Re: KalshiEX LLC – CFTC Regulation 40.2(a) Notification Regarding the Initial Listing of the “What will the COVID-19 caseload be in <country>?” Contract

Dear Sir or Madam,

Pursuant to Section 5c(c) of the Commodity Exchange Act and Section 40.2(a) of the regulations of the Commodity Futures Trading Commission, KalshiEX LLC (Kalshi) hereby notifies the Commission that it is self-certifying the “What will the COVID-19 caseload be in <country>?” contract (Contract).

This contract is substantively very similar to the CASE and WKCASE contracts, with the main salient difference being that the source agency is the European Centre for Disease Control and Prevention (ECDC) reporting on European country caseloads, instead of the Centers for Disease Control and Prevention reporting on the U.S. caseload. The Exchange intends to broadly issue these contracts on a weekly basis for larger countries, though it may issue contracts on a longer time-frame according to the needs of its members. The Contract’s terms and conditions (Appendix A) includes the following strike conditions:

- <date_start>, <date_end>, <expo_date>
- <number>
- <country>

Along with this letter, Kalshi submitted the following documents:

- A concise explanation and analysis of the Contract;
- Certification;
- Appendix A with the Contract’s Terms and Conditions;
- Confidential Appendices with further information; and
- A request for FOIA confidential treatment.

If you have any questions, please do not hesitate to contact me.

Sincerely,

Elie Mishory
Chief Regulatory Officer
KalshiEX LLC
emishory@kalshi.com

KalshiEX LLC

New Contract Submission: “What will the COVID-19 caseload be in <country>?”

Ticker: EUCOV

Kalshi Contract Category: Econ/Demographic Measure (Non-U.S. Government Measure)

European COVID-19 Caseloads

December 12, 2021

CONCISE EXPLANATION AND ANALYSIS OF THE PRODUCT AND ITS COMPLIANCE WITH APPLICABLE PROVISIONS OF THE ACT, INCLUDING CORE PRINCIPLES AND THE COMMISSION'S REGULATIONS THEREUNDER

Pursuant to Commission Rule 40.2(a)(3)(v), the following is a concise explanation and analysis of the product and its compliance with the Act, including the relevant Core Principles, and the Commission's regulations thereunder.

I. Introduction

The EUCOV Contract is a contract relating to the COVID-19 caseload in various European countries. After careful analysis, Kalshi (hereafter referred to as “Exchange”) has determined that the Contract complies with its vetting framework, which has been reviewed by the CFTC and formed part of the Exchange’s application for designation as a Contract Market (“DCM”) that was approved by the Commission.

While many European countries, like Italy, were some of the earliest sites of major COVID-19 outbreaks, Europe tended to have substantially lower caseloads than the United States for much of the pandemic. Starting in fall 2021, that began to change. In mid-September, the United States had almost 4x more cases per capita than Germany; however, on November 23, Germany had more than twice as many cases per capita as the United States.¹² As a result, many countries including Austria have re-imposed strict COVID-19 lockdowns.³ This contract provides U.S. firms and individuals with exposure to European countries’ economies the ability to hedge against the risk of a sustained COVID-19 surge.

Further information about the Contract, including an analysis of its risk mitigation and price basing utility, as well as additional considerations related to the Contract, is included in Confidential Appendices B, C, and D.

Pursuant to Section 5c(c) of the Act and CFTC Regulations 40.2(a), the Exchange hereby certifies that the listing of the Contract complies with the Act and Commission regulations under the Act.

General Contract Terms and Conditions: The Contract operates similar to other binary contracts that the Exchange lists for trading. The minimum price fluctuation is \$0.01 (one cent). Price bands will apply so that Contracts may only be listed at values of at least \$0.01 and at most \$0.99. Further, the Contract is sized with a one-dollar notional value and has a minimum price fluctuation of \$0.01 to enable Members to match the size of the contracts purchased to their economic risks. The Exchange has further imposed position limits (defined as maximum loss exposure) of \$25,000 USD on the Contract. As outlined in Rule 5.12 of the Rulebook, trading shall be available at all times outside of any maintenance windows, which will be announced in advance by the Exchange. Members will be charged fees in accordance with Rule 3.6 of the Rulebook. Fees are charged in such amounts as may be revised from time to time to be reflected on the Exchange's Website. Additionally, as outlined in Rule 7.2 of the Rulebook, if any event or any circumstance which may have a material impact on the reliability or transparency of a Contract's Source Agency or the Underlying related to the Contract arises, Kalshi retains the authority to designate a new Source Agency and Underlying for that Contract and to change any associated Contract specifications after the first day of trading. That new Source Agency and Underlying would be objective and verifiable. Kalshi would announce any such decision on its website. All instructions on how to access the Underlying are non-binding and are provided for convenience only and are not part of the binding Terms and Conditions of the Contract. They may be clarified at any time. Furthermore, the Contract's payout structure is characterized by the payment of an absolute amount to the holder of one side of the option and no payment to the counterparty. During the time that trading on the Contract is open, Members are able to adjust their positions and trade freely. After trading on the Contract has closed, the Expiration Value and Market Outcome are determined. The market is then settled by the Exchange, and the long position holders and short position holders are paid according to the Market Outcome. In this case, "long position holders" refers to Members who purchased the "Yes" side of the Contract and "short position holders" refers to Members who purchased the "No" side of the Contract. If the Market Outcome is "Yes," meaning that the average number of COVID-19 cases in the statistical period is more than the strike amount (please see Appendix A for the legally binding terms and conditions), then the long position holders are paid an absolute amount proportional to the size of their position and the short position holders receive no payment. If the Market Outcome is "No," then the short position holders are paid an absolute amount proportional to the size of their position and the long position holders receive no payment. Specification of the

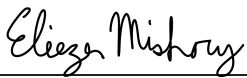

circumstances that would trigger a Market Outcome of “Yes” are included below in the section titled “Payout Criterion” in Appendix A.

**CERTIFICATIONS PURSUANT TO SECTION 5c OF THE COMMODITY
EXCHANGE ACT, 7 U.S.C. § 7A-2 AND COMMODITY FUTURES TRADING
COMMISSION RULE 40.2, 17 C.F.R. § 40.2**

Based on the above analysis, the Exchange certifies that:

- The Contract complies with the Act and Commission regulations thereunder.
- This submission (other than those appendices for which confidential treatment has been requested) has been concurrently posted on the Exchange's website at <https://kalshi.com/regulatory/filings>.

Should you have any questions concerning the above, please contact the exchange at ProductFilings@kalshi.com.

Appendix C (Confidential) - Source Agency

Appendix D (Confidential) - Compliance with Core Principles

APPENDIX A – CONTRACT TERMS AND CONDITIONS

TERMS OF CONTRACTS TRADED ON KALSHI

Official Product Name: “What will the COVID-19 caseload be in <country>?”

Ticker and Rulebook: EUCOV

EUCOV

Scope: These rules shall apply to the EUCOV contract.

Underlying: The Underlying for this Contract is the number of new COVID-19 cases for each day in the period between <date_start> and <date_end> for <country> as reported by the European Centre for Disease Prevention and Control (ECDC). If there is no data for a single day, that data is excluded from the calculation of the Expiration Value. Revisions to the Underlying made after Expiration will not be accounted for in determining the Expiration Value.

Instructions: Daily case data per country is available for download at <https://www.ecdc.europa.eu/en/publications-data/data-daily-new-cases-covid-19-eueea-country>. Please download and load using supported software, which includes Excel, Google Sheets, R and Stata. The first column contains the date (please note that it's using the DD/MM/YYYY format). Cases are in the column titled "cases". The name of the geographical unit is available in the column titled "countriesAndTerritories". These instructions on how to access the Underlying are provided for convenience only and are not part of the binding Terms and Conditions of the Contract. They may be clarified at any time.

Source Agency: The Source Agency is the European Centre for Disease Prevention and Control.

Type: The type of Contract is a Binary Contract.

Issuance: The Contract is based on the outcome of a recurrent data release, which is issued on a daily basis. The Exchange intends to broadly issue these contracts on a weekly basis for larger countries, though it may issue contracts on a longer timeframe according to the needs of its members.

Number: Kalshi may list iterations of the Contract with <number> levels that fall within an inclusive range between a maximum value of <150,000,000> and a minimum value of <0> at consecutive increments of <0.1>. Due to the potential for variability in the Underlying, the Exchange may modify <number> levels in response to suggestions by Members.

Date_start: <date_start> refers to a calendar date specified by Kalshi. Kalshi may list iterations of the Contract corresponding to different statistical periods of <date_start>.

Date_end: <date_end> refers to a calendar date specified by Kalshi. Kalshi may list iterations of the Contract corresponding to different statistical periods of <date_end>.

Expo_date: <expo_date> refers to a calendar date specified by Kalshi. Kalshi may list iterations of the Contract corresponding to different statistical periods of <expo_date>.

Country: <country> refers to a geographical unit whose data is reported by the ECDC. At time of listing, that includes Austria, Belgium, Bulgaria, Croatia, Cyprus, Czechia, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain and Sweden.

Payout Criterion: The Payout Criterion for the Contract encompasses the Expiration Values that are strictly greater than <number>.

Minimum Tick: The Minimum Tick size for the referred Contract shall be \$0.01.

Position Limit: The Position Limit for the \$1 referred Contract shall be \$25,000 per Member.

Last Trading Date: The Last Trading Date of the initial iteration of the Contract will be the same day as the Expiration Date. The Last Trading Time will be the same as the Expiration time.

Settlement Date: The Settlement Date of the initial iteration of the Contract shall be no later than the day after the Expiration Date, unless the Market Outcome is under review pursuant to Rule 7.1.

Expiration Date: The Expiration Date of the Contract shall be the sooner of one day following the release of data for all days in the period between <date_start> and <date_end>, or <expo_date>.

Expiration time: The Expiration time of the initial Contract iteration shall be 10:00 AM ET.

Settlement Value: The Settlement Value for this Contract is \$1.00.

Expiration Value: The Expiration Value is the average value of the Underlying as documented by the Source Agency on the Expiration Date at the Expiration time.

Contingencies: Before Settlement, Kalshi may, at its sole discretion, initiate the Market Outcome Review Process pursuant to Rule 6.3(c) of the Rulebook. Additionally, as outlined in Rule 7.2 of the Rulebook, if any event or any circumstance which may have a material impact on the reliability or transparency of a Contract's Source Agency or the Underlying related to the Contract arises, Kalshi retains the authority to designate a new Source Agency and Underlying for that Contract and to change any associated Contract specifications after the first day of

trading.
