# About the 2023 OPM FEVS

The 2023 OPM Federal Employee Viewpoint Survey (FEVS) Small Agency Management Report (SAM) was designed to provide an overview of survey results, enabling agencies to easily identify issues and take action for improvement. The SAM can be helpful in providing a starting point for analysis of your agency's FEVS results, acting as an agency overview before drilling down into specific components of the agency for a more in-depth analysis. This report also highlights important agency successes, which should be acknowledged. We encourage you to share both successes and areas for improvement with employees.

## Understanding Your Results

When reviewing results, keep the guidelines below in mind. These guidelines were created to organize survey results in a way that is easier to digest and interpret.

**Percent Positive** is the sum of two positive categories (e.g., Strongly Agree/Agree)

**Percent Negative** is the sum of two negative categories (e.g., Strongly Disagree/Disagree)

**Percent Neutral** is the neutral category (e.g., Neither Agree nor Disagree)

## Identifying Strengths, Challenges and Neutral Findings

**65 percent positive or higher** is considered a strength

**35 percent negative or higher** is considered a challenge

**30 percent neutral or higher** suggests uncertainty, presenting an opportunity for communication between managers and staff

## Identifying Increases and Decreases

Movement up or down since the previous year is another important piece of information to consider when examining your results. Any increase or decrease in results can be important; however larger increases or decreases (generally 3 or more percentage points) may be a result of significant changes taking place within your agency and should be explored. Increases indicate positive change that should continue to be reinforced. Decreases, especially in areas considered mission critical, may call for appropriate action to initiate and support beneficial workplace improvements. The Decision Aid section of this report only includes 84 core items (items 1-12, 15, 17-38, 42-90) that carried over from the 2022 FEVS.

## Updates to the 2023 Survey and Reports

FEVS content has advanced since 2019 under a multi-year FEVS Modernization Initiative. Goals for the initiative focus on: (1) maintaining data of the highest possible quality (e.g., reliable, valid) for guiding agency policies, (2) a responsive survey with content based in current survey research and design reflecting leadership priorities, and (3) agile reporting to support ease of interpretation and action within agencies. A major priority throughout this initiative has been to transform the survey into an integrated agency diagnostic tool with clear links between survey content and agency performance. Overall, the goal is to support interpretation of results to help agencies get to action.

FEVS content includes both indices and dimensions. An index is a collection of items that statistically cluster together and can be combined into a single score for interpretation and/or analysis. Indices speak to an aspect of employee perspectives and experiences and are indicators of effectiveness. Established FEVS measures such as the Employee Engagement Index (EEI), Global Satisfaction Index (GSI), Performance Confidence Index (PCI), and Diversity, Equity, Inclusion, and Accessibility (DEIA) remain key indicators of employee experience

## About the 2023 OPM FEVS (continued)

over time and results by indices are displayed in FEVS reports. The Employee Experience Index (EXI) is new and measures the extent to which employees are engaged by their work and their organization. While the established EEI is a measure of the conditions for engagement (e.g., whether a workplace has the right environment to foster engaged employees) the new EXI assesses whether employees actually experience a state of engagement. It gives agencies another tool for assessing whether actions to improve engagement have had the intended effect.

Responding to government priorities and changing conditions, the FEVS Modernization Initiative supported the development of new performance related content, changes that facilitated the application of a diagnostic framework to the FEVS. This performance framework organizes survey content into meaningful collections of items, or dimensions, logically related to performance related approaches to management (e.g., employee-focused, goal-oriented). Dimensions are simply common characteristics of organizations defined by the way employees experience organizational policies and management practices. They support interpretation of results by combining employee perspectives on topics linked with work unit and organizational performance. The FEVS contains multiple dimensions, providing agencies with additional ways of assessing their workforces. The FEVS dimensions and descriptions can be found in Appendix C of this report.

# Employee Engagement Index

The Employee Engagement Index (EEI) measures aspects of engagement that lead to an engaged workforce (e.g., supporting employee development, communicating agency goals). The EEI is comprised of three subindices: Leaders Lead, Supervisors, and Intrinsic Work Experience. Each subindex is assessed through questions on the OPM FEVS as listed below.

## Leaders Lead

Reflects the employees' perceptions of the integrity of leadership, as well as leadership behaviors such as communication and workforce motivation. (Q. 57, 58, 59, 61, and 62)

## Supervisors

Reflects the interpersonal relationship between worker and supervisor, including trust, respect, and support. (Q. 48, 50, 51, 52, and 54)

## Intrinsic Work Experience

Reflects the employees' feelings of motivation and competency relating to their roles in the workplace. (Q. 2, 3, 4, 6, and 7)

# Employee Experience Index

The Employee Experience Index (EXI) is an outcome measure of employee engagement initially included on the 2022 FEVS.<sup>1</sup> It measures the extent to which employees are engaged by their work and their organization. The existing engagement measure on the FEVS, the Employee Engagement Index (EEI), is a measure of the conditions for engagement, e.g., whether a workplace has the right environment to foster engaged employees. The new measure assesses whether employees actually experience the state of engagement and gives agencies another tool for assessing whether actions to improve engagement have had the intended effect.

The EXI is comprised of five items that measure work engagement (2 items), organizational engagement (2 items), and public service motivation (1 item). Work engagement measures the relationship between an employee and their specific job, while organizational engagement measures the relationship between an employee and their workplace.<sup>2</sup> Public service motivation was also found to be a key component of engagement for public sector employees. The index was developed in conjunction with the Organization for Economic Co-operation and Development (OECD) through their Civil Service Surveys Group. Results enable agencies to benchmark against other government scores, released every two years through the OECD Government at a Glance publication.

## Work Engagement

My job inspires me. (Q. 86)

The work I do gives me a sense of accomplishment. (Q. 87)

## Organizational Engagement

I feel a strong personal attachment to my organization. (Q. 88)

I identify with the mission of my organization. (Q. 89)

## Public Service Motivation

It is important to me that my work contribute to the common good. (Q. 90)

<sup>1</sup> Included on the survey under a section heading of Employee Experience in 2022 these were items 85-89. In 2023 the survey section had the same heading and these were items 86-90.

# Telework & Remote Work Item Results

OPM distinguishes between telework and remote work with telework defined as “a work flexibility arrangement under which an employee performs the duties and responsibilities of such employee’s position...from an approved worksite other than the location from which the employee would otherwise work” codified at 5 U.S.C. 6501(3). Remote work is defined in OPM guidance as “an arrangement in which an employee, under a written remote work agreement, is scheduled to perform their work at an alternative worksite and is not expected to perform work at an agency worksite on a regular and recurring basis.”

# Decision Aid: No Change

## Identifying Items That Have Not Changed Since 2022

Your percent positive results for these items have not changed since last year. These are items that your agency is maintaining, which can be either a positive, neutral, or negative finding. For example, an item with low percent positive results over several years is a strong indication of a need for focused action. You may also want to consider changing or updating your approach to addressing these issues if the item has been the focus of attention in the past. On the other hand, a trend of stable, high percent positive results is a finding that should be celebrated. Review each item carefully to determine whether there may be areas of concern for your agency.

## Using the Legend Icons

The legend icons provide context for interpreting results. While these items have not increased or decreased, they still may be causes for celebration or concern depending on the percent positive, negative, and neutral results. The “Top Pos/Neg” icons highlight where an item is either in the top 10 positive items or top 10 negative items for your agency.

# Appendix A: Item Results and Benchmarks

For each item, your agency's percent positive results are shown on a 0 to 100 scale, with the triangular arrow indicating where your agency falls. The gray bars represent the range of scores for the 45 small agencies surveyed that had 10 or more respondents.

To understand how well your agency performed compared to others, focus on the location of the triangle within the gray bar. If the triangle is toward the right side of the bar, then your agency was above average on that item. If it is at the right edge of the bar, then you had the highest percent positive results for that item. Additionally, you can numerically compare your percent positive results to the combined small agency average listed to the right of each item.
