels or lbs)	0.2500	0.2000	0.2000	0.2000
Oil (MT)	0.7500	0.5000	1.5000	1.0000
Oil (Gallons)	0.0080	0.0080	0.0080	0.0080
Oil (RIN)	0.0200	0.0200	0.0200	0.0200

  

Contract	Pricing Month	Month	Spread	Quarters	Spread	Calendar	Spread
NGL (North American) (Gallons) **	0.0025	0.0050	0.0050	0.0050	0.0050	0.0050	0.0050
Olefins	N/A	0.0050	0.0050	0.0050	0.0050	0.0050	0.0050
Aromatics	N/A	0.0100	0.0100	0.0100	0.0100	0.0100	0.0100
LPG (International) (MT)	N/A	5.00	5.00	5.00	5.00	5.00	5.00

\*\*For all trades executed after five US business days into the current pricing month, NCR shall be \$0.0025/gallon.

Oil and NGL Options	No Cancellation Range	Minimum Value NCR - Conversions and Reversals	Maximum Value
Natural Gas Liquids	25% of premium	0.0050	0.0250
LPG (International) (MT)	25% of premium	0.0625	0.3125
All Other Oil Options	25% of premium	0.1000	1.00
WTI Options	25% of premium	0.1000	1.00
Gasoil Options	25% of premium	0.1000	10.00
Heating Oil Options	25% of premium	0.0010	0.0200

The preferred resolution for option trades, excluding Conversions and Reversals, executed greater than 3 \* NCR from fair market value is Trade Cancellation.

User Defined Strategies (UDS) will be evaluated on the basis of the strategy unless there are implied deals in which case each leg of the UDS will be evaluated independently.

<i>*Note that for Cocoa options (which do not trade in decimal points) the respective Theoretical Value Ranges are "1 to 20 points, 21 to 200 points, 201 to 500 points, 501 to 1000 points, and 1001 points and above.</i>						
<i>NCR and Reasonability Limits are for both outright options and User Defined Spread trades, including hedged trades; for purposes of NCR and RL levels, UDS and hedged UDS are treated as a package and not by the individual legs of the UDS.</i>						
<i>In the case of price adjustment, Market Supervision will adjust to fair value minus/plus the NCR.</i>						

NOTE: Market Supervision staff has the authority to expand the No Cancellation Range and Reasonability Limit for a product to two (2) times the levels shown above in volatile market conditions and without prior notice.

#### No Cancellation Range and Reasonability Level for Canola Options

	No Cancellation Range	Reasonability Limit
Outright Options	30% from fair value as determined by the Exchange, with a minimum of \$1.00 and a maximum of \$4.00. Options with a value of less than \$1.00 are \$0.00.	40% from fair value as determined by the Exchange, with a minimum of \$2.00.
Calendar Spread Options	30% from fair value as determined by the Exchange and with a minimum of \$1.00 and a maximum of \$4.00. Options with a value of less than \$1.00 are \$0.00.	None.

#### No Cancellation Ranges and Reasonability Levels for Metal Options:

The NCR shall be 20% of the option premium, subject to a minimum of 50 ticks and a maximum of 250 ticks. The RL shall be three times the NCR of the option.

#### No Cancellation Ranges and Reasonability Levels for Bakkt Bitcoin (USD) Monthly Futures Options:

The NCR shall be 30% of the option premium, subject to a minimum of \$25 and a maximum of \$200. The RL shall be 40% of fair value as determined by the Exchange.

#### No Cancellation Range for Option Conversions and Option Boxes:

Option Conversions and Option Boxes will be subject to the lowest NCR stated for the market in which they are traded.

A long Option Conversion shall be defined as combining long calls, short puts and short futures. A short Option Conversion shall be defined as combining long puts, long futures and short calls. The Option conversion must contain the same expiry, strikes prices and quantity.

An Option Box shall be defined as combining a position that is long a call and short a put in strike 1 and long a put and short a call in strike 2. The Option Box must contain the same expiry and quantity in both strike 1 and strike 2 for both calls and puts.

The Exchange reserves the right to consider all alleged error trade situations on their individual merits and may therefore amend these policies in light of the circumstances of each case. The full Error Policy can be found in IFUS Electronic Trading Rules, on the web at: [https://www.theice.com/publicdocs/rulebooks/futures\\_us/--Appendix\\_1\\_Error\\_Trade\\_Policy.pdf](https://www.theice.com/publicdocs/rulebooks/futures_us/--Appendix_1_Error_Trade_Policy.pdf).

The descriptions of Anchor Price, No Cancellation Range, Reasonability Limits and Calendar Spread Limit Order Range below are taken from the IFUS Error Policy.

### **Anchor Price**

The Anchor Price is set by the Exchange and is based on the front contract month, however, when the front month nears expiration, the Anchor Price will be based on the delivery month with the most open interest. The determination as to when to shift the Anchor Price based on open interest will be made by the Exchange. The Anchor Price may be the previous night's settlement price, the opening call price or the last traded price. The Anchor Price of the second contract month and successive months onward is achieved by applying spread differentials against the front month Anchor Price.

### **No Cancellation Range**

The Exchange determines parameters above or below an Exchange set anchor price for each Contract within which a trade alleged as an error trade may not be cancelled. Such parameters are known as a no cancellation range.

Trades within the no cancellation range will not, under most circumstances, be cancelled by the Exchange, whether as a result of error or otherwise, in order that market users can have confidence that traded levels will stand.

### **Reasonability Limits**

The ETS maintains Reasonability Limits to prevent 'fat finger' type errors. These are hard limits above or below an Exchange set anchor price. Orders with bids above the Reasonability Limit or offers below the Reasonability Limit will not be accepted.

Each option order submitted to the electronic trading platform will be evaluated against a reasonability limit for the specific call or put option strike price. A reasonability limit range will be established around the theoretical premium value for each option call or put. The theoretical premium value will be calculated using the Black - Scholes model and will dynamically update throughout the day. The reasonability limit range will allow for entry of bids or offers within a calculated distance from the option's current theoretical premium value. This Option Reasonability Range is the distance above/below the calculated option theoretical premium used

to establish the reasonability limits. This range is determined by the Exchange and is subject to change without notice. For Options with little theoretical value (deep out-of-the money), a minimum premium price established by the Exchange will be used. If the theoretical price of the Option plus the Option Reasonability Range is less than the minimum premium, the minimum premium will be used as the Reasonability Limit. The Reasonability Limits for each Exchange Commodity Contract are flexible, to take into account prevailing market conditions, and may be changed at the discretion of the Exchange on an intraday basis, without advance notice, to take account of such conditions.

Reasonability Limits are applicable during the pre-open period for all IFUS futures contracts (except for Natural Gas, Power and Emissions contracts), at levels up to three times the levels shown in this document. Entry of new and revisions to existing option orders are not permitted during the pre-open period, and therefore Reasonability Limits are not applicable to IFUS option contracts during the pre-open.

**Calendar Spread Limit Order Range**

The CSLOR is used to set the maximum difference between the stop and limit prices on a calendar spread Stop Limit order, and the limit price on a calendar spread Stop With Protection order.

## INTERVAL PRICE LIMIT FUNCTIONALITY

With IPL levels as of [~~November 23~~  
December 14, 2020]

IPL functionality acts as a temporary circuit breaker feature on the electronic platform, to diminish the likelihood and extent of short-term price spikes or aberrant market moves. While it is designed to be in force throughout each trading day, it is expected that the protections will be actively triggered only in the case of extreme price moves over very short periods of time. The IPL regime uses three customizable parameters for each futures product:

1. **IPL Recalculation Time:** A pre-set length of time during which the price of a contract month may not move up or down more than the IPL Amount (defined below) from the contract price at the start of the period. This starting price is referred to as the “anchor price”. The IPL Recalculation Time continuously resets for the length of time applicable to the particular futures contract.
2. **IPL Amount:** The maximum number of points that a contract month is permitted to move up or down during each IPL Recalculation Time for the contract. The anchor price plus/minus the IPL amount effectively creates an IPL range for the contract for the IPL Recalculation Time.
3. **IPL Hold Period:** When the platform determines that the next trade in the contract month will be at a price that is outside the active IPL range, the platform triggers a Hold Period, during which the price of the contract is not permitted to trade outside the IPL range that was in place at the start of the IPL Hold Period. The length of the Hold Period is pre-set. When a Hold Period is triggered, the platform will issue an alert notifying users that a Hold Period has begun and specifying the time the Hold Period will end.

IPL parameters can be changed over time based on market conditions; more information on IPL functionality can be found at:

[https://www.theice.com/publicdocs/technology/IPL\\_Circuit\\_Breaker.pdf](https://www.theice.com/publicdocs/technology/IPL_Circuit_Breaker.pdf).

Current IPL Recalculation Times, Amounts and Hold Period for all IFUS products are shown below:

**Agricultural, Metal and Financial Index contracts:**

FUTURES CONTRACT	IPL Amount (in points)	Recalc Time (in secs)	Hold Period (in secs)
