Washington, DC 20581

**RE: Regulation 40.6(a) Rule Certification. Chicago Mercantile Exchange Inc./The Board of Trade of the City of Chicago, Inc./New York Mercantile Exchange, Inc./Commodity Exchange, Inc.  
Submission # 12-410: Issuance of CME & CBOT Market Regulation Advisory Notice RA1206-3 and NYMEX & COMEX Market Regulation Advisory Notice RA1207-4**

Dear Ms. Warfield:

Chicago Mercantile Exchange Inc. ("CME"), The Board of Trade of the City of Chicago, Inc. ("CBOT"), New York Mercantile Exchange, Inc. ("NYMEX") and Commodity Exchange, Inc. ("COMEX") (collectively, the "Exchanges") are notifying the Commodity Futures Trading Commission ("CFTC" or "Commission") that they are self-certifying via this submission revised Market Regulation Advisory Notices on block trades on Monday, November 26, 2012. The revised Advisory Notices are being issued to clarify the privately negotiated standard for block trades.

Section 1 is being modified to clarify that the facilitation of the execution of block trades in Exchange-traded products on a system or facility that allows for the electronic matching of or the electronic acceptance of bids and offers does not satisfy the privately negotiated standard for block trades. We are further clarifying that parties may meet the standard utilizing communication technologies to bilaterally request block quotes from one or more participants and conduct privately negotiated block trades. Parties may also utilize technologies supported by third parties which allow for the electronic posting of indicative block markets displayed to multiple market participants; however, block trades executed between parties on the basis of such electronically displayed indicative markets may be transacted only through direct bilateral communications involving the broker, where applicable, and the parties to the trade.

CME & CBOT will release RA1206-3 and NYMEX & COMEX will adopt RA1207-4. The changes will be effective on December 7, 2012.

In addition, RA1206-3 also contains the following changes:

- the elimination of block trade eligibility in CME TRAKRS Index futures;
- a correction to the block trade minimum threshold applicable to CME E-mini Yen Denominated Nikkei Stock Average Index futures from 50 to 250 contracts; and
- a change to the date for block trading of CBOT US Dollar Interest Rate Swap futures from November 13 to December 3, consistent with the new launch date of the product.

A copy of RA1206-3 appears in Exhibit A and a copy of RA1207-4 appears in Exhibit B.

The Market Regulation Department and the Legal Department collectively reviewed the designated contract market core principles ("Core Principles") as set forth in the Commodity Exchange Act ("Act"). During the review, we have identified that the changes described in this Submission may have some bearing on the following Core Principles:

Availability of General Information: As required by this Core Principle, the Exchanges are providing market authorities, market participants and the public with information clarifying the privately negotiated standard for block trades.

Daily Publication of Trading Information: Block trades are separately identified in the price stream disseminated to the marketplace and the volume of block trades is also available on the CME Group website and in the daily bulletin.

Execution of Transactions: Core Principle 9 permits a designated contract market ("DCM") to authorize for bona fide business purposes transactions executed away from the DCM's centralized marketplace. These Advisory Notices provide guidance in Section 1 regarding the privately negotiated standard for block trades.

Trade Information: As with all other trades in Exchange products, trade information attendant to block trades is recorded and safely stored by the Exchange. Additionally, block trades are currently integrated into the Market Regulation Department's suite of proprietary regulatory systems and are uniquely identifiable by their trade type in those systems.

The Exchanges certify that the issuance of RA1205-3 and RA1207-4 comply with the Act and regulations thereunder. There were no substantive opposing views to these changes.

The Exchange certifies that this submission has been concurrently posted on the Exchange's website at <http://www.cmegroup.com/market-regulation/rule-filings.html>.

If you have any questions regarding this submission, please contact Robert Sniegowski, Market Regulation, at 312.341.5991 or via email at [Robert.Sniegowski@cmegroup](mailto:Robert.Sniegowski@cmegroup). Alternatively, you may contact me at 312.930.8167 or via email at [Sean.Downey@cmegroup.com](mailto:Sean.Downey@cmegroup.com). Please reference NYMEX/COMEX Submission # 12-410 in any related correspondence.

Sincerely,

/s/ Sean Downey  
Director & Assistant General Counsel

Exhibit B – RA1207-4

## EXHIBIT A

### MARKET REGULATION ADVISORY NOTICE

---

Exchange	CME & CBOT
Subject	Block Trades
Rule References	Rule 526
Advisory Date	November 26, 2012
Advisory Number	CME & CBOT RA1206-3
Effective Date	Various (see below)

This Advisory Notice supersedes CME & CBOT Market Regulation Advisory Notice RA1204-3 issued October 29, 2012. It is being issued to notify the marketplace of the following:

- 1) **Effective immediately**, CME TRAKRS Index futures have been removed from the list of block-eligible products as no TRAKRS Index futures are currently available for trading.
- 2) The block trade minimum threshold applicable to CME E-mini Yen Denominated Nikkei Stock Average Index futures has been corrected in the table in Section 12 to accurately reflect a block threshold of 250 contracts.
- 3) **Effective on trade date December 7, 2012**, CME and CBOT will adopt additional regulatory guidance into Section 1 clarifying that the privately negotiated standard for block trades precludes facilitating the execution of block trades on a system or facility accessible to multiple parties that allows for the electronic matching of or the electronic acceptance of bids and offers.

Additionally, CBOT has changed the launch date of its suite of US Dollar Interest Rate Swap ("USD IRS") futures contracts from November 13, 2012, to December 3, 2012. **Effective on trade date December 3, 2012**, block trading will be allowed in the new USD IRS futures products at the following minimum threshold contract levels:

2-Year USD IRS futures -3,000 contracts  
5-Year USD IRS futures - 1,500 contracts  
10-Year USD IRS futures -1,000 contracts  
30-Year USD IRS futures - 500 contracts

CME and CBOT products in which block trading is permitted appear in Section 12, and the text of CME and CBOT Rule 526 appears in Section 14 of this Advisory Notice.

#### **1. Definition of Block Trades**

Block trades are privately negotiated futures, options or combination transactions that meet certain quantity thresholds which are permitted to be executed apart from the public auction market.

It shall not be permissible to facilitate the execution of block trades in Exchange-traded products on a system or facility accessible to multiple parties that allows for the electronic matching of or the electronic acceptance of bids and offers; block trades transacted in such manner do not satisfy the

privately negotiated standard. Parties may use communication technologies to bilaterally request block quotes from one or more participants and to conduct privately negotiated block trades. Parties may also utilize technologies supported by third parties which allow for the electronic posting of indicative block markets displayed to multiple market participants. However, block trades executed between parties on the basis of such electronically displayed indicative markets may be transacted only through direct bilateral communications involving the broker, where applicable, and the parties to the trade.

All block trades are subject to the conditions set forth in CME and CBOT Rule 526 and in this Advisory Notice. Additionally, BTIC ("Basis Trade at Index Close") block trades in Select Sector futures and DJUSRE futures are also subject to the requirements set forth in CME Rule 36906.A. ("BTIC Block Trade Requirements") or CBOT Rule 30107.A. ("BTIC Block Trade Requirements"), as applicable. Additional information on BTIC block trades appears in Section 9 of this Advisory Notice.

## **2. Participation in Block Trades**

Each party to a block trade must be an Eligible Contract Participant as that term is defined in Section 1a of the Commodity Exchange Act. Eligible Contract Participants generally include exchange members and member firms, broker/dealers, government entities, pension funds, commodity pools, corporations, investment companies, insurance companies, depository institutions and high net-worth individuals. Commodity trading advisors and investment advisors who are registered or exempt from registration, and foreign persons performing a similar role and subject as such to foreign regulation, may participate in block transactions provided they have total assets under management exceeding \$25 million and the block trade is suitable for their customers.

A customer order may be executed by means of a block trade only if the customer has specified that the order be executed as a block trade.

Orders may not be bunched to meet the minimum block quantity thresholds.

## **3. Time and Prices of Block Trades**

Block trades may be executed at any time, including times during which the public auction market is closed, except that BTIC block trades may not take place on the last day of trading in an expiring contract month.

Block trades must be transacted at prices that are "**fair and reasonable**" in light of (i) the size of the transaction, (ii) the prices and sizes of other transactions in the same contract at the relevant time, (iii) the prices and sizes of transactions in other relevant markets, including, without limitation, the underlying cash market or related futures markets, at the relevant time, and (iv) the circumstances of the markets or the parties to the block trade.

The Basis applied to a BTIC block trade must also be fair and reasonable taking into account financing rates, expected dividend income and the time remaining until the applicable futures contract expires pursuant to the requirements of CME Rule 36906 ("Basis Trade at Index Close ("BTIC") Transactions") or CBOT Rule 30207 ("Basis Trade at Index Close ("BTIC") Transactions"), as applicable.

The trade price must be consistent with the minimum tick increment for the market in question. Additionally, each outright transaction and each leg of any block eligible spread or combination trade must be executed at a single price.

Block trade prices are reported independently of transaction prices in the regular market and are not included as part of the daily trading range. Block trade prices do not elect conditional orders (e.g. stop orders) or otherwise affect orders in the regular market.

#### **4. Block Trade Minimum Quantities for Outrights, Spreads and Combinations**

The block trade minimum quantity requirements for outright futures and options are set forth in the list of block trade eligible products in Section 12 of this Advisory Notice. Additional information with respect to spreads and combinations executed as blocks appears below:

##### **a) Intra-Commodity Futures Spreads and Futures Combinations**

- i) All Products Excluding U.S. Treasury, OTR Treasury Yield, 5-, 7-, 10- and 30-Year Interest Rate Swap and GSCIFutures

Intra-commodity futures spreads and futures combinations may be executed as block trades provided that the **sum** of the quantities of the legs meets the minimum block quantity threshold. For example, 2,000 Eurodollar future calendar spreads executed during RTH hours would meet the Eurodollar futures minimum quantity requirement of 4,000 contracts.

- ii) U.S. Treasury, OTR Treasury Yield and 5-, 7-, 10- and 30-Year Interest Rate Swap Futures

***Intra-commodity calendar spread block trades are prohibited in CBOT U.S. Treasury futures, OTR Treasury Yield and 5-, 7-, 10- and 30-Year Interest Rate Swap futures.*** Parties may not execute contingent block trades in outright contracts to circumvent the prohibition on the execution of block trades in intra-commodity calendar spreads. Additionally, Tandem spreads (a trade combining calendar spreads in two different Treasury futures) may not be executed as block trades.

- iii) GSCI Futures

In GSCI futures and GSCI Excess Return Index futures the block trade minimum is 300 contracts for each leg of the spread or combination. For example, the minimum quantity for a GSCI calendar spread would require 300 contracts in each leg of the spread for a total of 600 contracts while a GSCI futures butterfly would require a minimum volume of 1,200 contracts.

##### **b) Inter-Commodity Futures Spreads**

- i) Short Term Interest Rate Futures

In Short Term Interest Rate futures (Eurodollars, Eurodollar E-minis, Euribor, T-Bills, OIS, One-Month Eurodollar, Euroyen and 30-Day Fed Funds), inter-commodity futures spreads may be executed as block trades provided that the **sum of the legs of the spread** meets the **larger** of the threshold requirements for the underlying products. For example, the minimum quantity thresholds for One-Month Eurodollar and Eurodollars during ETH are 200 and 2,000 contracts, respectively. Therefore, a block trade in the One-Month Eurodollar/Eurodollar spread can be executed provided that the sum of the legs is at least 2,000 contracts.

- ii) U.S. Treasury, OTR Treasury Yield, 5-, 7-, 10- and 30-Year Interest Rate Swap and 10-Year Sovereign Yield Spread Futures

In U.S. Treasury, OTR Treasury Yield, 5-, 7-, 10- and 30-Year Interest Rate Swap and 10-Year Sovereign Yield Spread futures, inter-commodity futures spreads may be executed as block trades provided that **each leg of the spread** meets the minimum threshold requirement for the respective underlying products. For example, the minimum quantity thresholds for 10-Year Notes and U.S. Treasury Bonds during RTH are 5,000 and 3,000 contracts, respectively. Therefore, a block trade in the NOB spread (10-Year Note/Treasury Bond spread) can be executed only if the minimum quantity of the 10-Year Note leg of the spread is at least 5,000 contracts and the minimum quantity of the Treasury Bond leg of the spread is at least 3,000 contracts.

iii) USD IRS Futures

Inter-commodity futures spreads or combinations composed only of USD IRS futures (e.g., 2-Year USD IRS v. 10-Year USD IRS) may be executed as block trades provided that the **sum of the legs of the spread** meets the **larger** of the threshold requirements for the underlying products. For example, the minimum block trade thresholds for 2-Year USD IRS futures and 10-Year USD IRS futures are 3,000 and 1,000 contracts, respectively. Thus, a spread between these two contracts may be executed as a block trade if the sum of the quantities of the legs is at least 3,000 contracts.

Inter-commodity futures spreads or combinations excluding those composed only of USD IRS futures (e.g., 10-Year Treasury Notes v. 10-Year USD IRS) may be executed as block trades provided that **each leg of the spread** meets the minimum threshold requirement for the respective underlying products. For example, the minimum block trade thresholds for 10-Year Treasury Note futures and 10-Year USD IRS futures during RTH are 5,000 contracts and 1,000 contracts, respectively. A spread between these two contracts can be executed as a block trade, therefore, only if the quantity of the 10-Year Treasury Note leg is at least 5,000 contracts and the quantity of the 10-Year USD IRS leg is at least 1,000 contracts.

iv) All Other Products

In all other block-eligible products, inter-commodity futures spreads may be executed as block trades provided that the quantity of **each leg of the spread** meets the **larger** of the threshold requirements for the underlying products.

c) Intra-Commodity Option Spreads and Combinations

Intra-commodity option spreads and combinations may be executed as block trades provided that the quantity of **each leg of the spread** meets the designated minimum quantity threshold.

d) Inter-Commodity Option Spreads and Combinations

Inter-commodity option spreads and combinations may be executed as block trades provided that the quantity of **each leg of the spread** meets the **larger** of the threshold requirements for the underlying products.

e) Options/Futures Spreads

In general, options/futures spreads may be executed as block trades provided that the options component of the spread meets the minimum quantity threshold for the outright option or option combination and the quantity of futures executed is consistent with the delta of the options component of the spread. An exception applies to Weather and Housing options/futures spreads, where the legs of the spread may be summed to meet the 20-contract minimum threshold.

**5. Block Trade Price Reporting Requirements**

a) Time Requirements

With the exceptions noted below, all block trades must be price reported to the Exchange within **five minutes** of the transaction.

i) Block Trades during European or Asian hours (ETH or ATH) in Interest Rate Products **Excluding** USD IRS

Interest rate block trades executed during ETH or ATH must be price reported to the Exchange within **15 minutes** of the transaction. With the exception of USD IRS, interest rate block trades executed during RTH must be reported within five minutes.

ETH: 12:00 a.m. – 7:00 a.m. CT, Monday through Friday on regular business days  
RTH: 7:00 a.m. – 4:00 p.m. CT, Monday through Friday on regular business days  
ATH: 4:00 p.m. – 12:00 a.m. CT, Monday through Friday on regular business days and at all times on weekends

ii) Weather, Housing, and USD IRS Block Trades

Block trades in Weather, Housing and USD IRS contracts must be price reported to the Exchange within **15 minutes** of the transaction.

b) Reporting Obligation

Price reporting obligations are the responsibility of the seller, unless otherwise agreed to by the principal counterparties to the block trade; however, in the case of a brokered transaction, the price reporting obligation is the responsibility of the broker handling the block trade, unless otherwise agreed to by the principal counterparties to the block trade. For purposes of the foregoing, the term “seller” refers to the principal counterparty acting as the seller of the block trade.

The failure to submit timely, accurate and complete block trade reports may subject the party responsible for the reporting obligation to disciplinary action. Parties shall not be sanctioned for block reporting infractions deemed to arise from factors beyond the reporting party’s control (e.g. the block trade fails the CME ClearPort automated credit check.)

c) Reporting Methods

Block trades must be price reported to the Exchange via one of the following methods.

i) Globex Control Center (“GCC”)

All block trades (except for BTIC block trades in CME Select Sector futures and CBOT DJUSRE futures and block trades in Weather futures and options executed between 8:00 a.m. and 3:30 p.m. Chicago time, Monday – Friday on regular business days) may be price reported to the GCC. The seller or broker reports the trade by calling the GCC at **312.456.2391**. When the GCC is closed – for example, during the weekend – the block trade must be reported no later than five minutes prior to the opening of the next electronic trading session for that product.

ii) CME ClearPort

BTIC block trades in CME Select Sector futures and CBOT DJUSRE futures must be price reported electronically directly to CME Clearing via CME ClearPort. Block trades in other block-eligible contracts may also be electronically reported directly to CME Clearing via CME ClearPort. For information on reporting block trades through CME ClearPort, please contact customer service at 1.800.438.8616 or via email at [ClearPort@cmegroup.com](mailto:ClearPort@cmegroup.com).

iii) Weather Blocks on CME Clearing360 via Pivot Instant Markets

Block trades in Weather futures and options may be price reported electronically to CME Clearing360 via Pivot Instant Markets by eligible inter-dealer brokers. For additional information on price reporting block trades via Pivot Instant Markets, please contact Angie DiCarlo, Senior Director, Client Development & Sales, at 312.930.4515 or via email at [Angie.DiCarlo@cmegroup.com](mailto:Angie.DiCarlo@cmegroup.com).

iv) Weather Block Trades Executed Between 8:00 a.m. and 3:30 p.m.

Block trades in Weather futures and options executed between 8:00 a.m. and 3:30 p.m. Chicago time, Monday – Friday on regular business days should be price reported to Exchange staff by calling 312.648.3935 or 312.648.3936.

d) Information Required When Reporting Block Trades

When price reporting a block trade, the following information will be required:

- Contract, contract month and contract year for futures, and, additionally for options, strike price and put or call designation for standard options, as well as the expiration date and exercise style for flex options;
- Quantity of the trade or, for spreads and combinations, the quantity of each leg of the trade;
- Price of the trade or, for spreads and combinations, the price of each leg of the trade; and
- Buyer's clearing firm and seller's clearing firm;
- Name and phone number of the party reporting the trade (unless the block trade is electronically reported); and
- Execution time (in Central Time) of the trade (i.e. the time at which the trade was consummated).

**6. Block Trade Submission Requirements to CME Clearing**

Block trades price reported to the GCC or Exchange staff as described in numbers i) or iv) above must be submitted to CME Clearing through the FEC User Interface via the portal under BLOCK entry. For block trades executed between 6:00 a.m. and 6:00 p.m. **Central Time**, firms must submit the trade within one hour. For block trades executed between 6:00 p.m. and 6:00 a.m. **Central Time**, firms must submit the trade no later than 7:00 a.m. **Central Time**.

Block trades are entered by both the buyer's and seller's clearing firm and go through a two-sided match process. Upon entry, confirmation records will be routed back to the firms for bookkeeping purposes. When reporting spread or combination transactions, each leg must be entered individually. The execution time is required to be entered and must be the actual time at which the transaction was consummated by the two parties, not the time at which the trade is reported by the parties to their respective firms. Thus, if the clearing member has not acted as either principal or agent in the transaction, it must ensure that its customer provides an accurate execution time.

A block trade in a block-eligible option may be executed up to and including the day on which an option contract expires for purposes of offsetting an open option position. The offsetting block trade must be price reported to the GCC pursuant to the requirements of section 5 above, and the offset must be submitted to CME Clearing no later than the Position Change Submission ("PCS") deadline on the day on which the option contract expires. The current PCS deadline is 7:30 p.m. Central Time.

## **7. Block Trade Recordkeeping**

Complete order records for block trades must be created and maintained pursuant to Rule 536 and CFTC Regulations. Additionally, the time of execution of the block trade must also be recorded for all block trades.

## **8. Dissemination of Block Trade Information**

The date, execution time, contract details, price and quantity of block trades are reported upon receipt of the block information by GCC. Block trade information is reported on the MerQuote system and may be accessed by entering the code "BLK". The information will also be displayed on [cmegroup.com](http://www.cmegroup.com/tools-information/blocktrades.html) at the following link: <http://www.cmegroup.com/tools-information/blocktrades.html>. Block trade information is also displayed on the trading floor.

Block trade prices are published separately from transactions in the regular market.

Block trade volume is also identified in the daily volume reports published by the exchange.

## **9. BTIC Block Trades**

A BTIC Transaction is a futures transaction that is priced with reference to the applicable cash index close price. BTIC Transactions in Select Sector futures and BTIC Transactions in DJUSRE futures may be executed as block trades pursuant to the requirements of Rule 526 ("Block Trades"), this Advisory Notice and the applicable provisions in the corresponding product chapter (CME Chapter 369 for Select Sector futures and CBOT Chapter 30 for DJUSRE futures).

The current minimum threshold of 50 contracts applicable to each product will also apply to BTIC block trades in the products. BTIC block trades will not be permitted on the last day of trading in an expiring contract month.

BTIC block trades may not be executed as a spread transaction pursuant to the requirements in Section 4 of this Advisory Notice. Parties wishing to effectuate a block spread transaction in either product will be required to negotiate the transaction as separate outright BTIC block trades, and each leg must meet the minimum threshold of 50 contracts.

The futures price assigned to a Select Sector futures BTIC block trade will be based on the current day's Select Sector cash index close price, or the current day's Select Sector cash index close price adjusted by any valid price increment (the "Basis") higher or lower than the Select Sector cash index close price. The Basis must be stated in full tick increments as set forth in CME Rule 36901 ("Commodity Specifications").

The futures price assigned to a DJUSRE futures BTIC block trade will be based on the current day's Dow Jones US Real Estate cash index close price, or the current day's Dow Jones US Real Estate cash index close price adjusted by any valid price increment higher or lower than the Dow Jones US Real Estate cash index close price. The Basis must be stated in full tick increments as set forth in CBOT Rule 30102 ("Trading Specifications").

Market participants that transact BTIC block trades should be aware that the only acceptable method for price reporting and submitting BTIC block trades to CME Clearing is through CME ClearPort, and the entry of the trade into CME ClearPort must occur within five minutes of the agreement of the parties to execute the trade in order to comply with the price reporting requirements of CME Rule 526.F. It is not permissible for market participants to price report BTIC block trades to the Global Command Center ("GCC") and separately enter the block trades into Front-End Clearing ("FEC") as is allowed for other block trades in CME and CBOT products. Market participants should also be aware that entry of block

trades into CME ClearPort requires registration. Additional information on registration for CME ClearPort is available on the CME Group website.

BTIC block trades must be reported to the Exchange via CME ClearPort at least 10 minutes prior to the scheduled close of the underlying primary securities market to establish the BTIC futures price on the current trading day. A BTIC block trade that is not reported at least 10 minutes prior to the scheduled close of the underlying primary securities market will be priced based on the index close price for the next available trading day for the primary securities market.

The futures price of a BTIC block trade will be determined by the Exchange at 3:45 p.m. Central Time and the Exchange-determined price will be final at that time. In the event of an early scheduled close of the primary securities market, the futures price of a BTIC block trade will be determined by the Exchange 45 minutes after the early scheduled close time for the primary securities market, and the Exchange-determined price will be final at that time. In the event of an equity market disruption in the primary securities market, all BTIC block trades will be cancelled for that trade date.

**10. Disclosure of Nonpublic Information Regarding Block Trades Prohibited**

Parties involved in the solicitation or negotiation of a block trade may not disclose the details of those communications or any non-public information regarding a consummated block trade to third parties. Further, no party solicited to participate in a block trade or otherwise involved in the negotiation of a block trade may trade on the basis of non-public information obtained through the solicitation or negotiation of the block trade prior to the public report of the block trade, except that the counterparties to a consummated block trade shall not be precluded from trading following the consummation of the block trade prior to the block trade being publicly reported.

A broker negotiating a block trade on behalf of a customer may disclose the identity of the customer to potential counterparties, including the counterparty with which the block trade is consummated, only with the permission of the customer.

**11. Block Trades between Affiliated Parties**

Block trades between the accounts of affiliated parties are permitted provided that 1) the block trade is executed at a fair and reasonable price; 2) each party has a legal and independent bona fide business purpose for engaging in the trade; and 3) each party's decision to enter into the block trade is made by an independent decision-maker. In the absence of satisfying the requirements above, the transaction may constitute an illegal wash trade prohibited by Rule 534 ("Wash Trades Prohibited").

**12. CME & CBOT Block Trade-Eligible Products**

For purposes of the interest rate products in the tables, the following times apply:

ETH: 12:00 a.m. – 7:00 a.m. CT, Monday through Friday on regular business days

RTH: 7:00 a.m. – 4:00 p.m. CT, Monday through Friday on regular business days

ATH: 4:00 p.m. – 12:00 a.m. CT, Monday through Friday on regular business days and at all times on weekends

CME Products	Futures	Options	Flex Options
Eurodollars (RTH)	4,000 contracts - or 1,000 contracts provided that a minimum of 1,000 contracts are transacted in yrs 6-10	10,000 contracts	Not Available

CME Products	Futures	Options	Flex Options
Eurodollars (ETH)	2,000 contracts – or 500 contracts provided that a minimum of 500 contracts are transacted in yrs 6-10	5,000 contracts	Not Available
Eurodollars (ATH)	1,000 contracts – or 250 contracts provided that a minimum of 250 contracts are transacted in yrs 6-10	2,500 contracts	Not Available

### **14. Text of CME & CBOT Rule 526**

#### **Rule 526 BLOCK TRADES**

The Exchange shall designate the products in which block trades shall be permitted and determine the minimum quantity thresholds for such transactions. The following shall govern block trades:

- A. A block trade must be for a quantity that is at or in excess of the applicable minimum threshold. Orders may not be aggregated in order to achieve the minimum transaction size, except by those entities described in Sections I. and J.
- B. Each party to a block trade must be an Eligible Contract Participant as that term is defined in Section 1a(18) of the Commodity Exchange Act.
- C. A member shall not execute any order by means of a block trade for a customer unless such customer has specified that the order be executed as a block trade.
- D. The price at which a block trade is executed must be fair and reasonable in light of (i) the size of the block trade, (ii) the prices and sizes of other transactions in the same contract at the relevant time, (iii) the prices and sizes of transactions in other relevant markets, including without limitation the underlying cash market or related futures markets, at the relevant time, and (iv) the circumstances of the markets or the parties to the block trade.
- E. Block trades shall not set off conditional orders (e.g., Stop Orders and MIT Orders) or otherwise affect orders in the regular market.
- F. **CME** – Unless otherwise agreed to by the principal counterparties to the block trade, the seller, or, in the case of a brokered transaction, the broker handling the block trade, must ensure that each block trade is reported to the Exchange within five minutes of the time of execution; except that block trades in interest rate futures and options executed outside of Regular Trading Hours (7:00 a.m. – 4:00 p.m. Central Time, Monday – Friday on regular business days) and Housing and Weather futures and options must be reported within fifteen minutes of the time of execution. The report must include the contract, contract month, price, quantity of the transaction, the respective clearing members, the time of execution, and, for options, strike price, put or call and expiration month. The Exchange shall promptly publish such information separately from the reports of transactions in the regular market.
- F. **CBOT** - Unless otherwise agreed to by the principal counterparties to the block trade, the seller, or, in the case of a brokered transaction, the broker handling the block trade, must ensure that each block trade is reported to the Exchange within five minutes of the time of execution; except that block trades in interest rate futures and options executed outside of Regular Trading Hours (7:00 a.m. – 4:00 p.m. Central Time, Monday – Friday on regular business days) must be reported within fifteen minutes of the time of execution. The report must include the contract, contract month, price, quantity of the transaction, the respective clearing members, the time of execution, and, for options, strike price, put or call and expiration month. The Exchange shall promptly publish such information separately from the reports of transactions in the regular market.
- G. Block trades must be reported to the Clearing House in accordance with an approved reporting method.

- H. Clearing members and members involved in the execution of block trades must maintain a record of the transaction in accordance with Rule 536.
- I. A commodity trading advisor ("CTA") registered or exempt from registration under the Act, including, without limitation, any investment advisor registered or exempt from registration under the Investment Advisors Act of 1940, shall be the applicable entity for purposes of Sections A., B., C., and D., provided such advisors have total assets under management exceeding \$25 million and the block trade is suitable for the customers of such advisors.
- J. A foreign Person performing a similar role or function to a CTA or investment advisor as described in Section I, and subject as such to foreign regulation, shall be the applicable entity for purposes of Sections A., B., C., and D., provided such Persons have total assets under management exceeding \$25 million and the block trade is suitable for the customers of such Persons.

## EXHIBIT B

### MARKET REGULATION ADVISORY NOTICE

---

<b>Exchange</b>	<b>NYMEX &amp; COMEX</b>
<b>Subject</b>	<b>Block Trades</b>
<b>Rule References</b>	<b>Rule 526</b>
<b>Advisory Date</b>	<b>November 26, 2012</b>
<b>Advisory Number</b>	<b>NYMEX &amp; COMEX RA1207-4</b>
<b>Effective Dates</b>	<b>December 4, 2012 &amp; December 7, 2012</b>

This Advisory Notice supersedes NYMEX & COMEX Market Regulation Advisory Notice RA1206-4 (“RA1206-4”) from November 19, 2012. It is being issued to notify the marketplace that pending all relevant regulatory review periods, **effective on trade date December 7, 2012**, NYMEX and COMEX will adopt additional regulatory guidance into Section 1 clarifying that the privately negotiated standard for block trades precludes facilitating the execution of block trades on a system or facility accessible to multiple parties that allows for electronic matching of or the electronic acceptance of bids and offers.

Additionally, as previously communicated in RA1206-4, **effective on trade date December 4, 2012**, NYMEX will adopt the following:

- 1) reductions in block trade minimum thresholds in 105 NYMEX energy products – 84 refined, 10 NGL/petrochemical, 9 naphtha and 2 power products
- 2) establishment of block trade minimum thresholds in 125 additional NYMEX energy products – 5 crude, 97 natural gas and 23 power products

A complete list of NYMEX and COMEX products in which block trading is or will be permitted, and the relevant quantity thresholds, is available on the CME Group website via the following link:

[NYMEX & COMEX Block Trade-Eligible Products and Minimum Quantity Thresholds](#)

The text of Rule 526 appears in Section 13 of this Advisory Notice.

#### **1. Definition of Block Trades**

Block trades are privately negotiated futures, options or combination transactions that meet certain quantity thresholds which are permitted to be executed apart from the public auction market.

It shall not be permissible to facilitate the execution of block trades in Exchange-traded products on a system or facility accessible to multiple parties that allows for the electronic matching of or the electronic acceptance of bids and offers; block trades transacted in such manner do not satisfy the privately negotiated standard. Parties may use communication technologies to bilaterally request block quotes from one or more participants and to conduct privately negotiated block trades. Parties may also utilize technologies supported by third parties which allow for the electronic posting of indicative block markets displayed to multiple market participants. However, block trades executed between parties on the basis of such electronically displayed indicative markets may be transacted only through direct bilateral communications involving the broker, where applicable, and the parties to the trade.

All block trades are subject to the conditions set forth in NYMEX and COMEX Rule 526 and in this Advisory Notice.

## **2. Participation in Block Trades**

Each party to a block trade must be an Eligible Contract Participant as that term is defined in Section 1a(18) of the Commodity Exchange Act. Eligible Contract Participants generally include exchange members and member firms, broker/dealers, government entities, pension funds, commodity pools, corporations, investment companies, insurance companies, depository institutions and high net-worth individuals. Commodity trading advisors and investment advisors who are registered or exempt from registration, and foreign persons performing a similar role and subject as such to foreign regulation, may participate in block transactions provided they have total assets under management exceeding \$25 million and the block trade is suitable for their customers.

A customer order may be executed by means of a block trade only if the customer has specified that the order be executed as a block trade.

Orders may not be bunched to meet the minimum block quantity thresholds.

## **3. Time and Prices of Block Trades**

Block trades may be executed at any time, including times during which the public auction market is closed.

Block trades must be transacted at prices that are “**fair and reasonable**” in light of (i) the size of the transaction, (ii) the prices and sizes of other transactions in the same contract at the relevant time, (iii) the prices and sizes of transactions in other relevant markets, including, without limitation, the underlying cash market or related futures markets, at the relevant time, and (iv) the circumstances of the markets or the parties to the block trade.

The trade price must be consistent with the minimum tick increment for the market in question. Additionally, each outright transaction and each leg of any block eligible spread or combination trade must be executed at a single price.

Block trade prices are reported independently of transaction prices in the regular market and are not included as part of the daily trading range. Block trade prices do not elect conditional orders (e.g. stop orders) or otherwise affect orders in the regular market.

## **4. Block Trade Minimum Quantities for Outrights, Spreads and Combinations**

The block trade minimum quantity requirements for outright futures and options are set forth in the list of block trade eligible products which is available on the CME Group website via the following link:

[NYMEX & COMEX Block Trade-Eligible Products and Minimum Quantity Thresholds](#)

- a) Intra-Commodity Futures Spreads and Futures Combinations and Intra-Commodity Options Spreads and Options Combinations

These spreads and combination transactions may be executed as block trades provided that the sum of the quantities of the legs of the transaction meets the minimum block quantity threshold.

- b) Inter-Commodity Futures Spreads and Futures Combinations and Inter-Commodity Options Spreads and Options Combinations

These spreads and combination transactions may be executed as block trades provided that the sum of the quantities of the legs of the transaction meets the larger of the threshold requirements for the underlying products.

c) Options/Futures Spreads

Options/futures spreads may be executed as block trades provided that the options component of the spread meets the minimum quantity threshold for the outright option or option combination and the quantity of futures executed is consistent with the delta of the options component of the spread.

## **5. TAS & TAM Block Trades**

Certain block-eligible futures contract months may be executed as block trades and assigned the current day's settlement price or any valid price increment ten ticks higher or lower than the settlement price ("TAS block trades"). Additionally, certain block-eligible futures contract months may also be executed as block trades and assigned the current day's marker price or any valid price increment ten ticks higher or lower than the marker price ("TAM block trades").

Additionally, intra-commodity calendar spreads in the nearby month/second month spread and the second month/third month spread may be executed as TAS or TAM block trades provided that the underlying product is eligible for TAS or TAM trading.

The pricing of the legs of a TAS or TAM calendar spread block trade will be calculated as follows:

- The nearby leg of the spread will always be priced at the settlement or marker price, as applicable, for that contract month.
- The far leg of the spread will be priced at the settlement or marker price, as applicable, for that contract **minus** the allowable TAS or TAM price increment traded (-10 through +10), except in circumstances where the traded TAS or TAM price is the actual settlement or marker price of the contract.

TAS block trades, including eligible TAS calendar spread block trades, may not be executed on the last day of trading in an expiring contract.

The products and contract months in which TAS and TAM block trades are permitted are set forth in the list of block trade eligible products which is available on the CME Group website via the following link:

[NYMEX & COMEX Block Trade-Eligible Products and Minimum Quantity Thresholds](#)

## **6. Block Trade Price Reporting Requirements**

a) Time Requirements

Block trades in the following list of products must be price reported to the exchange within **five minutes** of the transaction.

- Brent Crude Oil Penultimate Financial futures (BB)
- Brent Crude Oil Last Day Financial futures (BZ)
- Light Sweet Crude Oil futures (CL)
- Gulf Coast Sour Crude Oil futures (MB)
- New York Harbor ULSD Heating Oil futures (HO)
- Henry Hub Natural Gas futures (NG)
- RBOB Gasoline futures (RB)
- NYMEX Cocoa, Coffee, Cotton and No. 11 Sugar futures (CJ, KT, TT and YO)
- Gold futures (GC)

- Silver futures (SI)
- Copper futures (HG)

Block trades in all other block-eligible NYMEX and COMEX products must be price reported to the exchange within **15 minutes** of the transaction. If the block transaction involves a spread or combination that includes certain legs subject to a five minute reporting requirement and other legs subject to a 15 minute reporting requirement, the reporting requirement for the transaction will be 15 minutes.

#### b) Reporting Obligation

Price reporting obligations are the responsibility of the seller, unless otherwise agreed to by the principal counterparties to the block trade; however, in the case of a brokered transaction, the price reporting obligation is the responsibility of the broker handling the block trade, unless otherwise agreed to by the principal counterparties to the block trade. For purposes of the foregoing, the term “seller” refers to the principal counterparty acting as the seller of the block trade.

The failure to submit timely, accurate and complete block trade reports may subject the party responsible for the reporting obligation to disciplinary action. Parties shall not be sanctioned for block reporting infractions deemed to arise from factors beyond the reporting party’s control (e.g. the block trade fails the CME ClearPort automated credit check.)

#### c) Reporting Methods

Block trades must be price reported to the exchange via one of the methods described below:

##### i) CME ClearPort

Block trades may be electronically submitted directly to CME Clearing via CME ClearPort.

Block trades may also be price reported to the CME ClearPort Facilitation Desk by calling **1.866.246.9639** or via email at [FacDesk@cmegroup.com](mailto:FacDesk@cmegroup.com). In either case, all of the data and information elements required in d) below must be submitted.

For information on reporting block trades through CME ClearPort, please contact customer service at 1.800.438.8616 or via email at [ClearPort@cmegroup.com](mailto:ClearPort@cmegroup.com).

##### ii) CME Direct

Block Trades may be electronically submitted to CME Clearing via entry on the CME Direct platform, which will satisfy the price reporting requirement. The CME Direct platform is directly connected to CME ClearPort. For information on submitting Block Trades through CME Direct, please contact CME Direct Support at [CMEDirectSupport@cmegroup.com](mailto:CMEDirectSupport@cmegroup.com).

##### iii) Trading Floor

Block trades negotiated on the trading floor must be price reported to exchange staff at the Master Pulpit.

#### d) Information Required when Reporting Block Trades

When reporting a block trade, the following information will be required:

- Contract, contract month and contract year for futures, and, additionally for options, strike price and put or call designation;
- Quantity of the trade or, for spreads and combinations, the quantity of each leg of the trade;
- Price of the trade or, for spreads and combinations, the price of each leg of the trade;

- Buyer's clearing firm and seller's clearing firm;
- Name and phone number of the party reporting the trade (for block trades reported on the trading floor or reported via telephone or email to the CME ClearPort Facilitation Desk);
- For block trades reported via phone or email to the CME ClearPort Facilitation Desk, counterparty name and contact information must also be provided for trade verification purposes; and
- Execution time (in Eastern Time) of the trade (i.e. the time at which the trade was consummated)

## **7. Block Trade Submission Requirements to CME Clearing**

Block trades reported to the trading floor must be entered by the seller or his designated representative into the CME clearing system within 30 minutes of execution and must contain the material terms of the trade, including the allocation to the correct clearing firm unless the trade will clear at the seller's qualifying clearing member firm. Within 30 minutes after entry by the seller, the buyer or his designated representative must enter into the CME clearing system a time of execution for the trade, note any disagreement with any of the terms of the trade entered by the seller, and allocate the trade to the correct clearing firm unless the trade will clear at the buyer's qualifying clearing member firm. When reporting spread or combination transactions, each leg must be entered individually. Separate submission to the CME clearing system is not required in the event that the block trade is directly entered into CME ClearPort, CME Direct or reported to the CME ClearPort Facilitation Desk.

## **8. Block Trade Recordkeeping**

Complete order records for block trades must be created and maintained pursuant to Rule 536 and CFTC Regulations. Additionally, the time of execution of the block trade must be recorded.

## **9. Dissemination of Block Trade Information**

The date, execution time, contract month, price and quantity of block trades are displayed on the CME Group website at the following link: [Block Trades](#).

Block trade prices are published separately from transactions in the regular market.

Block trade volume is also identified in the daily volume reports published by the exchange.

## **10. Disclosure of Nonpublic Information Regarding Block Trades Prohibited**

Parties involved in the solicitation or negotiation of a block trade may not disclose the details of those communications or any non-public information regarding a consummated block trade to third parties. Further, no party solicited to participate in a block trade or otherwise involved in the negotiation of a block trade may trade on the basis of non-public information obtained through the solicitation or negotiation of the block trade prior to the public report of the block trade, except that the counterparties to a consummated block trade shall not be precluded from trading following the consummation of the block trade prior to the block trade being publicly reported.

A broker negotiating a block trade on behalf of a customer may disclose the identity of the customer to potential counterparties, including the counterparty with which the block trade is consummated, only with the permission of the customer.

## **11. Block Trades between Affiliated Parties**

Block trades between the accounts of affiliated parties are permitted provided that 1) the block trade is executed at a fair and reasonable price; 2) each party has a legal and independent bona fide business purpose for engaging in the trade; and 3) each party's decision to enter into the block trade is made by an independent decision-maker. In the absence of satisfying the requirements above, the transaction may constitute an illegal wash trade prohibited by Rule 534 ("Wash Trades Prohibited").

## **13. Text of NYMEX & COMEX Rule 526**

### **Rule 526 BLOCK TRADES**

The Exchange shall designate the products in which block trades shall be permitted and determine the minimum quantity thresholds for such transactions. The following shall govern block trades:

- A. A block trade must be for a quantity that is at or in excess of the applicable minimum threshold. Orders may not be aggregated in order to achieve the minimum transaction size, except by those entities described in Sections I. and J.
- B. Each party to a block trade must be an Eligible Contract Participant as that term is defined in Section 1a(18) of the Commodity Exchange Act.
- C. A member shall not execute any order by means of a block trade for a customer unless such customer has specified that the order be executed as a block trade.
- D. The price at which a block trade is executed must be fair and reasonable in light of (i) the size of the block trade, (ii) the prices and sizes of other transactions in the same contract at the relevant time, (iii) the prices and sizes of transactions in other relevant markets, including without limitation the underlying cash market or related futures markets, at the relevant time, and (iv) the circumstances of the markets or the parties to the block trade.
- E. Block trades shall not set off conditional orders (e.g., Stop Orders and MIT Orders) or otherwise affect orders in the regular market.
- F. Unless otherwise agreed to by the principal counterparties to the block trade, the seller, or, in the case of a brokered transaction, the broker handling the block trade, must ensure that each block trade is reported to the Exchange within five minutes of the time of execution in the following futures products: Brent Crude Financial, Brent Crude Oil Last Day Financial, Light Sweet Crude Oil, Gulf Coast Sour Crude Oil, New York Harbor ULSD Heating Oil, Henry Hub Natural Gas, RBOB Gasoline, Cocoa, Coffee, Cotton, No. 11 Sugar, Gold, Silver and Copper. In all other block-eligible futures products and all block-eligible options products, the seller must ensure that each block trade is reported to the Exchange within fifteen minutes of the time of execution. The report must include the contract, contract month, price, quantity of the transaction, the respective clearing members, the time of execution, and, for options, strike price, put or call and expiration month. The Exchange shall promptly publish such information separately from the reports of transactions in the regular market.
- G. Block trades must be reported to the Clearing House in accordance with an approved reporting method.
- H. Clearing members and members involved in the execution of block trades must maintain a record of the transaction in accordance with Rule 536.
- I. A commodity trading advisor ("CTA") registered or exempt from registration under the Act, including, without limitation, any investment adviser registered or exempt from registration under the Investment Advisers Act of 1940, shall be the applicable entity for purposes of Sections A., B., C., and D., provided such advisors have total assets under management exceeding \$25 million and the block trade is suitable for the customers of such advisors.
- J. A foreign Person performing a similar role or function to a CTA or investment adviser as described in Section I, and subject as such to foreign regulation, shall be the applicable entity for purposes of Sections A., B., C., and D., provided such Persons have total assets under management exceeding \$25 million and the block trade is suitable for the customers of such Persons.
