Washington, DC 20581

**RE: Revision to CBOT Submission No. 13-436R (Revisions to CBOT Position Limit, Position Accountability and Reportable Level Table and Chapters 10C, 11D and 14C)
CBOT Submission No. 13-436RR**

Dear Ms. Jurgens:

The Board of Trade of the City of Chicago, Inc. ("CBOT" or the "Exchange") is notifying the Commodity Futures Trading Commission ("CFTC" or "Commission") that it is self-certifying a series of revisions to the Position Limit, Position Accountability and Reportable Level Table (the "Table") located in the Interpretations & Special Notices Section of Chapter 5 of the CBOT Rulebook.

CBOT Submission No. 13-436 included the proposed amendments to CBOT Rule Chapters 10C, 11D and 14C in unmarked format. CBOT Submission No. 13-436R was submitted on September 27, 2013, to include marked changes to the aforementioned rule chapters. Please note that CBOT Submission No. 13-436RR is being submitted to correct the following errors in Exhibit A to CBOT Submission No. 13-436:

- (1) The Soybean Crush Spread Option ("Crush Option") single-month and all-month aggregation columns are being corrected such that the Crush Option aggregates into itself and not into the underlying Soybean, Soybean Oil and Soybean Meal futures. The Crush Option has its own limit, independent of the three underlying futures contracts. By holding a position in the Crush Option, the position holder will not hold positions in Soybean, Soybean Oil and Soybean Meal futures. The position holder will not hold positions in the underlying Soybean, Soybean Oil and Soybean Meal futures until the Crush Option is exercised.
- (2) The Soybean Calendar Spread Option (Jul-Dec) is being removed from the Table as such spread option does not exist.
- (3) The clearing code for the Soybean Meal Calendar Spread Option (Jul-Dec) is being corrected from QM6 to SM6 in the Commodity Code, All Month Aggregate Into Ratio and Single Month Aggregate Into Ratio columns.

The corrections outlined above are made in Revised Exhibit A, attached under separate cover, with additions underlined and italicized and deletions ~~overstruck and italicized~~. The effective date for this submission is dependent upon the Commission's resumption of regulatory review activity and will be no earlier than after the expiration of the required review period under Commission Regulation 40.6(a). As such, the language in CBOT Submission No.13-436 regarding the proposed effective date of October 11, 2013, is also being deleted. No other revisions to Submission No. 13-436 or Submission No. 13-436R are being made.

The majority of the changes are stylistic in nature (e.g., format, consolidation of tabs, etc.), and only cells and columns applicable to a specific product are populated. The substantive changes to the Table are summarized below, and are shown in Exhibit A. The majority of the changes, except where noted below, appear in Exhibit A with additions underscored and deletions overstruck:

- Headers have been formatted and harmonized with the Position Limit, Position Accountability and Reportable Level Table applicable to NYMEX.
- Hyperlinks to the product chapters which were embedded in column B (*Rule Chapter*) have been removed.
- A separate row for each option on physical futures which shares the same clearing code as that of its futures contract has been added.
- Contract names in column A have been conformed to the product chapter titles in the CBOT Rulebook. Please note these changes are not shown in a marked version.
- The entries pertaining to number of “Registered and Shipping Certificates” for physically-delivered agricultural futures products (Corn, Soybean, Soybean Oil, Soybean Meal, Wheat, Oat, Rough Rice, Distillers’ Dried Grain) have been removed as that information currently resides in the applicable product chapter.
- Three (3) synthetic/non-tradable products (codes QX5, SQ5, QO6) which were inadvertently incorporated into the Table have been removed.
- Three (3) products (codes C7S, ZSC, WCZ) which were inadvertently omitted from the Table have been added.
- For option contracts, the contract unit from the number of futures’ equivalent contracts has been replaced with the contract unit of the respective futures contract.
- Column T (*Spot-Month Limit (In Contract Units) Leg (1) / Leg (2)*), where applicable, has been populated with the spot month limits in contract units.
- The “Aggregate into Ratio” columns, where applicable, have been populated.
- The “Aggregate into Leg 2” information, where applicable, has been inserted which was inadvertently omitted.
- For fertilizer products (codes UFN, UFU, DFT, DFL, UFZ, UFG), the product chapters have been replaced with the product codes in the “aggregate into columns.”
- The product chapter number for product code KWC has been corrected.
- Products have been grouped (sequence of rows) by underlying market.
- Terms have been conformed for consistency and style in Column F (*Type*), Column G (*Settlement*), and Column H (*Group*).
- The settlement for MCG has been changed from “Exercisable into physically delivered futures” to “Financially settled options.”
- The previously omitted spot month levels for US Treasury Futures have been inserted.
- For calendar swaps (cleared only) on corn, soybean and wheat, the single and all months limits have been set at the same levels as those of the corresponding Corn, Soybean and Wheat futures, which represents an increase from the current single month and all months combined limits applicable to these products. Deliverable supply for those markets is appended hereto as Exhibit B. As a result of this change, the Exchange is self-certifying the amendments to the affected product chapters as shown in Exhibit C (Chapters 10C, 11D and 14C). Additionally, the intra-crop year spread allowance for these products has been eliminated as it no longer applies.

~~The changes will be effective on Friday, October 11, 2013.~~

The Exchange has reviewed the designated contract market core principles (“Core Principles”) as set forth in the Commodity Exchange Act (“CEA”) and has identified that the revisions to the Table and the product chapters may have some bearing on the following Core Principles:

- Contracts Not Readily Susceptible to Manipulation: The increase in the position limits for the three (3) CBOT agricultural calendar swaps will not make the products susceptible to market manipulation. Given the size and activity in the underlying cash markets, CBOT has concluded that these contracts are not readily susceptible to market manipulation.
- Position Limitations or Accountability: CBOT has adopted appropriate increases to the position limits in the three (3) CBOT agricultural calendar swaps based on a detailed market analysis of the underlying cash markets for each product, including the size, growth and trading activity in the underlying cash market of these cleared-only swap products.
- Availability of General Information: As required by this Core Principle, the Exchanges will publicly issue a Special Executive Report to the marketplace in advance of the changes to the Table and the position limits in the three (3) CBOT agricultural calendar swaps products becoming effective. That Special Executive Report will present an overview of the changes and include a link to the Table.

The Exchange certifies that the changes to the Table, the position limits in the three (3) agricultural calendar swaps and the revisions to the product chapters comply with the Commodity Exchange Act and regulations thereunder. There were no substantive opposing views to these changes.

The Exchange certifies that this submission has been concurrently posted on the Exchange’s website at <http://www.cmegroup.com/market-regulation/rule-filings.html>.

If you require any additional information regarding this submission, please contact me at 212-299-2200 or Christopher.Bowen@cmegroup.com. Please reference CBOT Submission No. 13-436RR in any related correspondence.

Sincerely,

/s/ Christopher Bowen
Managing Director and Chief Regulatory Counsel

Exhibit B

Corn Deliverable Supply Analysis

Background:

Corn is the most widely produced feed grain in the United States, with most of the crop providing the main energy ingredient in livestock feed. Corn is also processed into a wide range of food and industrial products including fuel ethanol. USDA estimates the 2012/13 U.S. corn crop at 10.7 billion bushels, a 13 percent reduction compared to 2011/12 due to Midwestern drought conditions during the summer of 2012. CBOT Corn futures are the global price discovery and risk management benchmark.

Corn Delivery Capacity (Updated Annually):

The following territories are defined for delivery in CBOT Corn futures:

- A. Chicago and Burns Harbor, Indiana Switching District - The Chicago Switching District is the area geographically defined by Tariff ICC WTL 8020-Series and that portion of the Illinois Waterway at or above river mile 304 which includes the Calumet Sag Channel and the Chicago Sanitary & Ship Canal. The Burns Harbor, Indiana Switching District is the area geographically defined by the boundaries of Burns Waterway Harbor at Burns Harbor, Indiana which is owned and operated by the Indiana Port Commission.
- B. Lockport-Seneca Shipping District - The Lockport-Seneca Shipping District is the portion of the Illinois Waterway below river mile 304 at the junction of the Calumet Sag Channel and the Chicago Sanitary & Ship Canal and above river mile 244.6 at the Marseilles Lock and Dam.
- C. Ottawa-Chillicothe Shipping District - The Ottawa-Chillicothe Shipping District is the portion of the Illinois Waterway below river mile 244.6 at the Marseilles Lock and Dam and at or above river mile 170 between Chillicothe and Peoria, IL.
- D. Peoria – Pekin Shipping District - The Peoria-Pekin Shipping District is the portion of the Illinois Waterway below river mile 170 between Chillicothe and Peoria, IL and at or above river mile 151 at Pekin, IL.

Facilities approved for delivery on Corn futures are limited in the number of shipping certificates that they may issue to an amount not to exceed 20 times their total daily rate of loading barges, or in the case of the Chicago and Burns Harbor delivery territory, their registered storage capacity. As of January 2013, firms regular for delivery on CBOT Corn futures had approved capacity to issue 11,256 shipping certificates or 56.28 million bushels of corn.

Below are the facilities regular for delivery on Corn futures as of January 2013 along with the maximum number of shipping certificates they may issue, with each shipping certificate equivalent to 5,000 bushels:

Firm	Location	Maximum Certificates Deliverable
Cargill, Inc.	Burns Harbor, IN	1,094
Chicago & Illinois River Marketing, LLC	Chicago, IL	2,462
Cargill, Inc.	Morris, IL	440
Elburn Cooperative Co.	Morris, IL	220
ADM Grain Company	Morris-E, IL	220
Cargill, Inc.	Seneca, IL	440
ADM Grain Company	Ottawa-N, IL	440
Cargill, Inc.	Ottawa, IL	440
ADM Grain Company	Ottawa-S, IL	220
Maplehurst Farms, Inc.	Ottawa, IL	220
Zen-Noh Grain Corporation	Utica, IL	220
Consolidated Grain and Barge Co.	Utica, IL	220
ADM Grain Company	La Salle, IL	220
Zen-Noh Grain Corporation	Peru, IL	220
Consolidated Grain and Barge Co.	Peru, IL	220
ADM Grain Company	Spring Valley, IL	440
Cargill, Inc.	Spring Valley, IL	440
ADM Grain Company	Hennepin, IL	440
Cargill, Inc.	Hennepin, IL	440
Zen-Noh Grain Corp.	Hennepin, IL	220
Consolidated Grain and Barge Co.	Hennepin, IL	220

Firm	Location	Maximum Certificates Deliverable
ADM Grain Company	Henry, IL	220
ADM Grain Company	Lacon, IL	220
Cargill, Inc.	Lacon, IL	440
ADM Grain Company	Creve Coeur, IL	440
Bunge North America	Ottawa, IL	220
ADM Grain Company	Ottawa, IL	220

Corn Deliverable Supply Procedures and Estimate (Updated Annually):

Each Tuesday the Registrar's Office publishes corn meeting deliverable grades that are in-store as of the previous Friday at all regular delivery facilities. The USDA-AMS publishes a weekly Grain Transportation Report (GTR) that covers developments affecting the transport of grain, both in the domestic and international marketplace (<http://www.ams.usda.gov/AMSV1.0/gtr>). This weekly publication reports on the latest volume and price data for barges, railroads, trucks, and ocean vessels involved in the transport of grain. Included in this report is the amount of corn shipped through Lock 8 on the Illinois River¹ and through the Illinois River delivery territory for Corn futures.

Deliverable supply is estimated as the stocks of grain in regular facilities on the Friday prior to First Notice Day plus the amount to corn that passes through Lock 8 on the Illinois River during the four weeks prior to First Notice Day. This is likely a very conservative estimate of deliverable supply because it does not count the significant amount of corn that is likely near the delivery facilities and could easily be placed into delivery position very quickly.

Futures Contract Expiration	Corn Movement through Lock 8 on the IL River during the 4 Weeks Prior to FND (1M Bushels)	Stocks of Corn in Regular Facilities on the Friday prior to FND (1M Bushels)	Total Stocks (1M Bushels)
Mar 2010	22.04	6.83	28.87
Mar 2011	14.96	7.07	22.03
Mar 2012	24.82	3.11	27.93
MAR AVG	20.61	5.67	26.28
May 2010	24.41	5.50	29.91
May 2011	17.71	7.32	25.03
May 2012	13.89	2.25	16.14
MAY AVG	18.67	5.02	23.69
Jul 2010	29.50	5.77	35.27
Jul 2011	15.14	5.03	20.17
Jul 2012	9.54	1.55	11.09
JUL AVG	18.06	4.12	22.18
Sep 2010	14.39	4.07	18.46
Sep 2011	5.61	2.27	7.88
Sep 2012	5.61	0.48	6.09
SEP AVG	8.54	2.27	10.81
Dec 2010	7.39	6.60	13.99
Dec 2011	20.07	4.47	24.54
Dec 2012	4.29	2.12	6.41
DEC AVG	10.58	4.40	14.98
AVG ALL DELV MONTHS	15.29	4.30	19.59

As the table above shows, estimated deliverable supply for all delivery months over the past three calendar years has been 19.59 million bushels or 3,918 contract equivalents.

¹ http://marinas.com/view/lock/155_Illinois_River_Peoria_Lock_IL_United_States

There is no readily available data on corn under long-term contracts or agreements that could not be delivered on futures and should not be counted in deliverable supply estimates. To get a sense of the extent corn is under long-term agreements and not deliverable, the Exchange reached out to several of the corn regular delivery firms. Feedback from these firms indicates generally zero (0) percent of corn in their facilities is under long-term agreement and could not be delivered against Corn futures. One firm indicated generally zero percent under long-term agreement but at the very most five percent during some limited time frames. Given this feedback and the conservative nature of the estimate, the Exchange does not believe corn stocks under long-term agreements significantly affect deliverable supply.

The Exchange is amending the single and all months limit for the Corn Calendar Swaps (Clearing Only) (Chapter 10C) such that the single and all months limits for the Corn Calendar Swaps (Clearing Only) are 33,000 contracts and identical to those of the Corn Futures contract. As a result of this amendment, intra crop year spread allowance no longer applies and is therefore eliminated.

Soybean Deliverable Supply Analysis

Background:

Soybeans are the second largest crop produced in the United States. They are crushed to extract their oil and high protein meal. Soybean meal is primarily used as a feed ingredient for livestock, while soybean oil is primarily used in food processing. USDA estimates the 2012/13 U.S. soybean crop at 3.015 billion bushels, a 2.5 percent reduction compared to 2011/12 due to Midwestern drought conditions during the summer of 2012.

Soybean Delivery Capacity (Updated Annually):

The following territories are defined for delivery in CBOT Soybean futures:

- A. Chicago and Burns Harbor, Indiana Switching District - The Chicago Switching District will be that area geographically defined by Tariff ICC WTL 8020-Series and that portion of the Illinois Waterway at or above river mile 304 which includes the Calumet Sag Channel and the Chicago Sanitary & Ship Canal. Burns Harbor, Indiana Switching District will be that area geographically defined by the boundaries of Burns Waterway Harbor at Burns Harbor, Indiana which is owned and operated by the Indiana Port commission.
- B. Lockport-Seneca Shipping District - The Lockport-Seneca Shipping District will be that portion of the Illinois Waterway below river mile 304 at the junction of the Calumet Sag Channel and the Chicago Sanitary & Ship Canal and above river mile 244.6 at the Marseilles Lock and Dam.
- C. Ottawa-Chillicothe Shipping District - The Ottawa-Chillicothe Shipping District will be that portion of the Illinois Waterway below river mile 244.6 at the Marseilles Lock and Dam and at or above river mile 170 between Chillicothe and Peoria, IL.
- D. Peoria-Pekin Shipping District - The Peoria-Pekin Shipping District will be that portion of the Illinois Waterway below river mile 170 between Chillicothe and Peoria, IL and at or above river mile 151 at Pekin, IL.
- E. Havana-Grafton Shipping District - The Havana-Grafton Shipping District will be that portion of the Illinois Waterway below river mile 151 at Pekin, IL to river mile 0 at Grafton, IL.
- F. St. Louis-East St. Louis and Alton Switching Districts - The St. Louis-East St. Louis and Alton Switching Districts will be that portion of the upper Mississippi River below river mile 218 at Grafton, IL and above river mile 170 at Jefferson Barracks Bridge in south St. Louis, MO.

Facilities approved for delivery on Soybean futures are limited in the number of shipping certificates that they may issue to an amount not to exceed 20 times their total daily rate of loading barges, or in the case of the Chicago and Burns Harbor delivery territory, their registered storage capacity. As of January 2013, firms regular for delivery on CBOT Soybean futures had approved capacity to issue 17,416 shipping certificates or 87.08 million bushels of soybeans.

Below are the facilities regular for delivery on Soybeans futures in January 2013 along with the maximum number of shipping certificates they may issue, with each shipping certificate equivalent to 5,000 bushels:

Firm	Location	Maximum Certificates Deliverable
Cargill, Inc.	Burns Harbor, IN	1094
Chicago & Illinois River Marketing, LLC	Chicago, IL	2462
Cargill, Inc.	Morris, IL	440
Elburn Cooperative Co.	Morris, IL	220
ADM Grain Company	Morris-E, IL	220
Cargill, Inc.	Seneca, IL	440
ADM Grain Company	Ottawa-N, IL	440
Cargill, Inc.	Ottawa, IL	440
ADM Grain Company	Ottawa-S, IL	220
Maplehurst Farms, Inc.	Ottawa, IL	220
Zen-Noh Grain Corporation	Utica, IL	220
Consolidated Grain and Barge Co.	Utica, IL	220
ADM Grain Company	La Salle, IL	220

Firm	Location	Maximum Certificates Deliverable
Zen-Noh Grain Corporation	Peru, IL	220
Consolidated Grain and Barge Co.	Peru, IL	220
ADM Grain Company	Spring Valley, IL	440
Cargill, Inc.	Spring Valley, IL	440
ADM Grain Company	Hennepin, IL	440
Cargill, Inc.	Hennepin, IL	440
Zen-Noh Grain Corp.	Hennepin, IL	220
Consolidated Grain and Barge Co.	Hennepin, IL	220
ADM Grain Company	Henry, IL	220
ADM Grain Company	Lacon, IL	220
Cargill, Inc.	Lacon, IL	440

Bunge North America	Ottawa, IL	220
ADM Grain Company	Ottawa, IL	220
Cargill, Inc.	Havana-N, IL	440
Cargill, Inc.	Havana-S, IL	440
ADM Grain Company	Havana-N, IL	220
ADM Grain Company	Havana-S, IL	440
Cargill, Inc.	Beardstown, IL	440
ADM Grain Company	Beardstown, IL	220
Cargill, Inc.	Meredosia, IL	440
ADM Grain Company	Naples, IL	220
Zen-Noh Grain Corp.	Naples, IL	220
Consolidated Grain and Barge Co.	Naples, IL	220
Cargill, Inc.	Florence, IL	440
CHS, Inc.	Beardstown, IL	220
CHS, Inc.	Havana, IL	220
CHS, Inc.	St. Louis, MO	220
ADM Grain Company	St. Louis, MO	880
Cargill, Inc.	E. St. Louis, IL	440
Consolidated Grain & Barge Co.	Cahokia, IL	220
Tate and Lyle, Inc.	Granite City, IL	220

Soybean Deliverable Supply Procedures and Estimate (Updated Annually):

Each Tuesday the Registrar's Office publishes soybeans meeting deliverable grades that are in-store as of the previous Friday at all regular delivery facilities. The USDA-AMS publishes a weekly Grain Transportation Report (GTR) that covers developments affecting the transport of grain, both in the domestic and international marketplace (<http://www.ams.usda.gov/AMSV1.0/gtr>). This weekly publication reports on the latest volume and price data for barges, railroads, trucks, and ocean vessels involved in the transport of grain. Included in this report is the amount of soybeans shipped through Lock 27² on the Mississippi River, which is a measure of soybeans that flow through the Illinois River delivery territory for Soybean futures.

² http://marinas.com/view/lock/103_Chain_of_Rocks_Lock_27_Granite_City_IL_United_States

Deliverable supply is estimated as the stocks of grain in regular facilities on the Friday prior to First Notice Day plus the amount to soybeans that pass through Lock 27 on the Mississippi River during the four weeks prior to First Notice Day. Mississippi River Lock 27 soybean movements capture down-bound soybeans that have traveled along the Illinois River and by the Illinois River delivery facilities and the down-bound soybeans that have traveled along the Mississippi River and by the St. Louis, East St. Louis, and Alton delivery territory facilities. This is likely a very conservative estimate of deliverable supply because it does not count the significant amount of soybeans that are likely near the delivery facilities and could easily be placed into delivery position very quickly.

Futures Contract Expiration	Soybean Movement through Lock 27 on the MS River during the 4 Weeks Prior to FND (1M Bushels)	Stocks of Soybeans in Regular Facilities on the Friday prior to FND (1M Bushels)	Total Stocks (1M Bushels)
Jan-10	24.62	3.20	27.82
Jan-11	39.68	5.40	45.08
Jan-12	30.17	8.05	38.22

Aug-12	25.76	2.42	28.18
AUG AVG	17.71	1.95	19.66
Sep-10	14.15	0.61	14.76
Sep-11	12.60	1.11	13.71
Sep-12	27.59	1.05	28.64
SEP AVG	18.11	0.92	19.03

Nov-10	33.51	4.22	37.73
Nov-11	15.43	9.46	24.89
Nov-12	32.15	4.93	37.08
NOV AVG	27.03	6.20	33.23
AVG ALL DELV MONTHS	19.80	4.10	23.90

As the table above shows, estimated deliverable supply for all delivery months over the past three calendar years has been 23.90 million bushels or 4,780 contract equivalents.

Unfortunately there is no readily available data on soybeans under long-term contracts or agreements that could not be delivered on futures and should not be counted in deliverable supply estimates. To get a sense of the extent soybeans are under long-term agreements and not deliverable, the Exchange reached out to several of the soybean regular delivery firms. Feedback from these firms indicates generally zero (0) percent of soybeans in their facilities are under long-term agreement and could not be delivered against Soybean futures. One firm indicated generally zero percent under long-term agreement but at the very most five percent during some limited time frames. Given this feedback and the conservative nature of the estimate, the Exchange does not believe soybean stocks under long-term agreements significantly affect deliverable supply.

The Exchange is amending the single and all months limit for the Soybean Calendar Swaps (Clearing Only) (Chapter 11D) such that the single and all months limits for the Soybean Calendar Swaps (Clearing Only) are 15,000 contracts and identical to those of the Soybean Futures contract. As a result of this amendment, intra crop year spread allowance no longer applies and is therefore eliminated.

CBOT Wheat Deliverable Supply Analysis

Background:

All wheat production in the United States this past season was 2.27 billion bushels with soft red winter wheat representing 0.42 billion bushels. Soft red winter wheat, which is the underlying wheat class for the CBOT Wheat futures contract, is primarily used to make cookies, cakes and crackers and also as a livestock feed. USDA estimates the 2012/13 U.S. soft red winter wheat crop at 0.42 billion bushels, an 8.2 percent reduction compared to 2011/12 due to wheat acres being replaced by relatively higher priced corn.

CBOT Wheat Delivery Capacity (Updated Annually):

The following territories are defined for delivery in CBOT Wheat futures:

- A. Chicago and Burns Harbor, Indiana Switching District - The Chicago Switching District is the area geographically defined by Tariff ICC WTL 8020-Series and that portion of the Illinois Waterway at or above river mile 304 which includes the Calumet Sag Channel and the Chicago Sanitary & Ship Canal. The Burns Harbor, Indiana Switching District is the area geographically defined by the boundaries of Burns Waterway Harbor at Burns Harbor, Indiana which is owned and operated by the Indiana Port Commission.
- B. The Toledo, Ohio Switching District. – The Toledo, Ohio switching district includes any facility that has a Toledo tariff.
- C. St. Louis-East St. Louis and Alton Switching District - The St. Louis-East St. Louis and Alton Switching Districts will be the portion of the upper Mississippi River below river mile 218 at Grafton, IL and above river mile 170 at Jefferson Barracks Bridge in south St. Louis, MO.
- D. The Northwest Ohio Territory shall be shuttle loading facilities within the following 12 counties: Allen, Crawford, Hancock, Hardin, Henry, Huron, Marion, Putnam, Sandusky, Seneca, Wood, and Wyandot.
- E. The Ohio River facilities shall be river loading facilities on the Ohio River from mile marker 455 to the Mississippi River.
- F. The Mississippi River facilities shall be river loading facilities on the Mississippi River downriver from the St. Louis-East St. Louis Alton Switching District to mile marker 715.

Facilities approved for delivery on Wheat futures in the Mississippi River, Ohio River and St. Louis-East St. Louis-Alton territories are limited in the number of shipping certificates that they may issue to an amount not to exceed 20 times their total daily rate of loading barges, while facilities in the Chicago, Burns Harbor, Toledo and Northwest Ohio delivery territories shall not deliver more than their registered storage capacity. As of January 2013, firms regular for delivery on CBOT Wheat futures had approved capacity to issue 39,042 shipping certificates or 195.21 million bushels of wheat.

Below are the facilities regular for delivery on Wheat futures in January 2013 along with the maximum number of shipping certificates they may issue, with each shipping certificate equivalent to 5,000 bushels:

Firm	Location	Max Certificates
Cargill, Inc.	Burns Harbor Elevator Portage, IN	1,553
Chicago & Illinois River Marketing LLC	Elevator B Chicago, IL	2,462
The Andersons	Andersons-Illinois Elevator Maumee, Ohio	3,391
The Andersons	River Elevator Toledo, Ohio	1,230
The Andersons	Conant Street Elevator Maumee, Ohio	656
The Andersons	Edwin Drive Elevator Toledo, Ohio	1,100
The Andersons	Toledo, Ohio (Reynolds Rd)	196
ADM Grain Company	Toledo Elevator Toledo, Ohio	1,959
ADM Grain Company	Ottawa Lake Elevator Ottawa Lake, MI	1,536
ADM Grain Company	Sauget, IL	220
Archer-Daniels-Midland Co.	St. Louis Elevator St. Louis, MO	314
Cargill Inc.	Elevator East St. Louis, IL	440
ConAgra Foods, Inc.	Alton, IL	677

CBOT Wheat Deliverable Supply Procedures and Estimate (Updated Annually):

Each Tuesday the Registrar's Office publishes wheat meeting deliverable grades that are in-store as of the previous Friday at all regular delivery facilities. The USDA-AMS publishes a weekly Grain Transportation Report (GTR) that covers developments affecting the transport of grain, both in the domestic and international marketplace (<http://www.ams.usda.gov/AMSV1.0/gtr>). This weekly publication reports on the latest volume and price data for barges, railroads, trucks, and ocean vessels involved in the transport of grain. Included in this report is the amount of wheat shipped through Lock 52³ on the Ohio River, which is a measure of wheat flowing through the Ohio River delivery territory for Wheat futures.

Deliverable supply is estimated as the stocks of grain in regular facilities on the Friday prior to First Notice Day plus the amount to wheat that passes through Lock 52 on the Ohio River during the four weeks prior to First Notice Day⁴.

³ http://marinas.com/view/lock/31_Ohio_River_Lock_52_Brookport_IL_United_States

⁴ This analysis does not include SRW wheat flowing down the Illinois and Upper Mississippi Rivers that would also be deliverable on the CBOT Wheat futures contract in the Alton – St. Louis delivery territory. Wheat statistics are available on the lowest lock on the Mississippi River, which would capture these data, but because these stocks are not differentiated between classes and likely contain significant amounts of spring wheat, the Exchange decided not to include these stocks in this analysis. Spring wheat is deliverable on CBOT Wheat futures, but rarely if ever delivered, so this analysis focuses on SRW wheat. Ohio River stocks included in this report are predominantly, if not virtually all, SRW wheat.

This is likely a very conservative estimate of deliverable supply because it does not count the significant amount of wheat that is likely near the delivery facilities and could easily be placed into delivery position very quickly.

Futures Contract Expiration	Wheat Movement through Lock 52 on the OH River during the 4 Weeks Prior to FND (1M Bushels)	Stocks of Wheat in Regular Facilities on the Friday prior to FND (1M Bushels)	Total Stocks (1M Bushels)

Dec-11	1.07	77.31	78.38
Dec-12	0.40	82.20	82.60
DEC AVG	0.56	77.32	77.89
AVG ALL DELV MONTHS	1.24	72.54	73.79

As the table above shows, estimated deliverable supply for all delivery months over the past three calendar years has been 73.79 million bushels or 14,757 contract equivalents. .

Unfortunately there is no readily available data on wheat under long-term contracts or agreements that could not be delivered on futures and should not be counted in deliverable supply estimates. To get a sense of the extent wheat is under long-term agreements and not deliverable, the Exchange reached out to several of the wheat regular delivery firms. Feedback from these firms indicates generally zero (0) percent of wheat in their facilities is under long-term agreement and could not be delivered against Wheat futures. One firm indicated generally zero percent under long-term agreement but at the very most five percent during some limited time frames. Given this feedback and the conservative nature of the estimate, the Exchange does not believe wheat stocks under long-term agreements significantly affect deliverable supply.

The Exchange is amending the single and all months limit for the Wheat Calendar Swaps (Clearing Only) (Chapter 14C) such that the single and all months limits for the Wheat Calendar Swaps (Clearing Only) are 12,000 contracts and identical to those of the Wheat Futures contract. As a result of this amendment, intra crop year spread allowance no longer applies and is therefore eliminated.

Exhibit C

Chapter 10C Corn Calendar Swaps (Clearing Only)

10C01.E. ~~Position Limits~~ Position Limits, Exemptions, Position Accountability and Reportable Levels

~~In accordance with Rule 559., Position Limits and Exemptions, no person shall own or control positions in excess of:~~

- ~~1. 13,500 contracts net long or net short in any single contract month.~~
- ~~2. 22,000 contracts net long or net short in all months combined.~~

~~Refer to Rule 559. for requirements concerning the aggregation of positions and allowable exemptions from the specified position limits.~~

~~The applicable position limits and/or accountability levels, in addition to the reportable levels, are set forth in the Position Limit, Position Accountability and Reportable Level Table in the Interpretations & Special Notices Section of Chapter 5.~~

~~A Person seeking an exemption from position limits for bona fide commercial purposes shall apply to the Market Regulation Department on forms provided by the Exchange, and the Market Regulation Department may grant qualified exemptions in its sole discretion.~~

~~Refer to Rule 559 for requirements concerning the aggregation of positions and allowable exemptions from the specified position limits.~~

Chapter 11D Soybean Calendar Swaps (Clearing Only)

11D01.E. ~~Position Limits~~ Position Limits, Exemptions, Position Accountability and Reportable Levels

~~In accordance with Rule 559., Position Limits and Exemptions, no person shall own or control positions in excess of:~~

- ~~1. 6,500 contracts net long or net short in any single contract month.~~
- ~~2. 10,000 contracts net long or net short in all months combined.~~

~~Refer to Rule 559. for requirements concerning the aggregation of positions and allowable exemptions from the specified position limits.~~

~~The applicable position limits and/or accountability levels, in addition to the reportable levels, are set forth in the Position Limit, Position Accountability and Reportable Level Table in the Interpretations & Special Notices Section of Chapter 5.~~

~~A Person seeking an exemption from position limits for bona fide commercial purposes shall apply to the Market Regulation Department on forms provided by the Exchange, and the Market Regulation Department may grant qualified exemptions in its sole discretion.~~

~~Refer to Rule 559 for requirements concerning the aggregation of positions and allowable exemptions from the specified position limits.~~

Chapter 14C Wheat Calendar Swaps (Clearing Only)

14C01.E. ~~Position Limits~~ Position Limits, Exemptions, Position Accountability and Reportable Levels

~~In accordance with Rule 559., Position Limits and Exemptions, no person shall own or control positions in excess of:~~

- ~~1. 5,000 contracts net long or net short in any single contract month.~~
- ~~2. 6,500 contracts net long or net short in all months combined.~~

~~Refer to Rule 559. for requirements concerning the aggregation of positions and allowable exemptions from the specified position limits.~~

The applicable position limits and/or accountability levels, in addition to the reportable levels, are set forth in the Position Limit, Position Accountability and Reportable Level Table in the Interpretations & Special Notices Section of Chapter 5.

A Person seeking an exemption from position limits for bona fide commercial purposes shall apply to the Market Regulation Department on forms provided by the Exchange, and the Market Regulation Department may grant qualified exemptions in its sole discretion.

Refer to Rule 559 for requirements concerning the aggregation of positions and allowable exemptions from the specified position limits.

In the last five trading days of the expiring futures month in May, the speculative position limit will be 600 contracts if deliverable supplies are at or above 2,400 contracts, 500 contracts if deliverable supplies are between 2,000 and 2,399 contracts, 400 contracts if deliverable supplies are between 1,600 and 1,999 contracts, 300 contracts if deliverable supplies are between 1,200 and 1,599 contracts, and 220 contracts if deliverable supplies are below 1,200 contracts. Deliverable supplies will be determined from the CBOT's Stocks of Grain report on the Friday preceding the first notice day for the May contract month.

W

BSW

O

O

In the last five trading days of the expiring futures month, the speculative position limit for the July futures month will be 200 contracts and **the position limit** for the September futures month ~~the limit~~ will be 250 contracts.
