**27.11. Acceptable Orders**

(a) An ETS order shall be in one of the following order types:

\* \* \* \* \*

(v) "Stop-Limit Orders" - A Stop Limit order has two components: (1) the stop price and (2) the limit price. When a trade has occurred on ETS at or through the stop price, the order becomes executable and enters the market as a Limit order at the limit price. The order will be executed at all price levels from the stop price up to and including the limit price. If the order is not fully executed, the remaining quantity of the order will remain active in ETS at the limit price.

(A) The allowable price range between the stop price and the limit price of a Stop-Limit order will be restricted to 100% of the No Cancellation Range (NCR) for the specified Commodity Contract.

(B) A buy Stop-Limit becomes executable when a trade occurs at or higher than the stop price. When entered, the stop price must be above the current best offer or, if no working offer, above the current anchor price. The limit price must be equal to or greater than the stop price.

(C) A sell Stop-Limit becomes executable when a trade occurs at or lower than the stop price. When entered, the stop price must be below the current best bid or, if no working bid, then below the current anchor price. The limit price must be equal to or less than the stop price.
